APR 8 2016

Operations Division  
Operations Manager, Completed Works

Mr. Johnny Bradberry  
Chairman  
Coastal Protection and Restoration Authority  
Board of Louisiana  
900 North Third Street  
State Capitol – 4th Floor  
Baton Rouge, Louisiana 70802

Dear Mr. Bradberry:

You are hereby informed that the following contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), LPV-ARM-03 LPV System Armoring (East Jeff 01) – LPV-03d.2, Baseline Station 1+00.90 to Station 17+25 (W912P8-15-D-0003, Task Order 0002), in St. Charles Parish, Louisiana has been completed. This project was completed by the United States pursuant to the 4<sup>th</sup> Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (PL 109-234, Title II, Chapter 3, Construction, and Flood Control and Coastal Emergencies) and the 6<sup>th</sup> Emergency Supplemental Appropriations Act (PL 110-252, Title II).

A final inspection of project was conducted on March 8, 2016, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed interim Volume 2 Supplemental OMRR&R manual regarding Armoring. Volume 3 manuals for levee reaches that receive armoring will be revised to include armoring contract specific information. Please see enclosed the following items:

- a. Redline As-built contract drawings – Enclosure 1
- b. Final inspection attendance roster – Enclosure 2
- c. Interim Volume 2 Supplemental OMRR&R Manual for Armoring – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the East Jefferson Levee District (EJLD), the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Charles Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with Section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen  
Colonel, U.S. Army  
District Engineer

Mr. Gerard J. Gillen, III  
Director of Hurricane & Flood Protection  
Orleans Levee District  
6920 Franklin Avenue  
New Orleans, Louisiana 70122

Dear Mr. Gillen:

You are hereby informed that the contract (W912P8-08-D-0041 Task Order 0003) for the Lake Pontchartrain and Vicinity Hurricane Protection Project, LPV-101 Advanced Measures, 17<sup>th</sup> Street Canal to Topaz Street Hurricane Protection Levee and the contract (W912P8-06-D-0085 Task Order 0002) for the Lake Pontchartrain and Vicinity Hurricane Protection Project, LPV-104.01, East Bank London Canal to Inner Harbor Navigation Canal Hurricane Protection Levee in Orleans Parish, Louisiana, have been completed by the United States pursuant to Public Law 109-148, Department of Defense, Emergency Supplemental Appropriations Act to Address Hurricanes in the Gulf of Mexico and Pandemic Influenza, 2006.

A joint agency final inspection of the project was conducted on June 25, 2009, and all contract work was found to be satisfactorily complete. Please see the enclosed final inspection attendance roster. The as-built contract drawings were provided to the Orleans Levee District (OLD) at the final inspection. Please refer to the Levee Owners Manual at [www.iwr.usace.army.mil/nfrmp/guidance.cfm](http://www.iwr.usace.army.mil/nfrmp/guidance.cfm) as the interim operation and maintenance manual for this project feature. In accordance with the following Project Agreements, the OLD and the Coastal Protection and Restoration Authority of Louisiana (CPRA) shall undertake the operation and maintenance, repair, rehabilitation, and replacement (OMRR&R) of this completed project feature of the Lake Pontchartrain and Vicinity, New Orleans, Louisiana, Hurricane Protection Project in Orleans Parish:

- a. Act of Assurance dated effective July 28, 1966, between the United States Government and the Board of Commissioners of the Orleans Levee District for the Lake Pontchartrain and Vicinity, Louisiana, Project, Barrier Plan in Orleans Parish, as amended.
- b. Project Partnership Agreement between Department of the Army and CPRA dated September 22, 2008, respectively.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

I am forwarding this letter to Mr. Garret Graves, Chairman, Coastal Protection and Restoration Authority of Louisiana, 1501 North 3<sup>rd</sup> Street, Capitol Annex Building, Baton Rouge, Louisiana 70802.

If there are any questions concerning your OMRR&R responsibilities, please call Mrs. Amy Powell or Mrs. Karen Oberlies at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity, Hurricane Protection Project, LPV-07b-2a, North of Airline Highway, Cross Bayou Access Bridge & Pile Load Test (W912P8-08-D-0047, Task Order 0004), in St. Charles Parish, Louisiana, has been completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A joint agency final inspection of the project was conducted on April 9, 2010, and all contract work was found to be satisfactorily complete. Please see the enclosed final inspection attendance roster and the as-built contract drawings. Additionally, please refer to the Levee Owner's Manual at [www.iwr.usace.army.mil/nfrmp/guidance.cfm](http://www.iwr.usace.army.mil/nfrmp/guidance.cfm) as the interim operation and maintenance manual for this project feature. Please note that specific operations and maintenance procedures for the access bridge are currently in development and will be forwarded to you when complete.

In accordance with the Project Partnership Agreement between the Department of the Army and the Coastal Protection and Restoration Authority (CPRA) dated September 22, 2008, the CPRA shall undertake the operation and maintenance, repair, rehabilitation, and replacement (OMRR&R) of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane Protection Project in St. Charles Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity, St. Charles Parish Hurricane Protection Project, LPV-04.1 Reach 1A, 1B, and 2A (W912P8-06-D-0086 Task Order 0001), in St. Charles Parish, Louisiana has been completed by the United States pursuant to Public Law 109-234, Department of Defense, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery, 2006. This contract completed the levee to the 100 year level of risk reduction in Reaches 2A between levee stations 5+65 and 94+72 (Bayou Trepagnier Pump Station to Shell Pipeline Floodwall) and Reach 1B between levee stations 476+82 and Sta. 493+75 (Walker Drainage Structure and the Illinois Central Railroad Swing Gate). The remainder of levee Reaches 1A, 1B, and 2A are currently being constructed to the 100 year level of risk reduction under other contracts, and you will be notified of their completion by separate letter.

A joint agency final inspection of the project was conducted on September 28, 2010, and all contract work was found to be satisfactorily complete. Please see the enclosed final inspection attendance roster and as-built contract drawings. The as-built contract drawings were sent to the Pontchartrain Levee District. Please refer to the Levee Owners Manual at [www.iwr.usace.army.mil/nfrmp/guidance.cfm](http://www.iwr.usace.army.mil/nfrmp/guidance.cfm) as the interim operation and maintenance manual for this project feature. Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane Storm Damage Risk Reduction System, OFC-06, Remediation of Canal Walls for the Orleans Avenue Canal, (W912P8-11-C-0021), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on August 9, 2011, and all contract work was performed in accordance with the approved plans and specifications. Please see enclosed the following items:

- a. as-built contract drawings – Enclosure 1
- b. interim operations, maintenance, repairs, replacement and rehabilitation (OMRR&R) manual – disc with pdf – Enclosure 2
- c. final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by your maintenance supervisor and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and the Coastal Protection and Restoration Authority (CPRA) dated September 22, 2008, the CPRA shall undertake the operation and maintenance, repair, replacement, and rehabilitation (OMRR&R) of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane Storm Damage Risk Reduction System in Orleans Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Oberlies, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Edward R. Fleming  
Colonel, US Army

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane Storm Damage Risk Reduction System, LPV-06c.2, Goodhope Floodwall Phase 2 (W912P8-10-D-0010, Task Order 0002), in St. Charles Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on November 3, 2011, and all contract work was performed in accordance with the approved plans and specifications. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual previously provided to you. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by your maintenance supervisor and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

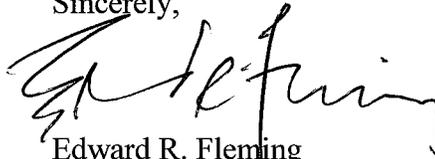

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and the Coastal Protection and Restoration Authority (CPRA) dated September 22, 2008, the CPRA shall undertake the operation and maintenance, repair, replacement, and rehabilitation (OMRR&R) of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane Storm Damage Risk Reduction System in St. Charles Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Oberlies, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

A handwritten signature in black ink, appearing to read "E. R. Fleming". The signature is written in a cursive style with a large, sweeping initial "E".

