REPLY TO ATTENTION OF

Operations Division
Operations Manager, Completed Works

Ms. Susan Maclay President Southeast Louisiana Flood Protection Authority – West Bank 7001 River Road Marrero, Louisiana 70072

Dear Ms. Maclay:

You are hereby informed that the contract (07-C-0077) for the Westbank and Vicinity Hurricane Protection Project, WBV-63b.1 Westminster Pump Station Phase I Interim Floodwall Reinforcement, in Jefferson Parish, Louisiana, has been completed by the United States pursuant to Public Law 109-148, Department of Defense, Emergency Supplemental Appropriations Act to Address Hurricanes in the Gulf of Mexico and Pandemic Influenza, 2006.

A joint agency final inspection of the project was conducted on March 5, 2009, and all contract work was found to be satisfactorily complete. Please see the enclosed final inspection attendance roster. The as-built contract drawings were provided to the West Jefferson Levee District and the Coastal Protection and Restoration Authority of Louisiana at the final inspection. Please refer to the Levee Owners Manual at www.iwr.usace.army.mil/nfrmp/guidance.cfm as the interim operation and maintenance manual for this project feature. In accordance with the following Project Agreements, the West Jefferson Levee District (WJLD) and the Coastal Protection and Restoration Authority of Louisiana (CPRA) shall undertake the operation and maintenance, repair, rehabilitation, and replacement (OMRR&R) of this completed project feature of the Westbank and Vicinity, New Orleans, Louisiana, Hurricane Protection Project in Jefferson Parish:

- a. Cooperation Agreement between Department of the Army and Louisiana Department of Transportation and Development and WJLD executed April 2, 2007.
- b. Project Partnership Agreement between Department of the Army and CPRA of LA dated November 6, 2008, respectively.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

I am forwarding this letter to Mr. Garret Graves, Chairman, Coastal Protection and Restoration Authority of Louisiana, 1501 North 3rd Street, Capitol Annex Building, Baton Rouge, Louisiana 70802 and Mr. William Ankner, Ph.D, Secretary, Louisiana Department of Transportation and Development, Post Office Box 94245, Baton Rouge, Louisiana 70804-9245.

If there are any questions concerning your OMRR&R responsibilities, please call Amy Powell or Karen Oberlies at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Alvin B. Lee

Colonel, US Army District Commander

Operations Division
Operations Manager, Completed Works

Mr. Garret Graves
Chairman
Coastal Protection and Restoration Authority of Louisiana
1501 North 3rd Street
Capitol Annex Building
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity, New Orleans, Louisiana Hurricane Protection Project West of Algiers Canal, WBV-46.2, Cousins Canal Walls, Destrehan Bridge to Sector Gate, Jefferson Parish, LA, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on November 3, 2011, and all contract work was performed in accordance with the approved plans and specifications. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Interim operation, maintenance, repair, replacement and rehabilitation (OMRR&R) manual disc with pdf Enclosure 2
 - c. Notification of Contract Completion (NCC) survey data Enclosure 3
 - d. Final inspection attendance roster Enclosure 4

The punch list items identified during the pre-final inspection have been corrected and inspected by your maintenance supervisor and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and the Coastal Protection and Restoration Authority (CPRA) dated November 8, 2008, the CPRA shall undertake the operation and maintenance, repair, replacement, and rehabilitation (OMRR&R) of this completed project feature of the Lake Pontchartrain and Vicinity, Hurricane Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Oberlies, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Edward R. Fleming

Operations Division
Operations Manager, Completed Works

Mr. Garret Graves
Chairman
Coastal Protection and Restoration Authority of Louisiana
1501 North 3rd Street
Capitol Annex Building
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane Storm Damage Risk Reduction System, WBV-44, Whitney Barataria Pump Station Floodwall Modification Project (W912P8-09-D-0048, Task Order 0005), in Plaquemines Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Department of Defense, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on October 19, 2011, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Red-lined As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority of Louisiana and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. This project, WBV-44, was designed to a higher elevation of 9.5 feet while the West Closure Complex (WCC) retention grades were being formulated, and it is above the required retention design grade of elevation 8.5 feet.

In accordance with the Project Partnership Agreement between the Department of the Army and the Coastal Protection and Restoration Authority (CPRA) dated November 6, 2008, the CPRA shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane Storm Damage Risk Reduction System in Plaquemines Parish. This pump station provides interior drainage for Jefferson Parish but it is physically located in Plaquemines Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Oberlies, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely.

Operations Division
Operations Manager, Completed Works

Mr. Garret Graves
Chairman
Coastal Protection and Restoration Authority Board of Louisiana
1501 North 3rd Street
Capitol Annex Building
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-14b.2, Orleans Village to Louisiana Highway 45 Levee - Phase 2, First Lift (W912P8-09-D-0045, Task Order 0003), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234 Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on June 21, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction in 2011. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely

Capitol Annex Building
Baton Rouge, Louisiana 70802

Dear Ms. Maclay and Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-2a, US Minerals to Boomtown Casino East of Harvey Canal Floodwall (W912P8-07-D-0004, Task Order 0004), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

A final inspection of the project was conducted on June 28, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority — West, the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgates/floodwall. The survey data reflects the elevations of the floodgates/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Local Cooperation Agreement Amendment Number 2 between the Department of the Army and the Louisiana Department of Transportation and Development and the West Jefferson Levee District dated April 2, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, West Jefferson Levee District and CPRAB, respectively, shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-21, Old Westwego Pump Station Fronting Protection and Modifications Project (W912P8-09-D-0051, Task Order 0004), in Jefferson Parish, LA, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Department of Defense, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery, 2006.

A final inspection of the project was conducted on July 26, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of floodwall. This project, WBV-21, was designed to an elevation of 4.0 feet, although the survey data is below the design grade the elevations are above the acceptable grade of +3.80, meeting the Hurricane and Storm Damage Risk Reduction System criteria.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Colonel, US Army District Engineer

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-14E.2A, V-Line Levee, East of Vertex – Phase 2 (W912P8-09-D-0046, Task Order 0010), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234 Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on September 20, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction in 2012. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Operations Division Operations Manager, Completed Works

Mr. Garret Graves
Chairman
Coastal Protection and Restoration Authority
Board of Louisiana
1501 North 3rd Street
Capitol Annex Building
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-22, Westwego Floodwall (W912P8-10-C-0002), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on October 31, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Edward R. Fleming Colonel, US Army

District Engineer

Operations Division
Operations Manager, Completed Works

Mr. Garret Graves
Chairman
Coastal Protection and Restoration Authority
Board of Louisiana
1501 North 3rd Street
Capitol Annex Building
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV) - Mississippi River Levee (MRL), Hurricane and Storm Damage Risk Reduction System, WBV-MRL 7.1, West Crossover Point to Parish Line Levee (W912P8-08-D-0049, Task Order 0007), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006, and the Flood Control Act of 1928 (and its subsequent amendments) and the Water Resource Development Act of 1986.

A final inspection of the project was conducted on July 19, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

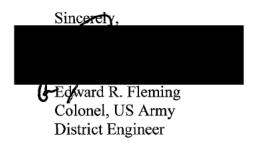

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction in 2012. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-72, Western Tie-In East-West Levee (W912P8-10-C-0062) in St. Charles Parish, Louisiana, has been completed. This project was completed pursuant to Public Law 109-234 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title II) and Public Law 110-252 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title III).

A final inspection of the project was conducted on November 1, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Additionally, Volume 3 documentation for WBV-72, included with this letter, will provide specific information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3
- d. Volume 3 documentation for WBV-72 Enclosure 4

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of

Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction in 2012. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves.

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-18.2, Lake Cataouatche Levee - Hwy 90 to Lake Cataouatche Pump Station - Phase 2 (W912P8-09-C-0105) in Jefferson Parish, Louisiana, has been completed. This project was completed pursuant to Public Law 109-234 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title II) and Public Law 110-252 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title III).

A final inspection of the project was conducted on December 13, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Additionally, Volume 3 documentation for WBV-18.2, included with this letter, will provide specific information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3
- d. Volume 3 documentation for WBV-18.2 Enclosure 4

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of

Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction in 2013. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves.

Operations Division
Operations Manager, Completed Works

Mr. Garret Graves
Chairman
Coastal Protection and Restoration Authority
Board of Louisiana
1501 North 3rd Street
Capitol Annex Building
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-16b, Segnette Pump Station Fronting Protection and Modifications (W912P8-10-C-0040), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on April 10, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen Colonel, US Army District Engineer

Mr. Garret Graves
Chairman
Coastal Protection and Restoration Authority
Board of Louisiana
1501 North 3rd Street
Capitol Annex Building
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, Lake Cataouatche Levee Enlargement, WBV-15a.2a, Phase 2, First Lift, Lake Cataouatche Pump Station to Segnette State Park (W912P8-10-D-0012) in Jefferson Parish, Louisiana, has been completed. This project was completed pursuant to Public Law 109-234 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title II) and Public Law 110-252 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title III).

A final inspection of the project was conducted on December 19, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Additionally, Volume 3 documentation for WBV-15a.2a, included with this letter, will provide specific information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3
- d. Volume 3 documentation for WBV-15a.2a Enclosure 4

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of

Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained December 5, 2012. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen Colonel, US Army

Mr. Garret Graves
Chairman
Coastal Protection and Restoration Authority
Board of Louisiana
1501 North 3rd Street
Capitol Annex Building
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-77, Western Tie-In, Louisiana Highway 18 and Union Pacific Railroad Gate (W912P8-11-C-0051), in St. Charles Parish, Louisiana, has been completed. This project was completed pursuant to Public Law 109-234 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title II) and Public Law 110-252 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title III)."

A final inspection of the project was conducted on January 23, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Additionally, interim Volume 3 documentation for WBV-77, included with this letter, will provide specific information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3
- d. Interim Volume 3 of the OMRR&R manual Enclosure 4

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of

Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained on January 28, 2013. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The data also represents a centerline profile of the floodwall/floodgate. The survey data reflects the elevations of the floodwall/floodgate are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Charles Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-09a, Louisiana Project contract for East of Algiers Canal, Hero to Oakville, Phase II First Lift Levee Enlargement and Pumping Station (W912P8-10-C-0089), in Plaquemines Parish, Louisiana, has been completed. This project was completed pursuant to Public Law 109-234 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title II) and Public Law 110-252 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title III).

