An aerial photograph of Burrwood Bayou, a large waterway with extensive green marshland on both sides. A large-scale dredging operation is underway in the center of the bayou. A central tugboat is connected to a long, curved line of barges. A smaller tugboat is positioned further up the bayou, also connected to a line of barges. Several other smaller boats are scattered throughout the water. In the bottom right corner, there is a large, white, rectangular structure on a wooden pier. The sky is blue with scattered white clouds.