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane Storm Damage Risk Reduction System, LPV-06a.2, Bayou Trepagnier Complex Floodwall Phase 2 (W912P8-09-D-0043, Task Order 0004), in St. Charles Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on January 18, 2012, and all contract work was performed in accordance with the approved plans and specifications. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual previously provided to you. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by your maintenance supervisor and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

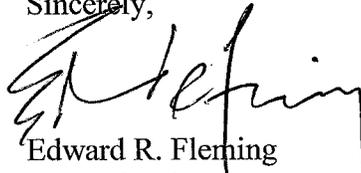

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and the Coastal Protection and Restoration Authority (CPRA) dated September 22, 2008, the CPRA shall undertake the operation and maintenance, repair, replacement, and rehabilitation (OMRR&R) of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane Storm Damage Risk Reduction System in St. Charles Parish.

Chairman  
Coastal Protection and Restoration Authority of Louisiana  
1501 North 3<sup>rd</sup> Street  
Capitol Annex Building  
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane Storm Damage Risk Reduction System, LPV-16.2, Bonnabel Blvd. Floodgate, (W912P8-09-D-0044, Task Order 0002), in Jefferson, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on November 28, 2011, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data for levee – Enclosure 2
- c. Notification of Contract Completion survey data for floodgate/floodwall – Enclosure 3
- d. Final inspection attendance roster – Enclosure 4

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority of Louisiana and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

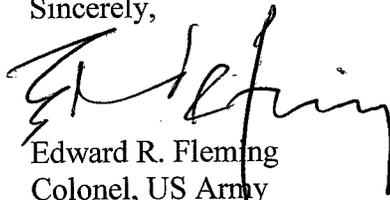

The NCC survey data includes two tables presenting elevations at stations that can be compared to the construction plans. The data in Enclosure 2 represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction in 2011. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves. The data in Enclosure 3 represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and the Coastal Protection and Restoration Authority (CPRA) dated September 22, 2008, the CPRA shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Oberlies, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Edward R. Fleming  
Colonel, US Army

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane Storm Damage Risk Reduction System, LPV-06b.2, Shell Pipeline Floodwall Phase 2 (W912P8-08-D-0043, Task Order 0002), in St. Charles Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on October 11, 2011, and all contract work was performed substantially in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual previously provided to you. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by your maintenance supervisor and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

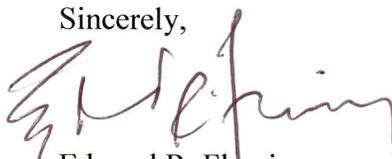

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. Operations Manager, Completed Works

Mr. Garret Graves  
Chairman  
Coastal Protection and Restoration Authority of Louisiana  
1501 North 3<sup>rd</sup> Street  
Capitol Annex Building  
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane Storm Damage And Risk Reduction System, LPV-06e.2, Floodwall Under I-310, (W912P8-10-C-0075), in St. Charles Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on April 16, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual previously provided to you. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority of Louisiana (CPRA) and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

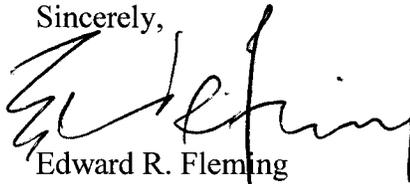

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA dated September 22, 2008, CPRA shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane Storm Damage Risk Reduction System in St. Charles Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Oberlies, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane Storm Damage Risk Reduction System, LPV-192.03, Inner Harbor Navigation Canal (IHNC) Interior Levees & Floodwalls, Relief Wells (W912P8-10-D-0007, Task Order 0003), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on May 23, 2012, and all contract work was performed in accordance with the approved plans and specifications. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Additionally, Volume 3 documentation for LPV-192.03, included with this letter, will provide specific information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Final inspection attendance roster – Enclosure 2
- c. Volume 3 OMRR&R documentation for LPV-192.03 – Enclosure 3

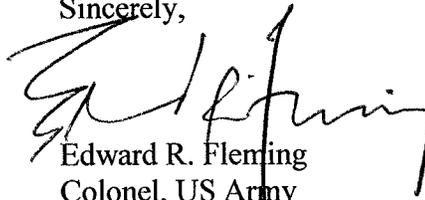

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane Storm Damage Risk Reduction System in Orleans Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Mr. Garret Graves  
Chairman  
Coastal Protection and Restoration Authority Board of Louisiana  
1501 North 3<sup>rd</sup> Street  
Capitol Annex Building  
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-07c.2, St. Rose Drainage Structure & Levee (W912P8-10-C-0032), in St. Charles Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on April 24, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and the updated Volume 2, previously provided to you. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data for the levee – Enclosure 2
- c. Notification of Contract Completion (NCC) survey data for the floodwall – Enclosure 3
- d. Final inspection attendance roster – Enclosure 4

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

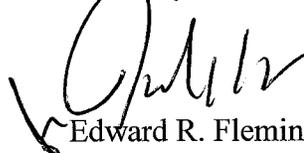

The NCC survey data includes two tables presenting elevations at stations that can be compared to the construction plans. The data in Enclosure 2 represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction in 2011. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves. The data in Enclosure 3 represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Charles Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Mr. Elton M. Lagasse  
Jefferson Parish Council Chairman  
Jefferson Parish General Government Building  
200 Derbigny Street  
Gretna, Louisiana 70053

Dear Mr. Doody, Mr. Graves and Mr. Lagasse:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-01.1, Reach 2 Lakefront Levee – Phase 1 and 2 (W912P8-08-D-0049, Task Order 0004), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico and Pandemic Influenza Act, 2006, and Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on July 17, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and

Volume 2. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3
- d. Interim Hurricane and Storm Damage Risk Reduction System OMRR&R Manual, Volume 1 and 2 (for Jefferson Parish only) – Enclosure 4

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority - East, the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

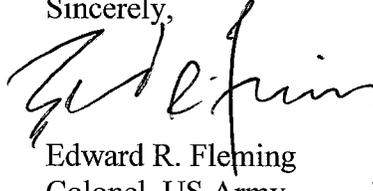

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction in 2011. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves.

In accordance with the Local Assurance Agreement Amendment between the Department of the Army and the East Jefferson Levee District and the Fourth Jefferson Drainage District dated August 23, 2006, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, East Jefferson Levee District and CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

A handwritten signature in black ink, appearing to read "E. Fleming". The signature is written in a cursive style with a large, prominent initial "E".