A final inspection of the project was conducted on June 27, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim Operation, Maintenance, Repair, Replacement, and Rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Additionally, Volume 3 OMRR&R documentation, the Master Water Control Plan for Eastern Tie-In Structures, Plaquemines Parish, Louisiana, and the Original Equipment Manufacturer Data included with this letter, will provide specific information associated with above referenced contract. Final OMRR&R information associated with above referenced contract will be provided in the near future. Please see enclosed for the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3
- d. Volume 3 OMRR&R documentation for WBV-09a Enclosure 4

- e. Master Water Control Plan For Eastern Tie-In Structures Enclosure 5
- f. Programmable Logic Controller Password Enclosure 6
- g. Original Equipment Manufacturer Data Enclosure 7

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction in 2013. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

Dear Mr. Graves:

You are hereby informed that the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-09b, Louisiana Project contract for Hero Canal to Oakville - Structures, (W912P8-10-C-0077) in Plaquemines Parish, Louisiana, has been completed. This project was completed pursuant to Public Law 109-234 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title II) and Public Law 110-252 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title III).

A final inspection of the project was conducted on December 20, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. A post-final inspection was also performed on March 27, 2013, to allow those who did not attend the final inspection to inspect the project. For operations and maintenance guidance, refer to the interim Operation, Maintenance, Repair, Replacement, and Rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Additionally, Volume 3 documentation and the Master Water Control Plan for Eastern Tie-In Structures, in Plaquemines Parish, Louisiana, included with this letter, will provide specific information associated with above referenced contract. Final OMRR&R information associated with above referenced contract. Final OMRR&R information associated with above referenced contract. Please see enclosed for the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection and post-final inspection attendance roster Enclosures 3 and 3B
- d. Volume 3 OMRR&R documentation for WBV-09b Enclosure 4
- e. Master Water Control Plan For Eastern Tie-In Structures Enclosure 5

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans. The data represents a top of wall survey completed after construction was complete.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-14I, V-Line Levee, Louisiana Highway 3134 Highway Crossing (W912P8-10-C-0056), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234 Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on November 14, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained on February 27, 2013. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The data also represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen Colonel, US Army

Mr. Garret Graves
Chairman
Coastal Protection and Restoration Authority
Board of Louisiana
1501 North 3rd Street
Capitol Annex Building
Baton Rouge, Louisiana 70802

Dear Ms. Maclay and Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-11, Belle Chasse No. 2 Pump Station Fronting Protection and Modifications (W912P8-11-C-0006), in Plaquemines Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

A final inspection of the project was conducted on July 11, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note,

Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Final As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority – West, the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans, and it is above the required retention design grade of elevation 8.2 feet.

In accordance with the Local Cooperation Agreement Amendment Number 2 between the Department of the Army and the Louisiana Department of Transportation and Development and the West Jefferson Levee District dated April 2, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, the West Jefferson Levee District and CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen Colonel, U.S. Army District Engineer

Dear Mr. Graves:

You are hereby informed that the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-09c, Louisiana Project contract for Hero to Oakville, Highway 23 Crossing (W912P8-10-C-0095) in Plaquemines Parish, Louisiana, has been completed. This project was completed pursuant to Public Law 109-234 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title II) and Public Law 110-252 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title III).

A final inspection of the project was conducted on August 2, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Additionally, Volume 3 documentation, included with this letter, will provide specific information associated with above referenced contract. Final OMRR&R information associated with above referenced contract will be provided in the near future. Please see enclosed for the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosures 3
- d. Volume 3 Interim OMRR&R documentation for WBV-09c Enclosure 4

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans. The data represents a top of wall survey completed after construction was complete.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-24, Segnette State Park Floodwall (W912P8-10-C-0026), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on March 28, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are acceptable as constructed.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Dear Ms. Maclay and Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-13, New Orleans Sewerage and Water Board #11 Pump Station, Fronting Protection and Modifications (W912P8-09-C-0117), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

A final inspection of the project was conducted on August 27, 2013 and a follow-up inspection on November 7, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual

will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Final As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final and follow-up inspection attendance rosters Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority – West, the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans, and it is above the required retention design grade of elevation 8.2 feet.

In accordance with the Local Cooperation Agreement Amendment Number 2 between the Department of the Army and the Louisiana Department of Transportation and Development and the West Jefferson Levee District dated April 2, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, the West Jefferson Levee District and CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen Colonel, U.S. Army

Operations Division
Operations Manager, Completed Works

Mr. Garret Graves
Chairman
Coastal Protection and Restoration Authority
Board of Louisiana
1501 North 3rd Street
Capitol Annex Building
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WPV), Hurricane and Storm Damage Risk Reduction System, WBV-16.2, Bayou Segnette Complex (W912P8-10-C-0046), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on November 19, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Additionally, interim Volume 3 documentation and the Water Control Manual for WBV 16.2, included with this letter, will provide specific information associated with above referenced contract. Final OMRR&R information associated with above referenced contract will be provided in the near future. Please see enclosed for the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3
- d. Interim Volume 3 of the OMRR&R manual Enclosure 4
- e. Water Control Manual for WBV-16.2 Enclosure 5

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The data also represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System, in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen Colonel, U.S. Army

District Engineer

Coastal Protection and Restoration Authority
Board of Louisiana
1501 North 3rd Street
Capitol Annex Building
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-15b.2, Lake Cataouatche Pump Stations Number 1 and Number 2 Fronting Protection, (W912P8-08-D-0038) in Jefferson Parish, Louisiana, has been completed. This project was completed pursuant to Public Law 109-234 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title II) and Public Law 110-252 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title III).

A final inspection of the project was conducted on December 10, 2013, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are acceptable as constructed.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen Colonel, U.S. Army

Mr. Giuseppe R. Miserendino Regional Director Southeast Louisiana Flood Protection Authority – West Algiers Levee District 7001 River Road Marrero, Louisiana 70072

Dear Mr. Miserendino:

You are hereby informed that the contract for the West Bank & Vicinity, Mississippi River Levee, Mississippi River and Tributaries Project (MRL Algiers Levee District, Algiers Seepage Control [Phase I] B/L Sta. 247+00 to B/L Sta. 269+00, Orleans Parish, Louisiana, Contract # MATOC, Solicitation # OWR051-12-S-0002) has been completed. This project was completed by the United States pursuant to the Flood Control Act of 1928 which Congress approved on May 15, 1928, in response to the flood of 1927.

A final inspection of the project was conducted on July 23, 2013, and all contract work was performed in accordance with the approved plans and specifications. Please see enclosed the following items:

- a. Notice of Construction Completion Package (Compact disc containing the following pdf files: Assurance Agreements; Levee Operation, Maintenance, Repair, Replacement, and Rehabilitation (OMRR&R) Manual; and Plan & Profile Drawings) Enclosure 1
 - b. As-built contract drawings Enclosure 2
 - c. Final inspection attendance roster Enclosure 3

The Southeast Louisiana Flood Protection Authority – West, by and through the Algiers Levee District, shall continue performing the operations and normal maintenance of the Mississippi River and Tributaries Project, Mississippi River Levee, in Orleans Parish, from Station 00+00 to Station 745+25, including this completed project feature (Phase 1, Algiers Seepage Control), in accordance with the terms of the Assurance Agreements, the OMRR&R Manual, copies of which are included in the attached NCC package, and all applicable laws, rules, and regulations. Maintenance normally includes such matters as cutting grass, removal of weeds, local drainage and minor repairs of main river levees, as well as the maintenance of all flood control structures, except controlling and regulating spillways, including special relief levees.

If there are any questions concerning your Mississippi River Levee OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen Colonel, U.S. Army District Engineer

Baton Rouge, Louisiana 70802

Dear Ms. Maclay and Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-08, New Orleans Sewerage and Water Board #13 Pump Station, Fronting Protection and Modifications (W912P8-09-C-0115), in Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

A final inspection of the project was conducted on January 23, 2014, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you.

Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Enclosure 4 includes selected O&M practices and manufacturing data for use until the final Volume 3 of the OMRR&R manual is available. Please see enclosed the following items:

- a. Final As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3
- d. Selected O&M practices and manufacturing data Enclosure 4

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority – West, the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans, and it is above the required retention design grade of elevation 8.5 feet.

In accordance with the Local Cooperation Agreement Amendment Number 2 between the Department of the Army and the Louisiana Department of Transportation and Development and the West Jefferson Levee District dated April 2, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, the West Jefferson Levee District and CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen Colonel, U.S. Army District Engineer

Dear Mr. Zeringue:

You are hereby informed that the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-90, Gulf Intracoastal Waterway (GIWW) West Closure Complex (W912P8-09-C-0041), in Jefferson and Plaquemines Parishes, Louisiana, has been completed. This project was completed pursuant to Public Law 109-234 (4th Supplemental) and Public Law 110-252 (6th Supplemental).

A final inspection of the project was conducted on February 24 and 25, 2014, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2 previously provided to you. Additionally, interim Volume 3 OMRR&R documentation and the Water Control Manual for the West Closure Complex, in Jefferson and Plaquemines Parishes, Louisiana, included with this letter, will provide specific information associated with above referenced contract. Final OMRR&R information associated with above referenced contract will be provided in the near future. Please see enclosed for the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data (top of wall and levee)
 Enclosure 2
- c. Final inspection attendance roster Enclosure 3
- d. Interim Volume 3 OMRR&R documentation Enclosure 4
- e. Water Control Manual for WBV-90 Enclosure 5

The punchlist items identified during the pre-final and final inspections have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority – West (SLFPA-W), the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as the Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, Algiers Canal, Belle Chasse Highway to Hero Cutoff, WBV-5.2 (W912P8-08-D-0047, TO-0009), in Plaquemines Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

A final inspection of the project was conducted on June 6, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Final As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2

c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority – West (SLFPA-W), the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans and is above the required retention design grade of elevation 8.5 feet.

