

**US Army Corps  
of Engineers®**  
New Orleans District

# Join the US Army Corps of Engineers New Orleans District

## About the Position:

The Control Structure is located in a remote area. There is no public transportation in the area. Availability of housing is minimal. The nearest towns that offer adequate housing, shopping and services are New Roads, Marksville, and Vidalia, LA and Natchez, MS, which are approximately 40 miles from the structure.

## Duties:

- \* Perform the full range of field maintenance and repair work on heavy engineer-type equipment and automotive vehicles at a district flood control structure: Equipment includes bulldozer type crawler tractor, 15 to 700 ton gantry cranes, motor graders, draglines, mobile cranes, wheeled tractors and attachments, tracks, electric motors, compressors, generators, flood control and drainage structures, flood control pumping station, and miscellaneous machinery on the structures.
- \* Determine the nature and extent of repairs required, and performs major and minor overhaul and repairs on engines, transmissions, suspensions, steering and breaking assemblies, and electrical fuel and hydraulic systems; as required, operates a variety of vehicles, equipment, and machinery in connection with the operation and maintenance of the structures.
- \* May be required to perform carpentry, welding and cutting, painting, cement finishing, and electrical maintenance and repair work on building, operating machinery facilities, etc.

## Job Information:

**Position Title:** Heavy Mobile Equipment Mechanic

**Occupational Series:** WG-5803-11

**Starting Pay:** \$31.53 / hr