Dear Mr. Doody, Mr. Graves, and Ms. St. Martin:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-103.01A2, East Bank Orleans Canal to West Bank London Canal (W912P8-09-D-0047, Task Order 0004), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico and Pandemic Influenza Act, 2006, and Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on May 24, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operations,

maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3
- d. Volume 1 and 2 of the interim LPV Hurricane and Storm Damage Risk Reduction System OMRR&R manual (Sewerage and Water Board Only) – Enclosure 4

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority - East, the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

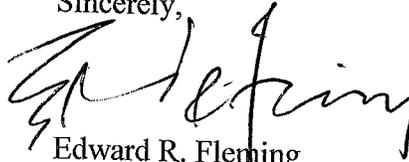

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Cooperation Agreement between the Department of the Army and the Southeast Louisiana Flood Protection Authority – East and the Sewerage and Water Board of New Orleans dated February 13, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, the Southeast Louisiana Flood Protection Authority - East and CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-103.01A1, East Bank Orleans Outfall Canal to West Bank London Avenue Outfall Canal (W912P8-09-D-0047, Task Order 0002), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on May 24, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

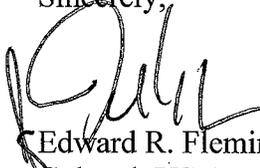

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Edward R. Fleming  
Colonel, US Army  
District Engineer

Dear Mr. Doody, Mr. Graves, and Ms. St. Martin:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane/Shore Protection Project, France Road Gate and Road Ramp, Inner Harbor Navigation Canal (IHNC) West Side, LPV-IHNC-10 (W912P8-09-D-0050, Task Order 0006), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico and Pandemic Influenza Act, 2006.

A final inspection of the project was conducted on July 31, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operations, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which

will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority - East, the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

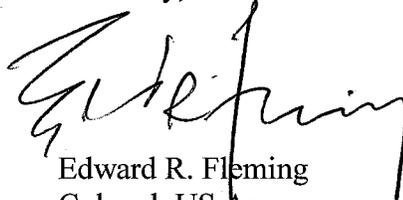

In accordance with the Cooperation Agreement between the Department of the Army and the Southeast Louisiana Flood Protection Authority - East and the Sewerage and Water Board of New Orleans dated February 13, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, the Southeast Louisiana Flood Protection Authority - East and CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-108, Paris Road to South Point Levee (W912P8-08-D-0042) and associated US Army Corps of Engineers hired labor work, in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on May 22, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

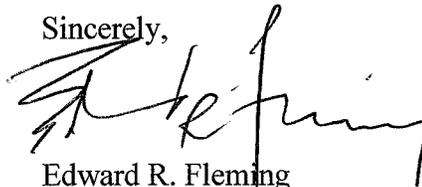

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction in 2012. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-03.2A, Louis Armstrong Airport to I-10, West Return Floodwall (W912P8-10-C-0105), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on November 8, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB) and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

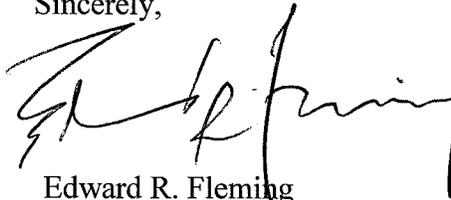

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane Storm and Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Ms. Marcia St. Martin  
Executive Director  
Sewerage and Water Board of New Orleans  
625 Joseph Street  
New Orleans, Louisiana 70165

Dear Mr. Doody, Mr. Graves, and Ms. St. Martin:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-104.01a, London Avenue to IHNC Authorized Level (W912P8-09-D-0048, Task Order 0004), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico and Pandemic Influenza Act, 2006, and Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on November 7, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and

Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority - East, the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction in 2012. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The data also represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Cooperation Agreement between the Department of the Army and the Southeast Louisiana Flood Protection Authority – East and the Sewerage and Water Board of New Orleans dated February 13, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, the Southeast Louisiana Flood Protection Authority - East and CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Edward R. Fleming  
Colonel, US Army  
District Engineer

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-03.2B, North of I-10, West Return Floodwall (W912P8-10-C-0101), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on October 24, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB) and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are acceptable as constructed.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-104.02, London Avenue Canal to IHNC (W912P8-10-C-0037), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on December 5, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction in 2012. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The data also represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-147, Highway 46 Floodgates and T-wall Tie-ins, (W912P8-10-D-0010, Task Order 0003), in St. Bernard Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on August 5, 2011, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with the above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Top of wall assessment for St. Bernard Parish floodwalls – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA)

and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure. In addition, at Southeast Louisiana Flood Protection Authority-East suggestion, the northbound trolley was replaced and tested on November 9, 2012.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and the CPRA (now known as CPRAB) dated September 22, 2008, the CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Bernard Parish, Louisiana.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Mr. Garret Graves  
Chairman  
Coastal Protection and Restoration Authority  
Board of Louisiana  
1501 North 3<sup>rd</sup> Street  
Capitol Annex Building  
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, OFC-05, Remediation of Floodwalls on the 17<sup>th</sup> Street Canal (W912P8-10-D-0006, Task Order 0002), in Jefferson and Orleans Parishes, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on November 1, 2012, and all contract work was performed in accordance with the approved plans and specifications. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Final inspection attendance roster – Enclosure 2

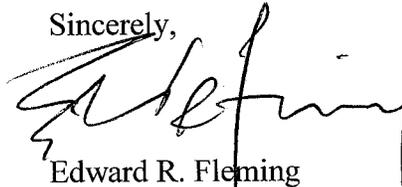

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson and Orleans Parishes.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Ms. Marcia St. Martin  
Executive Director  
Sewerage and Water Board of New Orleans  
625 Joseph Street  
New Orleans, Louisiana 70165

Dear Mr. Doody, Mr. Graves, and Ms. St. Martin:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-113, Michoud Slip/Canal Levee (W912P8-08-D-0037), in Orleans Parish, Louisiana, has been completed. Segment LPV-113 is located within the National Aeronautics and Space Agency (NASA) Michoud Facility in New Orleans East. LPV-113 consists of accomplishing levee enlargement, channel excavation, foreshore protection works, and levee scour protection as project betterments instead of at a project cost, and the addition of required relief wells at project cost. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico and Pandemic Influenza Act, 2006.

A final inspection of the project was conducted on December 17, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operations, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority - East, the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

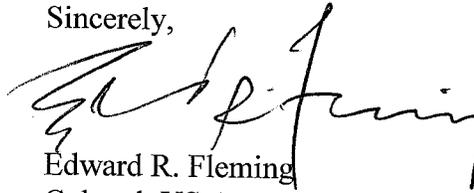

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction in 2013. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves.

In accordance with the Cooperation Agreement between the Department of the Army and the Southeast Louisiana Flood Protection Authority-East and the Sewerage and Water Board of New Orleans dated February 13, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, the Southeast Louisiana Flood Protection Authority - East and CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Edward R. Fleming  
Colonel, US Army  
District Engineer

Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-17.2, Bridge Abutment and Floodwall Tie-Ins at Causeway Bridge (W912P8-10-C-0111), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on July 16, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

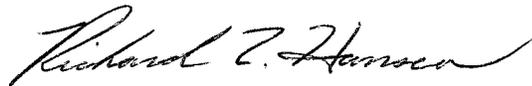

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Operations Division  
Operations Manager, Completed Works

Mr. Garret Graves  
Chairman  
Coastal Protection and Restoration Authority  
Board of Louisiana  
1501 North 3<sup>rd</sup> Street  
Capitol Annex Building  
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-106, Citrus Lakefront Levee (W912P8-10-C-0070), and associated US Army Corps of Engineers hire labor work, in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on July 10, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration

Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

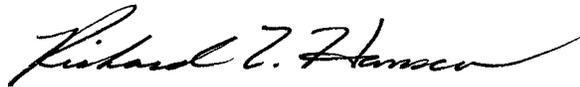

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen  
Colonel, US Army  
District Engineer