In accordance with the Local Cooperation Agreement between the Department of the Army and West Jefferson Levee District (WJLD) for Construction of the West Bank Hurricane Protection Project (Westwego to Harvey Canal) in Jefferson Parish, Louisiana dated December 18, 1990, Amendment Number 1 thereto between the Department of the Army and the Louisiana Department of Transportation and Development (LaDOTD) and WJLD dated April 26, 1999, Amendment Number 2 thereto between the Department of the Army and the LaDOTD and the WJLD dated April 2, 2007, the Memorandum of Agreement Between the Louisiana Department of Transportation and Development and the Department of the Army through the U.S. Army Corps of Engineers dated May 16, 1995, the Grant of Particular use for West Bank and Vicinity of New Orleans, Louisiana, Hurricane Protection Project dated August 30, 2000, certain Authorizations For and Right of Entry for Access, Construction, Operation, Maintenance, Repair, Rehabilitation, and Replacement by LaDOTD, WJLD, and/or SLFPA-W, Cooperation Agreement Between the USA, LaDOTD, and WJLD for Rehabilitation of a Federal Hurricane/Shore Protection Project dated April 2, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, WJLD and CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen Colonel, U.S. Army District Engineer

Dear Ms. Maclay and Mr. Zeringue:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-12, Hero Canal Reach 1, 2nd Enlargement (W912P8-09-C-0041), in Plaquemines Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

A final inspection of the project was conducted on February 25, 2014, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2

c. Final Inspection attendance sheet – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority – West, the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained on January 16, 2014. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction.

In accordance with the Local Cooperation Agreement Amendment Number 2 between the Department of the Army and the Louisiana Department of Transportation and Development and the West Jefferson Levee District dated April 2, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, the West Jefferson Levee District and CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Dear Mr. Zeringue:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-9a.1, Hero to Oakville, Emergency Shelter (W912P8-11-D-0012), in Plaquemines Parish, Louisiana, has been completed. This project was completed pursuant to Public Law 109-234 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title II) and Public Law 110-252 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title III).

A final inspection of the project was conducted on April 15, 2014, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. The Interim Volume 3 of the OMRR&R manual for WBV-9a has been updated to include WBV-9a.1 and is enclosed. Final OMRR&R information associated with above referenced contract will be provided in the near future. Please see enclosed for the following items:

- a. Redline as-built contract drawings Enclosure 1
- b. Interim Volume 3 of the OMRR&R manual Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish. Dear Ms. Maclay and Mr. Zeringue:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-10, Belle Chasse No. 1 Pump Station Fronting Protection and Modifications (W912P8-09-C-0116), in Plaquemines Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

A final inspection of the project was conducted on May 15, 2014, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2

c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority – West, the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans, and it is above the required retention design grade of elevation 8.5 feet.

In accordance with the Local Cooperation Agreement Amendment Number 2 between the Department of the Army and the Louisiana Department of Transportation and Development and the West Jefferson Levee District dated April 2, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, the West Jefferson Levee District and CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Operations Division
Operations Manager, Completed Works

Mr. Garret Graves
Chairman
Coastal Protection and Restoration Authority
Board of Louisiana
1501 North 3rd Street
Capitol Annex Building
Baton Rouge, Louisiana 70802

Dear Mr. Graves:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-74, Western Tie-In Closure Structure (W912P8-10-C-0076) in St. Charles Parish, Louisiana, has been completed. This project was completed pursuant to Public Law 109-234 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title II) and Public Law 110-252 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title III)."

A final inspection of the project was conducted on October 11, 2012, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Additionally, interim Volume 3 OMRR&R documentation, and the Standing Instructions for Western Tie-in Structure, included with this letter, will provide specific information associated with above referenced contract. Final OMRR&R information associated with above referenced contract will be provided in the near future. Please see enclosed for the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3
- d. Interim Volume 3 of the OMRR&R manual Enclosure 4

e. Standing Instructions for Water Control, WBV-74 - Enclosure 5

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained on October 25, 2012. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves. The data also represents a centerline profile of the floodwall/floodgate. The survey data reflects the elevations of the floodwall/floodgate are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Charles Parish.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen Colonel, U.S. Army

- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration

Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The data also represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Local Cooperation Agreement Amendment Number 2 between the Department of the Army and the LA Department of Transportation and the West Jefferson Levee District (SLFPA-W) dated April 2, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson and Plaquemines Parishes.

In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen Colonel, U.S. Army

District Engineer

Dear Mr. Zeringue:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-03a, Hero Pump Station to Algiers Canal Floodwall (W912P8-08-C-0070), in Jefferson and Plaquemines Parishes, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006; Public Law 110-28, U.S. Troop Readiness, Veterans' Care, Katrina Recovery, and Iraq Accountability Appropriations Act, 2007; and Public Law 110-252, Title III, Chapter 3.

A final inspection of the project was conducted on September 11, 2014, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline as-built contract drawings Enclosure 1
- b. Notification of Contract Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. Dear Mr. Zeringue:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-14c.2 and WBV-14c.2a, New Westwego Pumping Station to Orleans Village Phase 2, First Lift Levee and Floodwalls at Westminster Pumping Station (W912P8-09-D-0046, Task Order 0008), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234 Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

This Notification of Construction Completion (NCC) includes all levee and berm work completed under WBV-14c.2 and WBV-14c.2a contracts. Monoliths constructed under WBV-14c.2 contract are currently being reviewed for possible remedial action and are not included in this NCC.

A final inspection of the project was conducted on September 25, 2014, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Construction Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The amount of settlement and subsidence that has occurred since the time of construction is within allowable tolerances based on site specific settlement curves.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Dear Mr. Zeringue:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-74a, Emergency Shelter with Control House (W912P8-11-D-0005, Task Order 0005), in St. Charles Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title II) and Public Law 110-252 (under the Flood Control and Coastal Emergencies heading, Chapter 3, Title III).

A final inspection of the project was conducted on November 6, 2014, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and 2, previously provided to you. Additionally, Interim Volume 3 documentation for WBV-74a, included with this letter, will provide specific information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Final inspection attendance roster Enclosure 2
- c. Interim Volume 3 of the OMRR&R manual Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Charles Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

Dear Mr. Zeringue:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, Lake Cataouatche Enlargement, WBV-17b.2, Phase 2, Hwy 90 to Lake Cataouatche Pumping Station Levee, Station 125+00 to 160+00 (W912P8-09-D-0043) in Jefferson Parish, Louisiana, via WBV-17b.2a, Phase 2, Hwy 90 to Lake Cataouatche Pumping Station Levee Lift, (W912P8-14-D-0011) in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on December 17, 2014, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Construction Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The construction completion survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence.

Dear Ms. Maclay and Mr. Kline:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, West of Algiers Canal, Belle Chasse Highway to Hero Cutoff, Reach 3 and 4, Phase 2 (Belle Chasse Tunnel), WBV-6.2 (W912P8-11-C-0016), in Plaquemines Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

The final inspection of the project was conducted on June 9, 2015, and June 11, 2015, to accommodate schedules. All contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Construction Completion (NCC) survey data Enclosure 2

- c. Final inspection attendance rosters Enclosure 3
 - (1) Inspection of project features dated June 11, 2015
 - (2) Inspection of project features dated June 9, 2015
 - (3) Inspection of Rail Road Gates dated June 3, 2015
 - (4) Inspection of Tunnel Gates dated February 28, 2015
 - (5) Inspection of Highway Gates and Roadway dated May 17, 2013
- d. Consent and Assignment to "Right of Entry and Floodgate Operation Agreement" dated April 23, 2013 Enclosure 4
 - (1) Right of Entry and Floodgate Operation Agreement
 - (2) Assignment of Right of Entry and Floodgate Operation Agreement
 - (3) Consent No. DACW29-9-15-87

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority – West (SLFPA-W), the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans, and it is above the required retention design grade of elevation 8.5 feet.

In accordance with the Local Cooperation Agreement between the Department of the Army and West Jefferson Levee District (WJLD) for Construction of the West Bank Hurricane Protection Project (Westwego to Harvey Canal) in Jefferson Parish, Louisiana dated December 18, 1990, Amendment Number 1 thereto between the Department of the Army and the Louisiana Department of Transportation and Development (LaDOTD) and WJLD dated April 26, 1999, Amendment Number 2 thereto between the Department of the Army and the LaDOTD and the WJLD dated April 2, 2007, the

Memorandum of Agreement Between the Louisiana Department of Transportation and Development and the Department of the Army through the U.S. Army Corps of Engineers dated May 16, 1995, the Grant of Particular use for West Bank and Vicinity of New Orleans, Louisiana, Hurricane Protection Project dated August 30, 2000, certain Authorizations For and Right of Entry for Access, Construction, Operation, Maintenance, Repair, Rehabilitation, and Replacement by LaDOTD, WJLD, and/or SLFPA-W, Cooperation Agreement Between the USA, LaDOTD, and WJLD for Rehabilitation of a Federal Hurricane/Shore Protection Project dated April 2, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, WJLD and CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with Section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Dear Ms. Maclay and Mr. Kline:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-73a, Ditch B Relocation and Drainage Cut Repair (W912P8-14-D-0011, Task Order 0004), in St. Charles Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006 and Public Law 110-329, The Consolidated Security, Disaster Assistance, and Continuing Appropriations Act, 2009.

