

# JOINT PUBLIC NOTICE

November 23, 2009

United States Army  
Corps of Engineers  
New Orleans District  
Regulatory Branch  
Post Office Box 60267  
New Orleans, Louisiana 70160-0267

State of Louisiana  
Department of Environmental Quality  
Water Quality Certification Section  
Post Office Box 4313  
Baton Rouge, Louisiana 70821-4313

(504)862-2260 / Fax: (504)862-2117  
Project Manager: Darrell Barbara  
(darrell.barbara@usace.army.mil)  
Permit Application Number:  
MVN-2009-0860-EFF

(225)219-3003 / Fax :( 225)325-8250  
Project Manager:  
Jamie Phillippe  
WQC Application Number:  
WQC -091103-01

Interested parties are hereby notified that a permit application has been received by the New Orleans District of the U.S. Army Corps of Engineers pursuant to: [X] Section 10 of the Rivers and Harbors Act of March 3, 1899 (30 Stat. 1151; 33 USC 403); and/or [X] Section 404 of the Clean Water Act (86 Stat. 816; 33 USC 1344).

The application has also been mailed to the Louisiana Department of Environmental Quality for a Water Quality Certification (WQC) in accordance with statutory authority contained in Louisiana Revised Statutes 30:2074 A(3) and provisions of Section 401 of the Clean Water Act.

## **BAYOU SAVAGE WILDLIFE REFUGE - SHORELINE PROTECTION PROJECT** **IN ORLEANS PARISH**

**NAME OF APPLICANT:** US Fish and Wildlife Service, Southeast Louisiana Refuges, Bayou Lacombe Center 61389, Hwy. 434, Lacombe, Louisiana 70445.

**LOCATION OF WORK:** In Orleans Parish, Lat. 30.15583, Long.-89.85472, located along the south shore of Lake Ponchartrain at the I-10 Twin Span and Chef Menteur Pass, near Slidell, Louisiana, as shown on the attached drawings.

**CHARACTER OF WORK:** Excavate and deposit fill to implement the Bayou Savage-Shoreline Protection project for maintaining existing tidal marsh. The proposed project will include beneficially utilizing spans of the demolished I-10 Twin Span. Work will include *temporary* impacts to approximately 5.1 acres of marsh areas for construction of a required staging area for short term placement of the spans. The footprint of the proposed staging area is proposed to be restored to pre-existing conditions, upon completion of use. The LA Office of Coastal Protection and Restoration is coordinating multiple shoreline protection projects that could potentially utilize the same staging area for storing concrete spans, concurrently with bridge demolition activities. The fill operation associated with implementing Reach 1, 2, and 3 of this project will include excavating 419,915 cubic yards (cy) of water bottom materials for *temporary* access and placement of 410,993 cy of concrete materials for shoreline barriers. Approximately 22,700 feet of non-vegetative water bottoms will be permanently filled for placement of the barriers, as shown in the attached drawings.

The comment period for the Department of the Army Permit and the Louisiana Department of Environmental Quality WQC will close **20 days** from the date of this joint public notice. Written comments, including suggestions for modifications or objections to the proposed work, stating reasons thereof, are being solicited from anyone having interest in this permit and/or this WQC request and must be mailed so as to be received before or by the last day of the comment period. Letters concerning the Corps of Engineers permit application must reference the applicant's name and the Permit Application Number, and be mailed to the Corps of Engineers at the address above, **ATTENTION: REGULATORY BRANCH**. Individuals or parties may request an extension of time in which to comment on the proposed

work by writing to the project manager or clicking on the project manager's name on the public notice grid on the web page. Any request must be specific and substantively supportive of the requested extension, and received by this office prior to the end of the initial comment period. The Section Chief will review the request and the requestor will be promptly notified of the decision to grant or deny the request. If granted, the time extension will be continuous to the initial comment period and, inclusive of the initial comment period, will not exceed a total of 30 calendar days. Letters concerning the Water Quality Certification must reference the applicant's name and the WQC Application number and be mailed to the Louisiana Department of Environmental Quality at the address above.

### **Corps of Engineers Permit Criteria**

The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit which reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership and, in general, the needs and welfare of the people.

The U.S. Army Corps of Engineers is soliciting comments from the public, federal, state, and local agencies and officials, Indian Tribes, and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the U.S. Army Corps of Engineers to determine whether to make, modify, condition, or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

No properties listed on the National Register of Historic Places are near the proposed work. The possibility exists that the proposed work may damage or destroy presently unknown archeological, scientific, prehistorical, historical sites, or data. Copies of this notice are being sent to the State Archeologist and the State Historic Preservation Officer.

The subject project is located within areas know to the West Indian manatee (*Trichechus manatus*) and the Gulf sturgeon (*Acipenser oxyrinchus desotoi*). Our initial finding is that the proposed activities are not anticipated to impact or affect any species listed as endangered by the U.S. Departments of Interior or Commerce, nor affect any habitat designated as critical to the survival and recovery of any endangered species.

This notice initiates the Essential Fish Habitat (EFH) consultation requirements of the Magnuson-Stevens Fishery Conservation and Management Act. The applicant's proposal would result in the destruction, alteration, or disturbance of approximately 190 acres of EFH utilized by various life stages of red drum and penaeid shrimp. Our initial determination is that the proposed action would not have a substantial adverse impact on EFH or federally managed fisheries in the Gulf of Mexico. Our final determination relative to project impacts and the need for mitigation measures is subject to review by and coordination with the National Marine Fisheries Service.

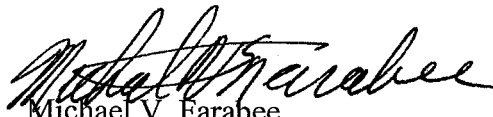

If the proposed work involves deposits of dredged or fill material into navigable waters, the evaluation of the probable impacts will include the application of guidelines established by the

Administrator of the Environmental Protection Agency. Also, a certification that the proposed activity will not violate applicable water quality standards will be required from the Department of Environmental Quality, before a permit is issued.

Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for public hearings shall state, with particularity, the reasons for holding a public hearing.

You are requested to communicate the information contained in this notice to any other parties whom you deem likely to have interest in the matter.

The applicant has certified that the proposed activity described in the application complies with and will be conducted in a manner that is consistent with the Louisiana Coastal Resources Program.

Michael V. Farabee  
Chief, Eastern Evaluation Section