Mr. Garret Graves  
Chairman  
Coastal Protection and Restoration Authority  
Board of Louisiana  
1501 North 3<sup>rd</sup> Street  
Capitol Annex Building  
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-04.2A, North of Airline Highway, St. Charles Parish Levee – Reach 1A, from Cross Bayou to St. Rose and Gulf South Floodwall (W912P8-09-D-0052, Task Order 0004), in St. Charles Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on August 12, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration

Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

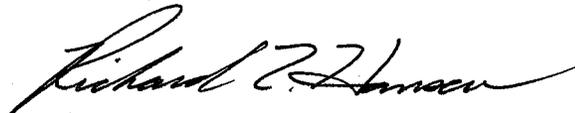

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves. The data also represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Charles Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen  
Colonel, U.S. Army

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-149, Caernarvon Canal Floodwall (W912P8-10-R-0034), in St. Bernard and Plaquemines Parishes, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on August 17, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Additionally, interim Volume 3 OMRR&R documentation, the Standing Instructions, and the Gaging Forms and Software for the Caernarvon Canal Sector Gate, included with this letter, will provide specific information associated with above referenced contract. Final OMRR&R information associated with above referenced contract will be provided in the near future. Please see enclosed for the following items:

- a. As-built contract drawings - Enclosure 1
- b. Top of wall assessment for St. Bernard Parish floodwalls - Enclosure 2
- c. Final inspection attendance roster - Enclosure 3
- d. Interim Volume 3 of O&M Manual – Enclosure 4
- e. Standing Instructions for Water Control, LPV 149 – Enclosure 5

f. Gaging Forms and Software, LPV 149 – Enclosure 6

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA) and by our office.

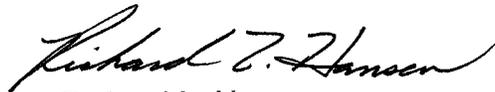

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and the CPRA (now known as CPRAB) dated September 22, 2008, the CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Bernard Parish, Louisiana.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-20.2, Reach 3 and Reach 4, Berm Enlargement and Foreshore (W912P8-09-D-0046, Task Order 0009), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on September 24, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration

Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

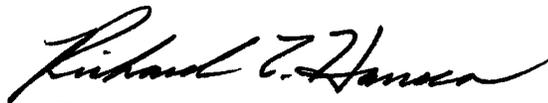

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the foreshore protection dike and a profile of the wave attenuation berm where it meets the foreshore protection dike. The data was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the foreshore protection and wave attenuation berm are above the elevations required to provide a 100-year level of risk reduction. Both were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, OFC-04a, Remediation of Floodwalls on the Orleans Avenue Canal (W912P8-10-D-0010, Task Order 0005), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on September 18, 2013, and all contract work was performed in accordance with the approved plans and specifications. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Final inspection attendance roster – Enclosure 2

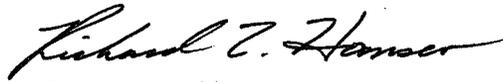

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen  
Colonel, U.S. Army  
District Engineer

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-104.02b, Orleans Metro Seepage Cutoff, Seabrook to Franklin Avenue (W912P8-11-D-0010, Task Order 0003), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on October 8, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Final inspection attendance roster – Enclosure 2

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration

Authority (CPRA), the Southeast Louisiana Flood Protection Authority – East, and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish.

Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-09.2, Fronting Protection and Breakwater Modifications (W912P8-10-C-0073), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on November 18, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

Dear Mr. Graves:

You are hereby informed that the contract for the Inner Harbor Navigation Canal, Hurricane and Storm Damage Risk Reduction Work, Seabrook Gate, IHNC-01 (Contract W912P8-10-C-0001), in Orleans Parish, has been completed. This project was completed by the United States pursuant to Public Law 109-234 (under the Flood Control and Coast Emergencies heading, Chapter 3, Title III), Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on May 30, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Additionally, Volume 3 documentation and the Master Water Control Plan for IHNC-01, Seabrook Gate complex, in Orleans Parish, Louisiana, included with this letter, will provide specific information associated with above referenced contract. Final OMRR&R information associated with above referenced contract will be provided in the near future. Please see enclosed for the following items:

- a. As-built contract drawings – Enclosure 1 (in two CD's)
- b. Final inspection attendance roster – Enclosure 2
- c. Volume 3 OMRR&R Supplemental documentation for IHNC-01; Seabrook Gate Complex- Enclosure 3
- d. Master Water Control Plan For IHNC-01; Seabrook Gate Complex - Enclosure 4

e. Notification of Contract Completion (NCC) survey data – Enclosure 5

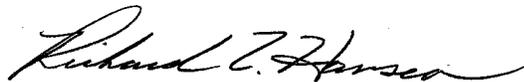

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated April 1, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Dear Mr. Graves:

You are hereby informed that the contract for the Inner Harbor Navigation Canal (IHNC) Hurricane Protection Work, Lake Borgne Surge Barrier, Lake Pontchartrain and Vicinity (LPV) project, IHNC-02, in Orleans Parish, has been completed. This project consisted of constructing 1.8 miles of barrier located at the confluence of the Gulf Intracoastal Waterway (GIWW) and the now de-authorized portion of the Mississippi River Gulf Outlet, a 150-foot-wide bypass barge gate and a 150-foot-wide flood control sector gate at the GIWW, and a 56-foot-wide vertical lift gate at Bayou Bienvenue. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

Final inspections of the project were conducted on November 12, 2013, November 13, 2013, and November 25, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria.

For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Additionally, Volume 3 documentation and the Master Water Control Plan for IHNC-02; Lake Borgne Surge Barrier, in Orleans Parish, Louisiana, included with this letter, will provide specific information associated with

above referenced contract. Final OMRR&R information associated with above referenced contract will be provided in the near future. Please see enclosed for the following items:

- a. As-built contract drawings - Enclosure 1
- b. Final inspection attendance roster - Enclosures 2
- c. Notification of Contract Completion (NCC) survey data – Enclosure 3
- d. Volume 3 OMRR&R Supplemental Documentation for IHNC-02; Lake Borgne Surge Barrier - Enclosure 4
- e. Master Water Control Plan For IHNC-02; Lake Borgne Surge Barrier – Enclosure 5

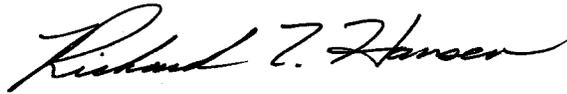

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The survey data reflects the elevations of the floodgates/barrier are acceptable when considering overtopping rates, settlement, survey tolerances, and construction tolerances.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated April 1, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Inner Harbor Navigation Canal Hurricane Protection Work, Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Mr. Jerome Zeringue  
Chairman  
Coastal Protection and Restoration Authority  
Board of Louisiana  
1501 North 3<sup>rd</sup> Street  
Capitol Annex Building  
Baton Rouge, Louisiana 70802

Dear Mr. Zeringue:

You are hereby informed that the wetland mitigation bank contract, LPV-EVM-05, for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), Environmental Mitigation for Swamp Non-Refuge impacts, has been completed.

The U. S. Army Corps of Engineers (USACE) has purchased swamp credits from the following banks to compensate for unavoidable habitat losses associated with the subject project:

Contract Number	Mitigation Bank	Number of Credits	Number of AAHUs	Type of Credit	Total Price
W912P8-14-C-0032	Spanish Lake Restoration Unit 3	86.2	49.99	General	\$2,749,780
W912P8-14-C-0033	High Point Bank Phase I	70.02	21.01	Coastal	\$1,400,400
W912P8-14-C-0034	Coastal Rental Corporation, dba Timberton	105.8	37.01	Coastal	\$4,020,400

Enclosed are the confirmation letters and signed purchase agreements from each respective bank.