A final inspection of the contract was conducted on May 21, 2015, and all contract work was performed in accordance with the approved plans and specifications. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

CERTIFIED MAIL NO. 7011 0470 0001 7670 0117 (Kline) CERTIFIED MAIL NO. 7011 0470 0001 7670 0162 (Maclay) RETURN RECEIPT REQUESTED

Baton Rouge, Louisiana 70802

Dear Mr. Kline:

You are hereby informed that the contracts for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, WBV-14a.2, Harvey Canal West Bank Levees – Phase 2 – Estelle Pump Station to the vicinity of Lapalco Avenue (W912P8-09-D-0042, Task Order 0004), and WBV-86, West Harvey Levee Construction (W912P8-14-C-0057), in Jefferson Parish, Louisiana, have been completed. These projects were completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the projects was conducted on August 28, 2015, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings for WBV-14a.2 Enclosure 1
- b. Notification of Construction Completion (NCC) survey data for WBV-14a.2 Enclosure 2
 - c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority

Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100year level of risk reduction. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The data also represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen Colonel, U.S. Army

Baton Rouge, Louisiana 70802

Dear Ms. Maclay and Mr. Bradberry:

You are hereby informed that the following contracts for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System have been completed:

- a. WBV 6a.3, Algiers Canal Levee Lift, Baseline Station 982+00 to 1230+00, Non Continuous (W912P8-14-D-0011, Task Order 0008), in Plaquemines Parish, Louisiana.
- b. WBV 6a.2, Algiers Canal-West Bank, Station 1020+00 to Station 1120+00, Belle Chasse Highway to Cutoff (W912P8-08-D-0047, Task Order 0008), in Plaquemines Parish, Louisiana.

These projects were completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

A final inspection of WBV-06a.3 was conducted on February 5, 2016, and a final inspection of WBV-06a.2 was conducted on August 12, 2011, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria.

For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contracts. Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Notification of Construction Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance rosters Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority – West (SLFPA-W), the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The rye grass has been planted and with proper maintenance should continue to improve in density and root structure. Bermuda grass will still have to be established in the spring by the construction contractor.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee. The survey data reflects the elevations of the levee are within the tolerance of the elevations required by the construction plans and is above the required retention design grade of elevation 8.5 feet. The NCC survey data at the gates represent sill elevation. The NCC for the gates (WBV 4.2 and WBV 5.2) were issued on April 8, 2014.

In accordance with the Local Cooperation Agreement between the Department of the Army and West Jefferson Levee District (WJLD) for Construction of the West Bank Hurricane Protection Project (Westwego to Harvey Canal) in Jefferson Parish, Louisiana dated December 18, 1990, Amendment Number 1 thereto between the Department of the Army and the Louisiana Department of Transportation and Development (LaDOTD) and WJLD dated April 26, 1999, Amendment Number 2 thereto between the Department of the Army and the LaDOTD and the WJLD dated April 2, 2007, the Memorandum of Agreement Between the Louisiana Department of Transportation and Development and the Department of the Army through the U.S. Army Corps of Engineers dated May 16, 1995, the Grant of Particular use for West Bank and Vicinity of New Orleans, Louisiana, Hurricane Protection Project dated August 30, 2000, certain Authorizations For and Right of Entry for Access, Construction, Operation,

Maintenance, Repair, Rehabilitation, and Replacement by LaDOTD, WJLD, and/or SLFPA-W, Cooperation Agreement Between the USA, LaDOTD, and WJLD for Rehabilitation of a Federal Hurricane/Shore Protection Project dated April 2, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, WJLD and CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Dear Mr. Bradberry:

You are hereby informed that the following contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-ARM-02 WBV System Armoring (Westwego to Harvey-02) – WBV-14f.2, Baseline Station 0+00 to Station 148+42 (WB14F2-15-S-0001), in Jefferson Parish, Louisiana has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (PL 109-234, Title II, Chapter 3, Construction, and Flood Control and Coastal Emergencies) and the 6th Emergency Supplemental Appropriations Act (PL 110-252, Title II).

A final inspection of project was conducted on March 23, 2016, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed interim Volume 2 Supplemental OMRR&R manual regarding Armoring. Volume 3 manuals for levee reaches that receive armoring will be revised to include armoring contract specific information. Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Final inspection attendance roster Enclosure 2
- c. Interim Volume 2 Supplemental OMRR&R Manual for Armoring Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority-West (SLFPA-West), the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

Dear Ms. Maclay and Mr. Bradberry:

You are hereby informed that the contracts for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), Algiers Canal – East Bank, WBV-48.2 (W912P8-08-D-0048 0005) Station 629+00 to Station 741+00 Non-Continuous, and the height restoration for this reach contained in WBV-49.2a (W912P8-14-D-0009 0003), in Plaquemines and Orleans Parish, Louisiana, have been completed. The WBV-48.2 reach also included relocation of a Gulf South 12-inch pipeline in WBV-82 (contract W912P8-11-D-0009 0005) and relocation of New Orleans Sewerage and Water Board 42-inch Sewer Force Main and 12-inch Water Line in WBV-83 (contract W912P8-11-D-0011-0004). These projects were completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations Act to Address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

The final inspection of the projects were conducted on October 25, 2011 (WBV-48.2), October 16, 2014 (WBV-82 and WBV-83), September 23, 2015 (WBV-49.2a) and May 9, 2016 (WBV-49.2a). All contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings for WBV-48.2 and WBV-49.2a Enclosure 1
- b. Notification of Construction Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance rosters Enclosure 3
 - (1) Inspection of WBV-48.2 project features dated October 24, 2011
 - (2) Inspection of WBV-49.2a project features dated September 23, 2015
 - (3) Inspection of WBV-49.2a project features dated May 9, 2016

The punch list items identified during the pre-final inspections have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority – West (SLFPA-W), the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. Dear Ms. Maclay and Mr. Bradberry:

You are hereby informed that the contracts for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), Algiers Canal – East Bank, WBV-49.1 (W912P8-08-D-0048 0003) Station 443+20 to Station 525+00, and the height restoration for this reach contained in WBV-49.2a (W912P8-14-D-0009 0003), in Plaquemines Parish, Louisiana, have been completed. These projects were completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations Act to Address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

The final inspection of the projects were conducted on October 25, 2011 (WBV-49.1) and September 23, 2015 (WBV-49.2a) and May 9, 2016 (WBV-49.2a). All contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

a. As-built contract drawings for WBV-49.1 and WBV-49.2a – Enclosure 1

- b. Notification of Construction Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance rosters Enclosure 3
 - (1) Inspection of WBV-49.1 project features dated October 25, 2011
 - (2) Inspection of WBV-49.2a project features dated September 23, 2015
 - (3) Inspection of WBV-49.2a project features dated May 9, 2016

The punch list items identified during the pre-final inspections have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority – West (SLFPA-W), the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been planted and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevation required to provide the retention design grade of elevation 8.5 feet. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence.

In accordance with the Local Cooperation Agreement between the Department of the Army and West Jefferson Levee District (WJLD) for Construction of the West Bank Hurricane Protection Project (Westwego to Harvey Canal) in Jefferson Parish, Louisiana dated December 18, 1990, Amendment Number 1 thereto between the Department of the Army and the Louisiana Department of Transportation and Development (LaDOTD) and WJLD dated April 26, 1999, Amendment Number 2 thereto between the Department of the Army and the LaDOTD and the WJLD dated April 2, 2007, the Memorandum of Agreement Between the Louisiana Department of Transportation and Development and the Department of the Army through the U.S. Army Corps of Engineers dated May 16, 1995, the Grant of Particular use for WBV, New Orleans, Louisiana, Hurricane Protection Project dated August 30, 2000, certain Authorizations For and Right of Entry for Access, Construction, Operation, Maintenance, Repair, Rehabilitation, and Replacement by LaDOTD, WJLD, and/or SLFPA-W, Cooperation Agreement Between the USA, LaDOTD, and WJLD for Rehabilitation of a Federal Hurricane/Shore Protection Project dated April 2, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, WJLD and CPRAB shall undertake the OMRR&R of this

completed project feature of the WBV, HSDRRS in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with Section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Richard L. Hansen Colonel, U.S. Army District Engineer

Dear Ms. Maclay, Mr. Bradberry and Mr. Theriot:

You are hereby informed that the contracts for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), Algiers Canal – West Bank, WBV-47.1 (W912P8-08-D-0048, Task Order 0004) Station 770+70 to Station 921+50, and the height restoration for this reach contained in WBV-47.2a (W912P8-14-D-0011, Task Order 0007), in Plaquemines Parish, Jefferson Parish, and Orleans Parish, Louisiana, have been completed. The WBV-47.1 reach also included relocation of a Chevron 30-inch pipeline in WBV-81 (W912P8-11-D-0004, Task Order 0004). These projects were completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations Act to Address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

The final inspections of the projects were conducted on June 20, 2012 (WBV-47.1), and July 13, 2016 (WBV-47.2a and WBV-81). All contract work was performed in accordance with the approved plans and specifications and meets the

design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contracts. Please see enclosed the following items:

- a. As-built contract drawings for WBV-47.2a Enclosure 1
- b. Notification of Construction Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance rosters Enclosure 3
 - (1) Inspection of WBV-47.1 project features dated June 20, 2012
 - (2) Inspection of WBV-47.2a and WBV-81 project features dated July 13, 2016

The punch list items identified during the pre-final inspections have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority – West (SLFPA-W), the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevation required to provide the retention design grade of elevation 8.5 feet. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence.

In accordance with the Local Cooperation Agreement between the Department of the Army and West Jefferson Levee District (WJLD) for Construction of the West Bank Hurricane Protection Project (Westwego to Harvey Canal) in Jefferson Parish, Louisiana dated December 18, 1990, Amendment Number 1 thereto between the Department of the Army and the Louisiana Department of Transportation and Development (LaDOTD) and WJLD dated April 26, 1999, Amendment Number 2 thereto between the Department of the Army and the LaDOTD and the WJLD dated April 2, 2007, the Memorandum of Agreement Between the Louisiana Department of Transportation and Development and the Department of the Army through the U.S. Army Corps of Engineers dated May 16, 1995, the Grant of Particular use for WBV, New Orleans, Louisiana, Hurricane Protection Project dated August 30, 2000, certain Authorizations For and Right of Entry for Access, Construction, Operation, Maintenance, Repair,

Rehabilitation, and Replacement by LaDOTD, WJLD, and/or SLFPA-W, Cooperation Agreement Between the United States Army, LaDOTD, and WJLD for Rehabilitation of a Federal Hurricane/Shore Protection Project dated April 2, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, WJLD and CPRAB shall undertake the OMRR&R of this completed project feature of the WBV, HSDRRS in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with Section 1010 of Public Law 113-121, you may appeal this notification.

