(504) 862-2287
Darlene.C.Herman@usace.army.mil
Application #: MVN 2017-1232 WB

Project Manager:
Elizabeth Hill
(225) 219-3225
WQC Application Number:
WQC-200807-01

Interested parties are hereby notified that a permit application has been received by the New Orleans District of the U.S. Army Corps of Engineers pursuant to: [X] Section 10 of the Rivers and Harbors Act of March 3, 1899 (30 Stat. 1151; 33 USC 403); and/or [X] Section 404 of the Clean Water Act (86 Stat. 816; 33 USC 1344).

The application has also been mailed to the Louisiana Department of Environmental Quality, for a Water Quality Certification (WQC) in accordance with statutory authority contained in Louisiana Revised Statute 30:2074 A(3), and provisions of Section 401 of the Clean Water Act (P.L. 95-17).

MAINTENANCE DREDGING OF THE W1 DRAINAGE LATERAL IN CAMERON PARISH

NAME OF APPLICANT: Cameron Parish Gravity Drainage District 3, c/o Lonnie G. Harper & Associates, Inc., 2746 Highway 384, Belle City, Louisiana 70630.

LOCATION OF WORK: Located in Cameron Parish, POB Lat 29 48 40.683N/ Long -93 20 39.138W; POE 29 47 45.200N/ Long -93 11 43.352W; Section 24 T14S R10W; Sections 30-34 & 54-68 T14S R9W, as show on the attached drawings. Hydrologic Unit 08080206.

CHARACTER OF WORK: Maintenance dredging and cleanout of the existing W1 Drainage Lateral which was previously authorized under permit # (CAMPHWL864), to provide continued drainage relief for the areas of Cameron and Creole in lower Cameron Parish. Through the use of marsh buggies and dragline/excavators, approximately 44.3 acres of jurisdictional wetlands and waterbottoms will be affected through project implementation. Approximately 95,550 cubic yards of waterbottom material will be excavated and placed along the adjacent banklines, and will be spread to an elevation not exceeding 6-inches. Compensatory mitigation has not been proposed by the applicant, as all impacts to wetlands areas are anticipated to be temporary.

The comment period for the Department of the Army Permit and the Louisiana Department of Environmental Quality WQC will close **20 days** from the date of this joint public notice. Written comments, including suggestions for modifications or objections to the proposed work, stating reasons thereof, are being solicited from anyone having interest in this permit and/or this WQC request and must be submitted so as to be received before or by the last day of the

comment period. Letters concerning the Corps of Engineers permit application must reference the applicant's name and the Permit Application Number, and be forwarded to the Corps of Engineers at the address above, **ATTENTION: REGULATORY BRANCH**. **Individuals or parties may request an extension of time in which to comment on the proposed work by writing, faxing, or e-mailing the Corps of Engineers Project Manager listed above. Any request must be specific and substantively supportive of the requested extension, and received by this office prior to the end of the initial comment period. The Section Chief will review the request and the requestor will be promptly notified of the decision to grant or deny the request. If granted, the time extension will be continuous to the initial comment period and, inclusive of the initial comment period, will not exceed a total of 30 calendar days.** Letters concerning the Water Quality Certification must reference the applicant's name and the WQC Application number and be mailed to the Louisiana Department of Environmental Quality at the address above.

The application for this proposed project is on file with the Louisiana Department of Environmental Quality and may be examined during weekdays between 8:00 a.m. and 4:30 p.m. Copies may be obtained upon payment of costs of reproduction.

Corps of Engineers Permit Criteria

The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit which reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership and, in general, the needs and welfare of the people.

The U.S. Army Corps of Engineers is soliciting comments from the public, federal, state, and local agencies and officials, Indian Tribes, and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the U.S. Army Corps of Engineers to determine whether to make, modify, condition, or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

The New Orleans District is unaware of properties listed on the National Register of Historic Places near the proposed work. The possibility exists that the proposed work may damage or destroy presently unknown archeological, scientific, prehistorical, historical sites, or data. Copies of this public notice are being sent to the State Archeologist and State Historic Preservation Officer regarding potential impacts to cultural resources.