The purchase of mitigation bank credits representing 108.01 average annual habitat units (AAHUs) of swamp habitat fulfills the compensatory mitigation requirement for impacts to non-refuge swamp arising from LPV HSDRRS construction. Pursuant to the purchase agreements, the mitigation banks have assumed the responsibility for the LPV

HSDRRS non-refuge swamp compensatory mitigation requirements, including implementation, achievement of mitigation success, and long-term management. In accordance with Section 2036(c) of the Water Resources Development Act of 2007 (Public Law 110-114), the purchase of these credits relieves USACE and the Coastal Protection and Restoration Authority Board (CPRAB) of Louisiana from responsibility for monitoring the mitigation and for demonstrating mitigation success. Accordingly, CPRAB has no operation and/or maintenance responsibilities with respect to this completed mitigation.

Should you have questions, please call Mr. Troy G. Constance, Acting Deputy District Engineer for Project Management or Ms. Elizabeth Behrens, Biologist, Coastal Environmental Planning Section, at (504) 862-2204 and (504) 862-2025, respectively.

Sincerely,

Richard L. Hansen  
Colonel, U. S. Army  
District Engineer

Mr. Jerome Zeringue  
Chairman  
Coastal Protection and Restoration Authority  
Board of Louisiana  
1501 North 3<sup>rd</sup> Street  
Capitol Annex Building  
Baton Rouge, Louisiana 70802

Dear Mr. Zeringue:

You are hereby informed that the wetland mitigation bank contract, LPV-EVM-04, for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), Environmental Mitigation for Bottomland Hardwood (BLH)-Wet Non-Refuge impacts, has been completed.

The U. S. Army Corps of Engineers (USACE) has purchased BLH-Wet credits from the following banks to compensate for unavoidable habitat losses associated with the subject project:

<b>Contract Number</b>	<b>Mitigation Bank</b>	<b>Number of Credits</b>	<b>Number of AAHUs</b>	<b>Type of Credit</b>	<b>Total Price</b>
W912P8-14-C-0035	Coastal Rental Corporation, dba Timberton	26.3	16.83	Coastal	\$999,400
W912P8-14-C-0036	First Louisiana Resource, LLC	34.8	17.40	General	\$452,400
W912P8-14-C-0037	Delta Land Services, LLC	94.7	59.65	General	\$2,367,500

Enclosed are the confirmation letters and signed purchase agreements from each respective bank.

The purchase of mitigation bank credits representing 93.88 average annual habitat units (AAHUs) of BLH-Wet habitat fulfills the compensatory mitigation requirement for

impacts to non-refuge BLH-Wet arising from LPV HSDRRS construction. Pursuant to the purchase agreements, the mitigation banks have assumed the responsibility for the LPV HSDRRS non-refuge BLH-Wet compensatory mitigation requirements, including implementation, achievement of mitigation success, and long-term management. In accordance with Section 2036(c) of the Water Resources Development Act of 2007 (Public Law 110-114), the purchase of these credits relieves USACE and the Coastal Protection and Restoration Authority Board (CPRAB) of Louisiana from responsibility for monitoring the mitigation and for demonstrating mitigation success. Accordingly, CPRAB has no operation and/or maintenance responsibilities with respect to this completed mitigation.

Should you have questions, please call Mr. Troy G. Constance, Acting Deputy District Engineer for Project Management, or Ms. Elizabeth Behrens, Biologist, Coastal Environmental Planning Section, at (504) 862-2204 and (504) 862-2025, respectively.

Operations Manager, Completed Works

Mr. Jerome Zeringue  
Chairman  
Coastal Protection and Restoration Authority  
Board of Louisiana  
1501 North 3<sup>rd</sup> Street  
Capitol Annex Building  
Baton Rouge, Louisiana 70802

Dear Mr. Zeringue:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-109.02a, New Orleans East Levee - South Point to CSX Railroad (W912P8-10-C-0059), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on July 23, 2014, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

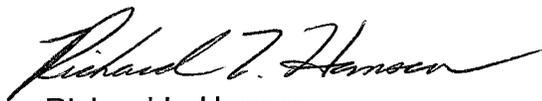

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The data also represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen  
Colonel, U.S. Army  
District Engineer

Baton Rouge, Louisiana 70802

Dear Mr. Zeringue:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-146, Chalmette Loop Levee – Bayou Dupre to Hwy 46 Floodwall (W912P8-09-C-0094), in St. Bernard Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on July 29, 2014, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data, top of wall assessment for St. Bernard Parish floodwalls – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

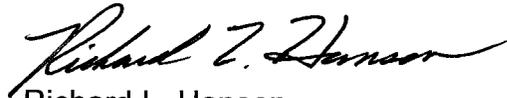

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall/floodgate. The survey data reflects the elevations of the floodwall/floodgate are acceptable.

As you are aware, at CPRAB's request, the New Orleans District is in the process of carrying out ongoing investigations to determine the impacts of the settlement induced bending moment (SIBM) on this portion of the project. The results of the investigations, which should be available in early 2015, will be shared with CPRAB. As previously stated, this portion of the project meets the current 100-year event design criteria; however, should the Department of the Army, in its sole discretion, conclude, as a result of the investigations, that this portion of the project would not meet the current design criteria for a future condition SIBM, the Department will consider undertaking such actions as the Department determines to be necessary and appropriate within the confines of existing law and policy in effect at the time the action may be undertaken.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System, in St. Bernard Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

Dear Mr. Zeringue:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-1.2, Reach 1 and Reach 2 Berm Enlargement and Foreshore (W912P8-10-C-0120), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on August 19, 2014, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration

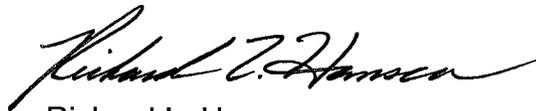

Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the foreshore protection dike and a profile of the wave attenuation berm where it meets the foreshore protection dike. The data was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the foreshore protection and wave attenuation berm are above the elevations required to provide a 100-year level of risk reduction. Both were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Baton Rouge, Louisiana 70802

Dear Mr. Zeringue:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-149a, LPV 149/MRL Tie-In (W912P8-13-C-0054), in St. Bernard Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on August 7, 2014, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

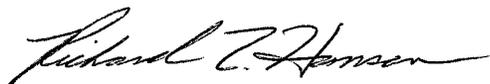

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The data also represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Bernard Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen  
Colonel, U.S. Army  
District Engineer

Dear Mr. Zeringue:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-111.01, New Orleans East Levee – CSX Railroad to Michoud Canal (W912P8-09-C-0062), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on October 30, 2014, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Construction completion survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

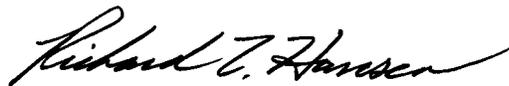

The construction completion survey data includes a table presenting elevations at stations that can be compared to the construction plans. Operations Division  
Operations Manager, Completed Works

Mr. Chip Kline  
Chairman  
Coastal Protection and Restoration Authority  
Board of Louisiana  
900 North Third Street  
State Capitol – 4<sup>th</sup> Floor  
Baton Rouge, Louisiana 70802

Dear Mr. Kline:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-145, Chalmette Loop Levee – Bayou Bienvenue to Bayou Dupre (W912P8-09-C-0084), in St. Bernard Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on December 16, 2014, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Construction completion survey data, top of wall assessment for St. Bernard Parish floodwalls – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The construction completion survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall/floodgates. The survey data reflects the elevations of the floodwall/floodgates are within the tolerance of the elevations required by the construction plans.