Mr. Johnny B. Bradberry Chairman Coastal Protection and Restoration Authority Board of Louisiana 900 North Third Street State Capitol - 4th Floor Baton Rouge, Louisiana 70802

Dear Mr. Bradberry:

You are hereby informed that the following contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-ARM-01 System Armoring, (Eastern-Tie-In-01), WBV-90 Reach (W912P8-15-D-0002, Task Order 0002), in Jefferson and Plaquemines Parishes, Louisiana has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (PL 109-234, Title II, Chapter 3, Construction, and Flood Control and Coastal Emergencies) and the 6th Emergency Supplemental Appropriations Act (PL 110-252, Title II).

A final inspection of WBV-ARM-01 was conducted on July 27, 2016, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria.

For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed Volume 2 Supplemental OMRR&R manual regarding Armoring. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contracts. Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Final inspection attendance rosters Enclosure 2
- c. Volume 2 Supplemental OMRR&R for Armoring Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority-West (SLFPA-W), Plaquemines Parish Government, the Coastal Protection and Restoration Authority Board (CPRAB) of Louisiana, formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, HSDRRS in Jefferson and Plaquemines Parishes. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with Section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Dear Mr. Bradberry:

You are hereby informed that the following contracts for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-ARM-04 System Armoring, WBV-17b.2 Reach (W912P8-15-D-0003, Task Order 0003), in Jefferson Parish, Louisiana has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6th Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of WBV-ARM-04 was conducted on September 27, 2016, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria.

For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed Volume 2 Supplemental OMRR&R manual regarding Armoring. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contracts. Please see enclosed the following items:

Dear Mr. Bradberry:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-14c.2f, Westminster Pumping Station, Jefferson Parish, Floodwall Remediation, Monoliths A&B and G&H (W912P8-14-D-0011, Task Order 0009) in Jefferson Parish, Louisiana has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on September 29, 2016, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with the above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Notification of Construction Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration

Authority (CPRA), and by our office. The Rye grass has been established.

The NCC survey data includes a table presenting floodwall elevations at stations that can be compared to the construction plans. The survey data reflects the elevations of the floodwall are above the elevations required to provide a 100-year level of risk reduction and are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, HSDRRS in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with Section 1010 of Public Law 113-121, you may appeal this notification.

7 Feb 18

Mr. Johnny B. Bradberry Chairman Coastal Protection and Restoration Authority Board of Louisiana 150 Terrace Avenue Baton Rouge, Louisiana 70802

Dear Mr. Bradberry:

You are hereby informed that the floodwall and floodgates functional portion of the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, Mississippi River Levee (MRL), WBV-MRL 2.2, C/ (W912P8-14-C-0002), in Plaquemines Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

This Notification of Construction Completion (NCC) is for all contractual features associated with the construction contract for the floodwall and floodgates functional portion, but does not include the levee functional portion of the contract, as continued turf establishment efforts remain. A subsequent NCC will be issued for the levee functional portion of this construction contract upon established turf.

A final inspection of the project was conducted on December 18, 2017, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Construction Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Mr. Johnny B. Bradberry, Chairman Coastal Protection and Restoration Authority Board of Louisiana 900 North Third Street State Capitol – 4th Floor Baton Rouge, Louisiana 70802

Dear Mr. Bradberry:

You are hereby informed that the initial construction and planting activities for the West Bank and Vicinity (WBV) Hurricane Protection Project, WBV Mitigation, Bayou Segnette Bottom Land Hardwood – Wet Restoration, WBV-EVM-02 (W912P8-14-C-0052), in Jefferson Parish, Louisiana, has been completed. These activities were completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

The final inspection of the initial construction and planting activities was conducted on May 1, 2018. All contract work associated with the initial construction and planting activities was performed in accordance with the approved plans and specifications. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. The Interim Volume 3 of the OMRR&R manual, which provides OMRR&R information associated with above referenced contract, is enclosed. Additional and updated information, including monitoring requirements and success criteria, shall be provided in the Final Volume 3 of the OMRR&R manual to be provided at a later date. Please see enclosed the following items:

- a. Interim OMRR&R Manual, Volume 3 Enclosure 1
- b. Red-line as-built contract drawings Enclosure 2 (See Accompanied CD)
- c. Final inspection attendance roster Enclosure 3

In accordance with the WBV Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008,

CPRAB shall undertake the OMRR&R of this project feature of the Westbank and Vicinity Hurricane Protection Project in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with Section 1010 of Public Law 113-121, you may appeal this notification. If deemed appropriate, the United States Army Corps of Engineers will ensure the specified plant survival rates are achieved through follow up planting activities. In addition, USACE will perform monitoring of the site for the first three years following this initial construction, or until initial success criteria are met.

If there are any questions concerning your OMRR&R responsibilities, please contact me or Mr. Mark R. Wingate, P. E., Deputy District Engineer for Programs and Project Management, at (504) 862-2204.

Sincerely,

Michael N. Clancy Colonel, U.S. Army District Engineer

Mr. Johnny B. Bradberry
Chairman
Coastal Protection and Restoration Authority
Board of Louisiana
900 North Third Street
State Capitol – 4th Floor
Baton Rouge, Louisiana 70802

Dear Mr. Bradberry:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, Mississippi River Levee (MRL), WBV-MRL 3.2, Belle Chasse to Oakpoint Levee (W912P8-14-C-0008), in Plaquemines Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the project was conducted on August 14, 2017, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Construction Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained within 60 days of the date of this letter. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of risk reduction. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence. The data also represents a centerline profile of the floodwall/floodgate. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Michael Clancy Colonel, U.S. Army

District Engineer

Baton Rouge, Louisiana 70802

Dear Mr. Bradberry:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, Mississippi River Levee (MRL), WBV-MRL 1.2b, Augusta to Oakville (b) Levee (W912P8-14-C-0025), in Plaquemines Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A portion of this levee reach, from Station 522+47.99 to Station 512+00, is being utilized by the adjacent WBV-MRL 2.2 contractor. The WBV-MRL 2.2 contractor will repair any damages caused by their use before the WBV-MRL 2.2 Estimated Substantial Completion date.

A final inspection of the project was conducted on September 14, 2017, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

Chairman
Coastal Protection and Restoration Authority
Board of Louisiana
900 North Third Street
State Capitol – 4th Floor
Baton Rouge, Louisiana 70802

Dear Mr. Bradberry:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System, Mississippi River Levee (MRL), WBV-MRL 4.2, English Turn Bend to Belle Chasse Floodwall (W912P8-14-C-0006), in Plaquemines Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

This Notification of Construction Completion (NCC) is for all contractual features associated with the construction contract for the floodwall and floodgates, as they are a separate functional portion of the contract. This NCC does not include the levee functional portion of the contract, as continued turf establishment efforts remain. A subsequent NCC will be issued for the levee functional portion of this construction contract upon established turf.

A final inspection of the project was conducted on September 14, 2017, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings Enclosure 1
- b. Notification of Construction Completion (NCC) survey data Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodgate/floodwall. The survey data reflects the elevations of the floodgate/floodwall are within the tolerance of the elevations required by the construction plans.

Dear Mr. Bradberry:

You are hereby informed that the following contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-ARM-08, WBV System Armoring (Western Tie-In) 71 & 72 (W912P8-15-D-0002, Task Order 0004), in St. Charles and Jefferson Parishes, Louisiana, has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6th Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of WBV-ARM-08 was conducted on September 21, 2017, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed Volume 2 Supplemental OMRR&R manual regarding Armoring. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Final inspection attendance roster Enclosure 2
- c. Volume 2 Supplemental OMRR&R for Armoring Enclosure 3

CERTIFIED MAIL 7017 1450 000 5720 7459 RETURN RECEIPT REQUESTED

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Charles and Jefferson Parishes. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

Dear Mr. Bradberry:

Reference the Notification of Construction Completion (NCC) letter for West Bank and Vicinity (WBV), Mississippi River Levee contract WBV-MRL 4.2, dated September 20, 2017 (Enclosure 1). This NCC is for the levee functional portion of the contract, as turf is now established and all levee work is complete. Therefore, you are hereby informed that all levee work for the WBV, Hurricane and Storm Damage Risk Reduction System, Mississippi River Levee, WBV-MRL 4.2, English Turn Bend to Belle Chasse Floodwall (W912-P8-14-C-0006), in Plaquemines Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

For operations and maintenance guidance, please refer to the interim operations, maintenance, repair, replacement and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with the above referenced contract. As-built contract drawings have been previously provided to you.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with Section 1010 of Public Law 113-121, you may appeal this notification.

Mr. Johnny B. Bradberry, Chairman Coastal Protection and Restoration Authority Board of Louisiana 900 North Third Street State Capitol – 4th Floor Baton Rouge, Louisiana 70802

Dear Mr. Bradberry:

You are hereby informed that the initial construction and planting activities for the West Bank and Vicinity (WBV) Hurricane Protection Project, WBV Mitigation, Jean Lafitte Swamp Enhancement and Bottom Land Hardwood – Wet Restoration, WBV-EVM-78 (W912P8-16-C-0049), in Jefferson Parish, Louisiana, have been completed. These activities were completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

The final inspection of the initial construction and planting activities was conducted on May 10, 2018. All contract work associated with the initial construction and planting activities was performed in accordance with the approved plans and specifications. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. The Interim Volume 3 of the OMRR&R manual, which provides OMRR&R information associated with above referenced contract, is enclosed. Additional and updated information, including monitoring requirements and success criteria, shall be provided in the Final Volume 3 of the OMRR&R manual to be provided at a later date. Please see enclosed the following items:

- a. Interim OMRR&R Manual, Volume 3 Enclosure 1
- b. Final inspection attendance roster Enclosure 2

In accordance with the WBV Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this project feature of the Westbank and Vicinity Hurricane Protection Project in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve

the purpose for which they were designed. In accordance with Section 1010 of Public Law 113-121, you may appeal this notification. If deemed appropriate, the United States Army Corps of Engineers will ensure the specified plant survival rates are achieved through follow up planting activities. In addition, USACE will perform monitoring of the site for the first three years following this initial construction, or until initial success criteria are met.