Our initial finding is that the proposed work would neither affect any species listed as endangered by the U.S. Departments of Interior or Commerce, nor affect any habitat designated as critical to the survival and recovery of any endangered species. Based on the Information

Planning and Consultation (IPaC) tool for Endangered Species in Louisiana, as signed on January 27, 2020, between the U.S. Army Corps of Engineers, New Orleans and the U.S. Fish and Wildlife Service, it has been determined that the project would have no effect to the West Indian Manatee.

This notice initiates the Essential Fish Habitat (EFH) consultation requirements of the Magnuson-Stevens Fishery Conservation and Management Act. The applicant's proposal may result in the destruction, alteration and/or disturbance of **44.3 acres** of EFH utilized by various life stages of red drum and penaeid shrimp. Our initial determination is that the proposed action would not have a substantial adverse impact on EFH or federally managed fisheries in the Gulf of Mexico. Our final determination relative to project impacts and the need for mitigation measures is subject to review by and coordination with the National Marine Fisheries Service.

If the proposed work involves deposits of dredged or fill material into navigable waters, the evaluation of the probable impacts will include the application of guidelines established by the Administrator of the Environmental Protection Agency. Also, a certification that the proposed activity will not violate applicable water quality standards will be required from the Department of Environmental Quality, before a Department of the Army permit is issued.

Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for public hearings shall state, with particularity, the reasons for holding a public hearing.

The applicant has certified that the proposed activity described in the application complies with and will be conducted in a manner that is consistent with the Louisiana Coastal Resources Program. The Department of the Army permit will not be issued unless the applicant received approval or a waiver of the Coastal Use Permit by the Department of Natural Resources.

You are invited to communicate the information contained in this notice to any other parties whom you deem likely to have interest in the matter.

Darrell S. Barbara
Chief, Western Evaluation Section
Regulatory Branch

GENERAL NOTES:

1. THE APPLICANT REQUESTS AUTHORIZATION TO PERFORM MAINTENANCE CLEANOUT OF APPROXIMATELY 49,940 LINEAR FEET OF EXISTING LATERAL AS SHOWN IN THE PERMIT DRAWINGS. THIS WORK WAS PREVIOUSLY AUTHORIZED UNDER CUP P19930410.
2. APPROXIMATELY 95,550 CUBIC YARDS OF NATIVE MATERIAL SHALL BE REMOVED FROM THE EXISTING LATERAL AND DEPOSITED IN THE AREAS SHOWN IN THESE DRAWINGS. NO MATERIAL SHALL BE PLACED IN WATER BOTTOMS, ACROSS TRAVELING SURFACES, OR IN UNIMPROVED WETLAND AREAS.
3. THE SPOIL MATERIAL SHALL NOT EXCEED A THICKNESS OF 6 INCHES.
4. IN ORDER TO INSURE THE SAFETY OF ALL PARTIES, THE APPLICANT WILL CONTACT THE LOUISIANA DOTTIE SYSTEM (1-800-272-3020), A MINIMUM OF 48 HOURS PRIOR TO THE COMMENCEMENT OF ANY ACTIVITY.
5. THE ADJACENT LANDOWNERS SHALL BE ATTACHED TO THE PERMIT APPLICATION.
6. IT IS NOT THE INTENT TO PLACE SPOIL MATERIAL IN ANY EXISTING BORROW AREA, DITCH, OR OTHER FORMS OF OPEN WATER BODIES. THE ±60' WIDTH SHOWN IN "DETAIL P" SHOULD BE CONSIDERED TO BE THE MAXIMUM WIDTH. ACTUAL WIDTH WILL BE DETERMINED BY AVAILABLE LAND MASS ADJACENT TO THE CANAL AND AMOUNT OF MATERIAL REMOVED FROM A GIVEN AREA. EXACT LOCATION OF SPOIL DISPOSAL WILL BE DETERMINED IN THE FIELD AS THE WORK PROGRESSES. NO EXISTING DRAINAGE FEATURE WILL BE FILLED WITH SPOIL MATERIAL. UNDER NO CIRCUMSTANCES WILL THE THICKNESS OF THE SPOIL MATERIAL EXCEED 6" AS STATED IN THESE DRAWINGS