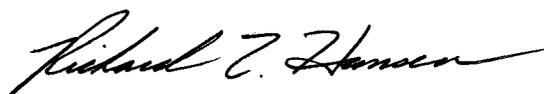

As you are aware, the New Orleans District is in the process of carrying out ongoing investigations to determine the potential impacts of the settlement induced bending moment (SIBM) on this portion of the project. The results of the investigations, which should be available in early 2015, will be shared with CPRAB. We are also moving forward with adding monitoring equipment to the floodwall and adding a long term monitoring program to the OMRR&R manual, which has been coordinated with your office, to measure corrosion, settlement, and pile stresses. Existing case studies, based on field monitoring and structural and geotechnical evaluations, have shown SIBM numerical analysis to be conservative. Thus, the intent is to provide SIBM analysis with field verification to ensure reasonable engineering conclusions in any future structural and geotechnical re-analysis.

As previously stated, this portion of the project meets the 100-year event design criteria; however, should the Department of the Army, in its sole discretion, conclude, as a result of the investigations, that this portion of the project would not meet the current design criteria for a future condition SIBM, the Department will consider undertaking such actions as the Department determines to be necessary and appropriate within the confines of existing law and policy in effect at the time the action may be undertaken. If existing authorities and funding do not support the determined actions, then the Army will follow normal processes regarding authority and appropriations.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Bernard Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen  
Colonel, U.S. Army  
District Engineer

Dear Mr. Kline:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-03.2b.1, West Return Floodwall (Northern Segment) Landside Runoff (LSRO) Collection System (W912P8-11-D-0004, Task Order 0003), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection was conducted on November 19, 2014, for the above referenced contract and several punchlist items were noted. These were subsequently addressed under a separate contract, LPV-3.2b.2 (W912P8-15-C-0004), for which a final inspection was held March 25, 2015. All contract work was performed in accordance with the approved plans and specifications. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

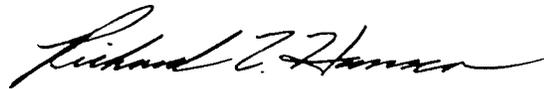

- a. As-built contract drawings – Enclosure 1
- b. Final inspection attendance rosters – Enclosures 2 and 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

Please see enclosed the following items:

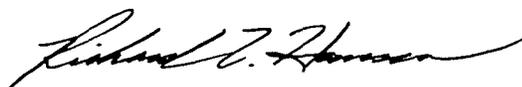

- a. As-built contract drawings – Enclosure 1
- b. Construction completion survey data, top of wall assessment for St. Bernard Parish floodwalls – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3
- d. Interim OMRR&R manual – Enclosure 4

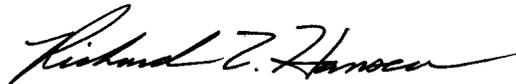

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The construction completion survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Bernard Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with Section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen  
Colonel, U.S. Army  
District Engineer

Dear Mr. Kline:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-148.02A, Chalmette Loop Levee – St. Mary Pump Station Safe Room (W912P8-14-C-0051), in St. Bernard Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on June 25, 2015, and all contract work was performed in accordance with the approved plans and specifications. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volumes 1 and 2, previously provided to you. Additionally, interim Volume 3 documentation, included with this letter, will provide specific information associated with the above referenced contract. Please note, the final Volume 3 OMRR&R manual will be provided in the near future. Please see enclosed the following items:

- a. Redline As-built contract drawings – Enclosure 1
- b. Final inspection attendance roster – Enclosure 2
- c. Interim Volume 3 of the OMRR&R Manual – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. Dear Mr. Hassinger, Mr. Grant, and Mr. Kline:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV) Project, Bayou Sauvage Borrow Mitigation, LPV-EVM-03 (W912P8-12-C-0027), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico and Pandemic Influenza Act, 2006.

A joint agency final inspection of the project was conducted on February 9, 2015. In May and June 2015, repairs were performed at the site and all punch list items have been found to have been satisfactorily complete. All contract work was found to have been performed in accordance with the approved plans and specifications. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to

Dear Mr. Bradberry:

You are hereby informed that the following contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), LPV-ARM-03 LPV System Armoring (East Jeff 01) – LPV-03d.2, Baseline Station 1+00.90 to Station 17+25 (W912P8-15-D-0003, Task Order 0002), in St. Charles Parish, Louisiana has been completed. This project was completed by the United States pursuant to the 4<sup>th</sup> Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (PL 109-234, Title II, Chapter 3, Construction, and Flood Control and Coastal Emergencies) and the 6<sup>th</sup> Emergency Supplemental Appropriations Act (PL 110-252, Title II).

A final inspection of project was conducted on March 8, 2016, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed interim Volume 2 Supplemental OMRR&R manual regarding Armoring. Volume 3 manuals for levee reaches that receive armoring will be revised to include armoring contract specific information. Please see enclosed the following items:

- a. Redline As-built contract drawings – Enclosure 1
- b. Final inspection attendance roster – Enclosure 2
- c. Interim Volume 2 Supplemental OMRR&R Manual for Armoring – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the East Jefferson Levee District (EJLD), the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Charles Parish. Dear Mr. Bradberry:

You are hereby informed that the following contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), LPV-ARM-01 LPV System Armoring – Reaches 5.2A and 5.2B (W912P8-14-R-0013, Task Order 0001), in St. Charles Parish, Louisiana has been completed. This project was completed by the United States pursuant to the 4<sup>th</sup> Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (PL 109-234, Title II, Chapter 3, Construction, and Flood Control and Coastal Emergencies) and the 6<sup>th</sup> Emergency Supplemental Appropriations Act (PL 110-252, Title II).

A final inspection of the project was conducted on June 29, 2016, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed Volume 2 Supplemental OMRR&R manual regarding Armoring. Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings – Enclosure 1
- b. Final inspection attendance roster – Enclosure 2
- c. Volume 2 Supplemental OMRR&R for Armoring – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Pontchartrain Levee District (PLD), the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Charles Parish. Dear Mr. Bradberry:

You are hereby informed that the contracts for the Lake Pontchartrain and Vicinity (LPV) Project, LPV Mitigation, Manchac Wildlife Management Area Shoreline Protection Modification and Marsh Creation, LPV-EVM-02 (W912P8-12-C-0016), and Manchac Wildlife Management Area Marsh Creation, LPV-EVM-02a (W912P8-15-C-0021), in St. John the Baptist Parish, Louisiana, have been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

The final inspection of the project was conducted on August 19, 2016. All contract work was performed in accordance with the approved plans and specifications. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Volume 3 of the OMRR&R manual which provides OMRR&R information associated with above referenced contract is enclosed. Please see enclosed the following items:

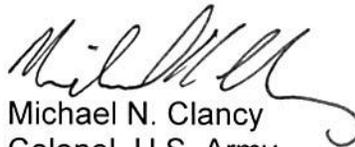

- a. Interim OMRR&R Manual, Volume 3 – Enclosure 1
- b. Red-line as-built contract drawings – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

In accordance with the LPV Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System

in St. John the Baptist Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with Section 1010 of Public Law 113-121, you may appeal this notification. The United States Army Corps of Engineers will perform monitoring of the site for the first three years following this initial construction.