If there are any questions concerning your OMRR&R responsibilities, please contact me or Mr. Mark R. Wingate, P. E., Deputy District Engineer for Programs and Project Management, at (504) 862-2204.

Sincerely,

Michael N. Clancy Colonel, U.S. Army

Dear Mr. Bradberry:

You are hereby informed that the following contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-ARM-14, WBV System Armoring WBV-16.2 Levee Reach Baseline Station 8+12 to Baseline Station 16+87 (W912P8-17-F-0039), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6th Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of WBV-ARM-14 was conducted on August 1, 2018, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed Interim Volume 2 Supplemental OMRR&R manual regarding Armoring. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Final inspection attendance roster Enclosure 2
- c. Interim Volume 2 Supplemental OMRR&R for Armoring Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works or Ms. Karen Clement, Assistant Operations Manager, Completed Works at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Michael N. Clancy Colonel, U.S. Army

District Commander

Dear Mr. Bradberry:

You are hereby informed that the following contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), Mississippi River Levee (MRL), WBV-ARM-09, WBV System Armoring, WBV-MRL-7.1 Levee Reach, (W912P8-15-D-0002-0003), Orleans Parish, Louisiana, has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6th Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of WBV-ARM-09 was conducted on October 17, 2018, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, and the Volume 2 Supplemental OMRR&R manual regarding Armoring previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Final inspection attendance roster Enclosure 2

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Orleans Parish. In this connotation, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works or Ms. Karen Clement, Assistant Operations Manager, Completed Works at (504) 862-2241 and (504) 862-2313, respectively.

Dear Mr. Bradberry:

Reference the Notification of Construction Completion (NCC) letter for West Bank and Vicinity (WBV), Mississippi River Levee (MRL) contract WBV-MRL 2.2, dated February 7, 2018 (Enclosure 1). This NCC is for the levee functional portion of the contract, as turf is now established and all levee work is complete. Therefore, you are hereby informed that the levee functional portion of the contract for Resilient Features, WBV, Hurricane and Storm Damage Risk Reduction System (HSDRRS), MRL, WBV-MRL 2.2, Oak Point to Augusta Floodwall (W912P8-14-C-0002), in Plaquemines Parish, Louisiana, has been completed. This project was completed by the United States pursuant to Public Law 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of the levee portion of the project was conducted on October 24, 2018, and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. NCC letter dated February 7, 2018 Enclosure 1
- b. Final As-built contract drawings Enclosure 2
- c. Final inspection attendance roster Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. Mr. Chip Kline Chairman Coastal Protection and Restoration Authority Board of Louisiana Capital Annex, Suite 138 1051 North 3rd St. Baton Rouge, Louisiana 70802

Dear Messrs. Burke and Kline:

You are hereby informed that the following contracts for West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-46.1, Sector Gate Complex - Phase 1 (W912P8-04-C-0012), and WBV-46.1a, Harvey Canal Floodgate (Sector Gate) - Permanent Pumps (W912P8-15-C-0024), in Jefferson Parish, Louisiana, have been completed. WBV-46.1 and WBV-46.1a were completed by the U.S. Army Corps of Engineers pursuant to the 3rd Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico and Pandemic Influenza Act, 2006 (Public Law 109-148, Title I, Chapter 3, Flood Control and Coastal Emergencies).

A final inspection for the Sector Gate was conducted on April 28, 2010 and a final inspection for the Permanent Pump Station was conducted on June 9, 2017. Additional subsequent follow-up inspections on miscellaneous punch list items were also conducted. All contract work was performed in accordance with approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the Operation, Maintenance, Repair, Replacement, and Rehabilitation (OMRR&R) manual, Volumes 1 and 2, previously provided to you. Additionally, interim Volume 3 OMRR&R documentation for WBV-46.1 and WBV-46.1a, enclosed herewith, provide specific information associated with the above referenced contracts. Please see enclosed the following items:

- a. WBV-46.1 Final as-built contract drawings Enclosure 1
- b. WBV-46.1a Red line as-built contract drawings Enclosure 2
- c. Notification of Construction Completion (NCC) survey data Enclosure 3
- d. WBV-46.1a Final inspection attendance roster Enclosure 4
- e. WBV-46.1 Interim Vol. 3 OMRR&R Enclosure 5
- f. WBV-46.1a Interim Vol. 3 OMRR&R Enclosure 6

The punch list items identified during the pre-final inspections have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority – West (SLFPA-W), Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall and sector gate. The survey data reflects the elevations of the floodwall and sector gate are within the tolerance of the elevations required by the construction plans.

In accordance with the Local Cooperation Agreement, Amendment Number 2 between the Department of the Army and the Louisiana Department of Transportation and Development and the West Jefferson Levee District dated April 2, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, the West Jefferson Levee District and CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with Section 1010 of PL 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Michael N. Clancy Colonel, U.S. Army

- b. Final inspection attendance roster Enclosure 2
- c. Interim Volume 2 Supplemental OMRR&R for Armoring Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority-West (SLFPA-W), Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works or Ms. Karen Clement, Assistant Operations Manager, Completed Works at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Stephen F. Morphy Colonel, U.S. Army District Commander

OCT 1 8 2019

Mr. Kyle R. "Chip" Kline, Jr. Chairman Coastal Protection and Restoration Authority Board of Louisiana Capitol Annex, Suite 138 1051 North Third Street Baton Rouge, Louisiana 70802

Dear Mr. Kline:

You are hereby informed that the following contract for the West Bank and Vicinity (WBV) – Mississippi River Levee (MRL), Hurricane and Storm Damage Risk Reduction System, WBV-MRL-05.2 English Turn to Belle Chasse (W912P8-14-C-0015) in Plaquemines Parish, Louisiana has been completed. This project was completed by the United States pursuant to Public Law (PL) 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery 2006.

A final inspection of WBV-MRL-05.2 was conducted on September 30, 2019 and all contract work was performed in accordance with the approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will include the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Final inspection attendance roster Enclosure 2
- c. Notification of Construction Completion (NCC) survey data Enclosure 3

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the levee and was obtained on September 30, 2019. The survey data reflects the elevations of the levee are above the elevations required to provide a 100-year level of

risk reduction. The levees were constructed with overbuild to allow for the natural occurrence of settlement and subsidence.

In accordance with the Project Partnership Agreement between the Department of the Army and Coastal Protection and Restoration Authority Board (CPRAB) of Louisiana dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the WBV, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of PL 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Stephen F. Murphy Colonel, U.S. Army District Commander

Dear Messrs. Burke and Kline:

You are hereby informed that the following contract for Post-Notice of Construction Completion work on the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-06.2a, Belle Chasse Tunnel Drainage Improvements (W912P8-18-C-0035), in Plaquemines Parish, Louisiana, has been completed. This contract was for Post-Notice of Construction Completion work which was agreed to by the Non-Federal Sponsor to reduce the public safety risk associated with the seepage related to the WBV-06.2 contract (Reference WBV-06.2 NCC letter, dated June 19, 2015). WBV-06.2a was completed by the U.S. Army Corps of Engineers pursuant to the 3rd Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico and Pandemic Influenza Act, 2006 (Public Law 109-148, Title I, Chapter 3, Flood Control and Coastal Emergencies).

A final inspection for the Belle Chasse Tunnel Improvements was conducted on January 12, 2020. All contract work was performed in accordance with approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the Operation, Maintenance, Repair, Replacement, and Rehabilitation (OMRR&R) manual, Volumes 1 and 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with the above referenced contract. Please see enclosed the following items:

- a. WBV-06.2a Redline as-built contract drawings Enclosure 1
- b. WBV-06.2a Final Inspection attendance roster Enclosure 2

There were no punch list items identified during the pre-final/final inspection. Representatives from Plaquemines Parish, Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), Louisiana Department of Transportation and Development (LaDOTD) and by our office were in attendance.

In accordance with the Local Cooperation Agreement between the Department of the Army and West Jefferson Levee District (WJLD) for Construction of the West Bank Hurricane Protection Project (Westwego to Harvey Canal) in Jefferson Parish, Louisiana dated December 18, 1990, Amendment Number 1 thereto between the Department of the Army and the Louisiana Department of Transportation and Development (LaDOTD) and WJLD dated April 26, 1999, Amendment Number 2 thereto between the Department of the Army and the LaDOTD and the WJLD dated April 2, 2007, the Memorandum of Agreement Between the Louisiana Department of Transportation and Development and the Department of the Army through the U.S. Army Corps of Engineers dated May 16, 1995, the Grant of Particular use for West Bank and Vicinity of New Orleans, Louisiana, Hurricane Protection Project dated August 30, 2000, certain Authorizations For and Right of Entry for Access, Construction, Operation. Maintenance, Repair, Rehabilitation, and Replacement by LaDOTD, WJLD, and/or SLFPA-W, Cooperation Agreement Between the USA, LaDOTD, and WJLD for Rehabilitation of a Federal Hurricane/Shore Protection Project dated April 2, 2007, and the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, WJLD and CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Mr. Chip Kline, Chairman
Coastal Protection and Restoration Authority
Board of Louisiana
Capital Annex. Suite 138
1051 North Third Street
Baton Rouge. Louisiana 70802

Dear Mr. Kline:

You are hereby informed that the initial construction and planting activities for the West Bank and Vicinity (WBV) Hurricane and Storm Damage Risk Reduction System (HSDRRS) Mitigation Project, Avondale Gardens, WBV-EVM-04b (W912P8-16-C-0065), in Jefferson Parish, Louisiana, has been completed. These activities were completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

The final inspection of the initial construction and planting activities was conducted on March 13, 2019. All contract work associated with the initial construction and planting activities was performed in accordance with the approved plans and specifications. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. The Interim Volume 3 of the OMRR&R manual, which provides OMRR&R information associated with above referenced contract, is enclosed. Additional and updated information, including monitoring requirements and success criteria, shall be provided in the Final Volume 3 of the OMRR&R manual to be provided at a later date. Please see enclosed the following items:

- a. Final inspection attendance roster Enclosure 1
- b. Red-line as-built contract drawings Enclosure 2
- c. Interim OMRR&R Manual, Volume 3 Enclosure 3

In accordance with the WBV Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this project feature of the Westbank and Vicinity Hurricane Protection Project in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

In accordance with Section 1010 of Public Law 113-121, you may appeal this notification. If deemed appropriate, the United States Army Corps of Engineers will ensure the specified plant survival rates are achieved through follow up planting activities. In addition, USACE will perform monitoring of the site for the first three years following this initial construction or until initial success criteria are met.