If there are any questions concerning your OMRR&R responsibilities, please contact me or Mr. Mark R. Wingate, P. E., Deputy District Engineer for Programs and Project Management, at (504) 862-2204.

Sincerely,

Michael N. Clancy

Dear Mr. Bradberry:

You are hereby informed that the following contracts for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), LPV-ARM-02 Levee High Performance Turf Reinforcing Mat (HPTRM) Armoring Reaches LPV-102, LPV-103, and LPV-104 Station 0+31.78 to Station 295+30.69 (Non – Continuous) (W912P8-15-D-0001, Task Order 0001), in Orleans Parish, Louisiana has been completed. This project was completed by the United States pursuant to the 4<sup>th</sup> Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6<sup>th</sup> Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of LPV-ARM-02 was conducted on September 7, 2016, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria.

For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed Volume 2 Supplemental OMRR&R manual regarding Armoring. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contracts. Please see enclosed the following items:

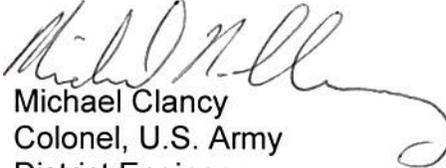

- a. Redline As-built contract drawings – Enclosure 1
- b. Final inspection attendance roster – Enclosure 2
- c. Volume 2 Supplemental OMRR&R for Armoring – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Orleans Levee District (OLD), the Coastal Protection and Restoration Authority Board (CPRAB) of Louisiana, formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, HSDRRS in Orleans Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with Section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

  
Michael Clancy

Dear Mr. Bradberry:

You are hereby informed that the following contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), LPV-ARM-08, LPV System Armoring LPV-00.2 Levee Reach, Baseline Station 707+00 to Baseline Station 825+00 (W912P8-17-F-0088), Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to the 4<sup>th</sup> Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6<sup>th</sup> Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of LPV-ARM-08 was conducted on September 25, 2018, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, and the Interim Volume 2 Supplemental OMRR&R manual for Armoring previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings – Enclosure 1

Dear Mr. Bradberry:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), LPV-EVM-08 (W912P8-15-C-0050) and LPV-EVM-08a, (W912P818C00005), in St. Tammany Parish, Louisiana, has been completed. This project was completed by the United States pursuant to the 4<sup>th</sup> Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6<sup>th</sup> Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of LPV-EVM-08 and LPV-EVM-08a was conducted on April 12, 2018, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. The Interim Volume 3 of the OMRR&R manual, which provides OMRR&R information associated with the above referenced contract, is enclosed. Additional and updated information, including monitoring requirements and success criteria, shall be provided in the Final Volume 3 OMRR&R manual to be provided at a later date. Please see enclosed the following items:

- a. Redline As-built contract drawings – Enclosure 1
- b. Final inspection attendance roster – Enclosure 2
- c. Interim OMRR&R Manual, Volume 3 – Enclosure 3

In accordance with the LPV Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System project in St. Tammany Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification. If deemed appropriate, the United States Army Corps of Engineers will ensure the specified plant survival rates are achieved through follow up planting activities. In addition, USACE will perform monitoring of the vegetation aspect of the site until initial success criteria are met.

If there are any questions concerning your OMRR&R responsibilities, please contact me or Mr. Mark R. Wingate, P. E., Deputy District Engineer for Programs and Project Management, at (504) 862-2204.

Sincerely,

  
Michael N. Clancy

Dear Mr. Bradberry:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System, LPV-103.1A3, Orleans Canal East Bank L-Wall Retrofit (W912P8-18-C-0010), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of LPV-103.1A3 was conducted on December 10, 2018, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

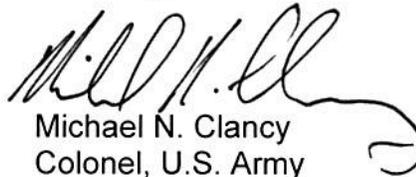

- a. Redline As-built contract drawings – Enclosure 1
- b. Final inspection attendance roster – Enclosure 2

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority (CPRA), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, and amended on March 12, 2010, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with Section 1010 of Public Law 113-121, you may appeal this notification.

Dear Mr. Kline:

You are hereby informed that the following contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), LPV-ARM-07, LPV System Armoring, LPV-19.2 Jefferson Parish Lakefront Levee Reach 4 and LPV-20.1 Jefferson Parish Lakefront Levee Reach 5, Baseline Station 1056+26 to Baseline Station 1241+45 (W912P8-15-D-0001, W912P817F0103), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6<sup>th</sup> Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of LPV-ARM-07 was conducted on June 25, 2019, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed Interim Volume 2 Supplemental OMRR&R manual regarding Armoring. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings – Enclosure 1
- b. Final inspection attendance roster – Enclosure 2
- c. Interim Volume 2 Supplemental OMRR&R for Armoring – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority - East (SLFPA-E), Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

Dear Mr. Kline:

You are hereby informed that the following contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), LPV-ARM-10, LPV System Armoring, LPV-01.1 and LPV 02.2 Levee Reach, Baseline Station 836+00 to Baseline Station 916+80.67, and Baseline Station 927+00 to Baseline Station 1052+00 (W912P817F0083), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6<sup>th</sup> Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of LPV-ARM-10 was conducted on July 31, 2019, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1, Volume 2, and Interim Volume 2 Supplemental OMRR&R for Armoring previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings – Enclosure 1
- b. Final inspection attendance roster – Enclosure 2

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority - East (SLFPA-E), Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works or Ms. Karen Clement, Assistant Operations Manager, Completed Works at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

A handwritten signature in black ink, appearing to read 'SFM', with a long horizontal line extending to the right.

Dear Mr. Kline:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), LPV-EVM-10a, (W912P819R0004), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law (PL) 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6th Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of LPV-EVM-10a was conducted on August 13, 2019, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the Operation, Maintenance, Repair, Replacement, and Rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. The Interim Volume 3 of the OMRR&R manual, which provides OMRR&R information associated with the above referenced contract, is enclosed. Additional and updated information, including monitoring requirements and success criteria, shall be provided in the Final Volume 3 OMRR&R manual, to be provided at a later date. Please see enclosed the following items:

- a. Redline As-built contract drawings (Enclosure 1)
- b. Final inspection attendance roster (Enclosure 2)
- c. Interim OMRR&R Manual, Volume 3 (Enclosure 3)

In accordance with the LPV Project Partnership Agreement between the Department of the Army and the Coastal Protection and Restoration Authority (CPRA, now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the LPV, HSDRRS project in Orleans Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification. If deemed appropriate, the United States Army Corps of Engineers (USACE) will ensure the specified plant survival rates are achieved through follow up planting activities. In addition, USACE will perform monitoring of the vegetation aspect of the site until initial success criteria are met.

If there are any questions concerning your OMRR&R responsibilities, please contact Mr. Mark R. Wingate, P. E., Deputy District Engineer for Programs and Project Management, at (504) 862-2204.

Sincerely,

A handwritten signature in black ink, appearing to read 'S. F. Murphy', with a large, sweeping flourish extending to the right.