If there are any questions concerning your OMRR&R responsibilities, please contact me or Mr. Mark R. Wingate, P. E., Deputy District Engineer for Programs and Project Management, at (504) 862-2204.

Sincerely,

Stephen F. Murphy Colonel, U.S. Army District Commander

Mr. Kyle R. "Chip" Kline, Jr. Chairman Coastal Protection and Restoration Authority Board of Louisiana Capitol Annex, Suite 138 1051 North Third Street Baton Rouge, Louisiana 70802

Dear Mr. Kline:

You are hereby informed that the following contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-ARM-03, WBV System Armoring, WBV-MRL-1.2b Levee Reach (W912P8-15-D-0001, W912P8-18-F-0071), in Plaquemines Parish, Louisiana has been completed. This project was completed by the United States pursuant to Public Law (PL) 109-234, 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery, 2006.

A final inspection of WBV-ARM-03 was conducted on December 17, 2019 and all contract work was performed in accordance with the approved plans and specifications and meets the intended design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed Volume 2 Supplemental OMRR&R manual regarding Armoring. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract.

Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Final inspection attendance roster Enclosure 2
- c. Volume 2 Supplemental OMRR&R for Armoring Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Plaquemines Parish Government (PPG), Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. Turf has been established in accordance with the contract requirements and with proper maintenance should continue to grow.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the WBV, HSDRRS in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

Dear Mr. Kline:

You are hereby informed that the following contract for Post-Notice of Construction Completion work on the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-14j.1, Westwego to Harvey Floodwall Remediation (W912P8-18-C-0070), in Jefferson Parish, Louisiana, has been completed. This contract was for Post-Notice of Construction Completion work to correct movement of floodwall Monolith L-5, constructed under the WBV-14j contract (Reference WBV-14j NCC letter, dated March 15, 2013). WBV-14j.1 was completed by the U.S. Army Corps of Engineers pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6th Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection for the Westwego to Harvey Floodwall Remediation was conducted on May 15, 2020. All contract work was performed in accordance with approved plans and specifications and meets the 100-year event design criteria. For operations and maintenance guidance, refer to the Operation, Maintenance, Repair, Replacement, and Rehabilitation (OMRR&R) manual, Volumes 1, 2, and 3 previously provided to you. Please note, Volume 3 of the OMRR&R manual will be updated in the near future which will provide the final OMRR&R information associated with the above referenced contract. Please see enclosed the following items:

- a. WBV-14j.1 Final as-built contract drawings Enclosure 1
- b. WBV-14j.1 Notification of Contract Completion (NCC) survey data Enclosure 2
- c. WBV-14j.1 Final Inspection attendance roster Enclosure 3

There were no punch list items identified during the pre-final/final inspection.

Representatives from the Southeast Louisiana Flood Protection Authority-West, Coastal

Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and our office were in attendance.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the floodwall. The survey data reflects the elevations of the floodwall are within the tolerance of the elevations required by the construction plans.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRAB dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the WBV, HSDRRS in Jefferson Parish.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works at (504) 862-2241, or Ms. Karen Clement, Assistant Operations Manager, Completed Works at (504) 862-2313.

Sincerely,

Operations Manager, Completed Works

Mr. Kyle R. "Chip" Kline, Jr. Chairman Coastal Protection and Restoration Authority Board of Louisiana Capitol Annex, Suite 138 1051 North Third Street Baton Rouge, Louisiana 70802

Dear Mr. Kline:

You are hereby informed that the following contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-ARM-10, WBV System Armoring, WBV-MRL-3.2b Levee Reach (W912P8-15-D-0002, W912P8-18-F-0062), in Plaquemines Parish, Louisiana has been completed. This project was completed by the United States pursuant to Public Law (PL) 109-234, 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery, 2006.

A final inspection of WBV-ARM-10 was conducted on October 1, 2020 and all contract work was performed in accordance with the approved plans and specifications and meets the intended design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed Volume 2 Supplemental OMRR&R manual regarding Armoring. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Final inspection attendance roster Enclosure 2
- c. Volume 2 Supplemental OMRR&R for Armoring Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Plaquemines Parish Government (PPG), Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. Turf has been established in accordance with the contract requirements and with proper maintenance should continue to grow.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the WBV, HSDRRS in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

Stephen F. Murphy Colonel, U.S. Army District Commander

Mr. Scott M. Burke, President Southeast Louisiana Flood Protection Authority West Bank 7001 River Road Marrero, LA 70072

Dear Mr. Kline and Mr. Burke:

You are hereby informed that the final construction and planting activities for the West Bank and Vicinity (WBV) Hurricane Protection Project, Implementation of Previously Authorized Mitigation Plans, St. Charles, Louisiana, WBV-EVM-03 (W912P8-20-P-0050), in St. Charles Parish, Louisiana, has been completed. These activities were completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

The final inspection of the final construction and planting activities was conducted on May 7, 2021. All contract work associated with the initial construction and planting activities was performed in accordance with the approved plans. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. The Interim Volume 3 of the OMRR&R manual, which provides OMRR&R information associated with above referenced contract, is enclosed. Additional and updated information, including monitoring requirements and success criteria, shall be provided in the Final Volume 3 of the OMRR&R manual to be provided at a later date. Please see enclosed the following items:

- a. Interim OMRR&R Manual, Volume 3 Enclosure 1
- b. Red-line as-built contract drawings Enclosure 2

c. Final inspection attendance roster – Enclosure 3

In accordance with the WBV Project Partnership Agreement between the Department of the Army and Coastal Protection and Restoration Authority (CPRA) (now known as Coastal Protection and Restoration Authority Board (CPRAB)) dated November 6, 2008, and Amendment #2 of the Local Cooperation Agreement between the Department of the Army and the West Jefferson Levee District dated April 2, 2007, CPRAB and Southeast Louisiana Flood Protection Authority West Bank shall begin execution of the OMRR&R of the functional portions of this project feature of the Westbank and Vicinity Hurricane Protection Project in St. Charles and Jefferson Parishes. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with Section 1010 of Public Law 113-121, you may appeal this notification. If deemed appropriate, the United States Army Corps of Engineers (USACE) will ensure the specified plant survival rates are achieved through follow up planting activities. In addition, USACE will perform monitoring of the site for the first three years following this initial construction, or until initial success criteria are met.

If there are any questions concerning your OMRR&R responsibilities, please contact Mr. Mark R. Wingate, P. E., Deputy District Engineer for Programs and Project Management, at Mark.R.Wingate@usace.army.mil or (504) 862-2204.

Sincerely,

Stephen F. Murphy Colonel, U.S. Army District Commander

Dear Mr. Kline:

You are hereby informed that the following contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-ARM-07, WBV System Armoring, WBV-14b.2 Orleans Village to LA. HWY.45 B/L STA. 930+06 to B/L STA. 1094+71 (W912P8-15-D-0001, W912P819F0224), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6th Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of WBV-ARM-07 was conducted on June 3, 2021, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed Volume 2 Supplemental OMRR&R manual regarding Armoring. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Final inspection attendance roster Enclosure 2
- c. Volume 2 Supplemental OMRR&R for Armoring Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority-West (SLFPA-W), Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

Mr. Kyle R. "Chip" Kline, Jr. Chairman Coastal Protection and Restoration Authority Board of Louisiana Capital Annex, Suite 138 1051 North Third Street Baton Rouge, LA 70802

Dear Mr. Kline:

You are hereby informed that initial construction activities for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-90b, Bayou aux Carpes Plug Removal in Jefferson Parish, Louisiana, has been completed. This work consisted of partially removing the shell plug that closed off the natural connection between Bayou aux Carpes and the Gulf Intracoastal Waterway, and depositing excavated material to partially restore hydrology in the Environmental Protection Agency's Bayou aux Carpes, Clean Water Act, Section 404(c) Site. The WBV-90b work was completed by the U.S. Army Corps of Engineers pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies).

A final inspection for the WBV-90b work was conducted on June 30, 2021. All work was performed in accordance with approved plans. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, and Interim Volume 3, previously provided to you. Please note, the interim Volume 3 of the OMRR&R manual will be updated to provide the final OMRR&R information for this contract. Please see enclosed the following items:

- a. WBV-90b Final as-built contract drawings Enclosure 1
- b. WBV-90b Final Inspection attendance roster Enclosure 2

Punch list items identified during the pre-final inspections have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), the National Park Service, the U.S. Environmental Protection Agency, and by our office.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA, dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the WBV, HSDRRS, in Jefferson Parish.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, at (504) 862-2241 or Amy.E.Powell@usace.army.mil, and Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2313 or Karen.L.Clement@usace.army.mil respectively.

Dear Mr. Kline:

You are hereby informed that the following contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-ARM-15, WBV System Armoring, WBV-15a.2 Lake Cataouatche B/L STA. 423+80 to B/L STA. 629+43 (W912P8-15-D-0002, W912P819F0099), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6th Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of WBV-ARM-15 was conducted on June 17, 2021, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed Volume 2 Supplemental OMRR&R manual regarding Armoring. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Final inspection attendance roster Enclosure 2
- c. Volume 2 Supplemental OMRR&R for Armoring Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority-West (SLFPA-W), Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish. Dear Mr. Kline:

You are hereby informed that the following contract for Post-Notice of Construction Completion work on the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-03a.1, Miscellaneous Work on Pump Stations contract in Jefferson Parish, Louisiana, has been completed. This consisted of installing adjustable pipe supports and appurtenances to address differential settlement at expansion couplings at three pump stations - WBV-03a (Hero Pump Station), WBV-20 (Westwego #2 Pump Station), and WBV-76 (Highway 90 Pump Station). A maintenance platform was also installed on the WBV-3a floodwall to provide access to flood side expansion couplings. WBV-03a.1 was completed by the U.S. Army Corps of Engineers pursuant to the 3rd Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006 (Public Law 109-148), and the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies).

A final inspection of the WBV-03a.1 contract was conducted on June 14, 2021, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volumes 1, 2, and 3 previously provided to you. Please note, Volume 3 of the OMRR&R manual will be updated in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Final As-built contract drawings Enclosure 1
- b. Final inspection attendance roster Enclosure 2

The punch list items identified during the pre-final inspections have been corrected and inspected by representatives of the Jefferson Parish Drainage Department, Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

If there are any questions concerning your OMRR&R responsibilities, please contact Ms. Amy Powell, Operations Manager, Completed Works at (504) 862-2241 or Amy.E.Powell@usace.army.mil, and Ms. Karen Clement, Assistant Operations Manager, Completed Works at karen.l.Clement@usace.army.mil or (504) 862-2313, respectively.

Sincerely,

Dear Mr. Kline and Mr. Burke:

You are hereby informed that the final construction and planting activities for the West Bank and Vicinity (WBV) Hurricane Protection Project, Implementation of Previously Authorized Mitigation Plans, Hwy 307, Louisiana, WBV-EVM-910 (W912P8-21-C-0010), in Lafourche Parish, Louisiana, has been completed. These activities were completed by the United States pursuant to Public Law 109-148, Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

The final inspection of the final construction and planting activities was conducted on August 2, 2021. All contract work associated with the initial construction and planting activities was performed in accordance with the approved plans and specifications. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. The Interim Volume 3 of the OMRR&R manual, which provides OMRR&R information associated with above referenced contract, is enclosed. Additional and updated information, including monitoring requirements and success criteria, shall be provided in the Final Volume 3 of the OMRR&R manual to be provided at a later date. Please see enclosed the following items:

- a. Interim OMRR&R Manual, Volume 3 Enclosure 1
- b. Red-line as-built contract drawings Enclosure 2

c. Final inspection attendance roster – Enclosure 3

In accordance with the WBV Project Partnership Agreement between the Department of the Army and Coastal Protection and Restoration Authority (CPRA) (now known as Coastal Protection and Restoration Authority Board (CPRAB)) dated November 6, 2008, and Amendment #2 of the Local Cooperation Agreement between the Department of the Army and the West Jefferson Levee District dated April 2, 2007, CPRAB and Southeast Louisiana Flood Protection Authority West Bank shall begin execution of the OMRR&R of the functional portions of this project feature of the Westbank and Vicinity Hurricane Protection Project in St. Charles and Jefferson Parishes. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with Section 1010 of Public Law 113-121, you may appeal this notification. If deemed appropriate, the United States Army Corps of Engineers (USACE) will ensure the specified plant survival rates are achieved through follow up planting activities. In addition, USACE will perform monitoring of the site for the first three years following this initial construction, or until initial success criteria are met.

If there are any questions concerning your OMRR&R responsibilities, please contact Mr. Mark R. Wingate, P. E., Deputy District Engineer for Programs and Project Management, at Mark.R.Wingate@usace.army.mil or (504) 862-2204.

Dear Mr. Kline:

You are hereby informed that the following contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-ARM-17, WBV System Armoring, WBV-14c.2 Levee Reach, New Westwego Pump Station to Orleans Village, B/L Sta. 741+50 to B/L Sta. 930+14 (W912P8-15-D-0002, W912P819F0266), in Jefferson Parish, Louisiana, has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6th Emergency Supplemental Appropriations Act (PL 110-252, Title III).

A final inspection of WBV-ARM-17 was conducted on August 19, 2021, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed Volume 2 Supplemental OMRR&R manual regarding Armoring. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Final inspection attendance roster Enclosure 2
- c. Volume 2 Supplemental OMRR&R for Armoring Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Southeast Louisiana Flood Protection Authority-West (SLFPA-W), Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. The Bermuda grass has been established and with proper maintenance should continue to improve in density and root structure.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please contact Ms. Amy Powell, Operations Manager, Completed Works at (504) 862-2241 or Amy.E.Powell@usace.army.mil, and Ms. Karen Clement, Assistant Operations Manager, Completed Works at (504) 862-2313 or Karen.L.Clement@usace.army.mil.

Sincerely,

Stephen F Murphy Colonel, U.S. Army

Commanding

Mr. Kyle R. "Chip" Kline, Jr. Chairman Coastal Protection and Restoration Authority Board of Louisiana Capitol Annex, Suite 138 1051 North Third Street Baton Rouge, LA 70802

Dear Mr. Kline:

You are hereby informed that the following contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), WBV-ARM-11, WBV System Armoring, WBV-MRL-3.2b Levee Reach (W912P8-15-D-0003, W912P8-18-F-0154), in Plaquemines Parish, Louisiana has been completed. This project was completed by the United States pursuant to Public Law (PL) 109-234, 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery, 2006.

A final inspection of WBV-ARM-11 was conducted on August 18, 2021 and all contract work was performed in accordance with the approved plans and specifications and meets the intended design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. In addition, please see the enclosed Volume 2 Supplemental OMRR&R manual regarding Armoring. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings Enclosure 1
- b. Final inspection attendance roster Enclosure 2
- c. Volume 2 Supplemental OMRR&R for Armoring Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Plaquemines Parish Government (PPG), Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office. Turf has been established in accordance with the contract requirements and with proper maintenance should continue to grow.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated November 6, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the WBV, HSDRRS in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

Dear Mr. Kline:

You are hereby informed that the contract for the West Bank and Vicinity (WBV), Hurricane and Storm Damage Risk Reduction System (HSDRRS), Gage Hardening Project, Jefferson and Plaquemines Parishes, Louisiana, has been completed. This project was completed by the United States pursuant to the 4th Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and the Hurricane Recovery of 2006 (Public Law 109-234, Title II, Chapter 3, Flood Control and Coastal Emergencies) and the 6th Emergency Supplemental Appropriations Act (PL 110-252, Title III).

Final inspections for the five (5) hardened WBV gages was conducted between January 31, 2022 and February 10, 2022, and all contract work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1, Volume 2, and Interim Volume 2 Supplemental OMRR&R for Armoring previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. Redline As-built contract drawings and Operational Manuals Enclosure 1
- b. Final inspection attendance roster Enclosure 2

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), formerly known as Coastal Protection and Restoration Authority (CPRA), and by our office.

In accordance with the Project Partnership Agreement between the Department of the Army and CPRA (now known as CPRAB) dated September 22, 2008, CPRAB shall undertake the OMRR&R of this completed project feature of the West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in Jefferson and Plaquemines Parishes, Louisiana. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please contact Ms. Amy Powell, Operations Manager, Completed Works, at Amy.E.Powell@usace.army.mil or (504) 862-2241 or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at Karen.L.Clement@usace.army.mil (504) 862-2313.

Sincerely,

Stephen F. Murphy Colonel, U.S. Army Commanding

Programs and Project Management Division Regional Projects Branch

Mr. Kyle R. "Chip" Kline, Jr. Chairman Coastal Protection and Restoration Authority Board of Louisiana Capital Annex, Suite 138 1051 North Third Street Baton Rouge, LA 70802

Dear Mr. Kline:

The United States Army Corps of Engineers (USACE) is pleased to inform you that the period of construction for the West Bank and Vicinity (WBV) Project was completed on March 3, 2022 (WBV Gage Hardening notice of completion date), pursuant to Water Resources Development Acts and Hurricanes Katrina and Rita Supplemental Appropriations. We would like to thank the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), the Southeast Louisiana Flood Protection Authority-West, and associated Parish Governments for their years of support and partnership in the undertaking of such a momentous and significant project.

Following Hurricanes Katrina and Rita in 2005, the USACE was authorized and funded to design and construct the Hurricane and Storm Damage Risk Reduction System (HSDRRS) for southeast Louisiana. This letter signifies that the collaborative efforts, shared responsibilities, and commitments between all HSDRRS partners have finally culminated in the successful achievement of this milestone. As a result of this herculean effort and massive investment in public safety, the completed WBV Project provides risk reduction from a storm surge that has a one percent chance of occurring or being exceeded in any given year, thereby making the system stronger and more resilient than ever.

The WBV project constructed or made improvements to approximately 75 miles of levees, floodwalls, floodgates, water control structures, and other hurricane and storm damage risk reduction features and appurtenances. Of these 75 miles, approximately 49 miles consist of primary perimeter risk reduction features (including 15 miles colocated with the Mississippi River Levees) and 26 miles of detention basin risk reduction features along the Harvey and Algiers canals.

Joint agency final inspections were conducted for individual contracts and project features, and all work was performed in accordance with the approved plans and specifications and meets the design criteria. For operations and maintenance guidance, refer to the WBV Operation, Maintenance, Repair, Replacement, and Rehabilitation (OMRR&R) Manual, Volume 1 and Volume 2, and Volume 3's previously provided to you. Remaining OMRR&R Manual Volume 3's that have not been completed will be provided in the near future.

In accordance with the Project Partnership Agreement between the Department of the Army and the Coastal Protection and Restoration Authority of Louisiana, now known as the CPRAB, dated November 6, 2008, CPRAB shall undertake the OMRR&R of the completed entire West Bank and Vicinity, Hurricane and Storm Damage Risk Reduction System in St. Charles, Jefferson, Orleans, and Plaquemines parishes. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed.

Thank you again for your partnership and the hard work that helped to make this significant achievement possible.

If you have any questions concerning this correspondence, please contact Mr. Mark R. Wingate, P.E., Deputy District Engineer for Programs and Project Management, at <u>Mark.R.Wingate@usace.army.mil</u> or (504) 862-2204.

Sincerely,

Stephen F. Murphy Colonel, U.S. Army