Stephen F. Murphy  
Colonel, U.S. Army

Dear Mr. Kline:

You are hereby informed that the following contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), LPV-ARM-04, LPV System Armoring, LPV-108 and LPV 109.02a Reach 1, Baseline Station 335+30 to Baseline Station 721+98, in Orleans Parish, LA (W912P8-15-D-0001 Task Order 0002) has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 5<sup>th</sup> Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of LPV-ARM-04 was conducted on October 16, 2019, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement and rehabilitation (OMRR&R) manual, Volume 1, Volume 2, and Interim Volume 2 Supplemental OMRR&R for Armoring previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

Dear Mr. Kline:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), LPV-EVM-11a, (W912P8190012), in St. Tammany Parish, Louisiana, has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 Public Law (PL) 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6th Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of LPV-EVM-11a was conducted on April 8, 2020, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the Operation, Maintenance, Repair, Replacement, and Rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. The Interim Volume 3 of the OMRR&R manual, which provides OMRR&R information associated with the above referenced contract, is enclosed. Additional and updated information, including monitoring requirements and success criteria, shall be provided in the Final Volume 3 OMRR&R manual, to be provided at a later date. Please see enclosed the following items:

- a. Redline As-built contract drawings (Enclosure 1)
- b. Final inspection attendance roster (Enclosure 2)
- c. Interim OMRR&R Manual, Volume 3 (Enclosure 3)

In accordance with the LPV Project Partnership Agreement between the Department of the Army and the Coastal Protection and Restoration Authority (CPRA, now known as CPRAB) dated September 22, 2008, as amended by Amendment No.1 dated March 12, 2010, CPRAB shall undertake the OMRR&R of this completed project feature of the LPV, HSDRRS project in St. Tammany Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification. Baton Rouge, Louisiana 70802

Dear Mr. Kline:

You are hereby informed that the contract for the Orleans East Bank (OEB), Hurricane and Storm Damage Risk Reduction System (HSDRRS), OEB-19, Demolition of Interim Closure Structures (ICS) (W912P8-19-C-0001), in Orleans Parish and Jefferson Parish, Louisiana, has been completed. This contract was completed by the United States pursuant to the Flood Control and Coastal Emergency Act (Public Law 84-99) and the 4<sup>th</sup> Emergency Supplemental Appropriations Act for Defense, The Global War on Terror, and Hurricane Recovery, 2006, (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies).

A final inspection for OEB-19 was conducted on August 19, 2020. All contract work was performed in accordance with approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the Operation, Maintenance, Repair, Replacement, and Rehabilitation (OMRR&R) manual, Volumes 1, 2, and 3 previously provided to you. Please note, Volume 3 of the OMRR&R manual will be updated in the near future which will provide the final OMRR&R information associated with the above referenced contract. Please see enclosed the following items:

- a. Redline as-built contract drawings – Available on Outward Facing ProjectWise and for electronic transmission upon request.
- b. Notification of Contract Completion (NCC) survey data – Enclosure 1
- c. Final Inspection attendance roster – Enclosure 2

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives from the Southeast Louisiana Flood Protection

Authority-East on behalf of Orleans Levee District, Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall and levees. The survey data reflects the elevations of these features are within the tolerance of the elevations required by the construction plans.

In accordance with Revision 1 to the Cooperation Agreement between the Department of Army and Orleans Levee District (OLD) January 27, 2006, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, OLD and CPRAB shall undertake the OMRR&R of this completed project feature of the Orleans East Bank (OEB), Hurricane and Storm Damage Risk Reduction System in Orleans Parish.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Stephen F. Murphy

Baton Rouge, LA 70802

Dear Mr. Kline:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), LPV-ARM-05, LPV System Armoring, LPV-109.02a Levee Reach, Baseline Station 725+00 to Baseline Station 10585+00, Orleans Parish, LA (W912P8187F0235) has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6<sup>th</sup> Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of the project was conducted on October 19, 2020 and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1, Volume 2, and interim Volume 2 Supplemental OMRR&R manual for Armoring, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings – Enclosure 1
- b. Final inspection attendance roster – Enclosure 2

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration

Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

A handwritten signature in black ink, appearing to read 'S. Murphy', with a long horizontal stroke extending to the right.

Stephen F. Murphy  
Colonel, U.S. Army  
District Engineer

Dear Mr. Kline:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), LPV-ARM-09, LPV System Armoring, LPV-111.01 Levee Reach, Baseline Station 1061+30 to Baseline Station 1341+70, Orleans Parish, LA (W912P8187F0235) has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6<sup>th</sup> Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of LPV-ARM-09 was conducted on January 14, 2022, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1, Volume 2, and Interim Volume 2 Supplemental OMRR&R for Armoring previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

Baton Rouge, Louisiana 70802

Dear Mr. Kline:

You are hereby informed that the contract for the Lake Pontchartrain and Vicinity (LPV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), Gage Hardening Project, Jefferson, Orleans, St. Bernard, St. Charles, and St. Tammany Parishes, Louisiana, has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6<sup>th</sup> Emergency Supplemental Appropriations Act (PL 110-252, Title III).

Final inspections for the seven (7) hardened LPV gages was conducted between January 31, 2022 and February 10, 2022, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1, Volume 2, and Interim Volume 2 Supplemental OMRR&R for Armoring previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings and Operational Manuals – Enclosure 1
- b. Final inspection attendance roster – Enclosure 2

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Orleans, St. Bernard, St. Charles, and St. Tammany Parishes, Louisiana. Baton Rouge, LA 70802

Dear Mr. Kline:

The United States Army Corps of Engineers (USACE) is pleased to inform you that the period of construction for the Lake Pontchartrain and Vicinity (LPV) Project was completed on March 3, 2022 (LPV Gage Hardening notice of completion date), pursuant to Water Resources Development Acts and Hurricanes Katrina and Rita Supplemental Appropriations. We would like to thank the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), the Southeast Louisiana Flood Protection Authority-East, the Pontchartrain Levee District, and associated Parish Governments for their years of support and partnership in the undertaking of such a momentous and significant project.

Following Hurricanes Katrina and Rita in 2005, the USACE was authorized and funded to design and construct the Hurricane and Storm Damage Risk Reduction System (HSDRRS) for southeast Louisiana. This letter signifies that the collaborative efforts, shared responsibilities, and commitments between all HSDRRS partners have finally culminated in the successful achievement of this milestone. As a result of this herculean effort and massive investment in public safety, the completed LPV Project provides risk reduction from a storm surge that has a one percent chance of occurring or being exceeded in any given year, thereby making the system stronger and more resilient than ever.

The LPV project constructed or made improvements to approximately 127 miles of levees, floodwalls, floodgates, water control structures, and other hurricane and storm damage risk reduction features and appurtenances. Of these 127 miles, approximately 83 miles consist of primary perimeter risk reduction features and 44 miles of detention basin risk reduction features along the Inner Harbor Navigation Canal, the Gulf Intracoastal Waterway, and outfall canals.

Joint agency final inspections were conducted for individual contracts and project features, and all work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the LPV Operation, Maintenance, Repair, Replacement, and Rehabilitation (OMRR&R) Manual, Volume 1 and Volume 2, and Volume 3's previously provided to you. Remaining OMRR&R Manual Volume 3's that have not been completed will be provided in the near future.

In accordance with the Project Partnership Agreement between the Department of the Army and the Coastal Protection and Restoration Authority of Louisiana, now known as the CPRAB, dated September 22, 2008, and as amended March 12, 2010, CPRAB shall undertake the OMRR&R of the completed entire Lake Pontchartrain and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Charles, Jefferson, Orleans, and St. Bernard parishes. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

Thank you again for your partnership and the hard work that helped to make this significant achievement possible.

If you have any questions concerning this correspondence, please contact Mr. Mark R. Wingate, P.E., Deputy District Engineer for Programs and Project Management, at [Mark.R.Wingate@usace.army.mil](mailto:Mark.R.Wingate@usace.army.mil) or (504) 862-2204.

Sincerely,

Stephen F. Murphy
