Mr. Johnny B. Bradberry  
Chairman  
Coastal Protection and Restoration Authority  
Board of Louisiana  
900 North Third Street  
State Capitol – 4<sup>th</sup> Floor  
Baton Rouge, Louisiana 70802

Mr. Amos Cormier, III  
Parish President  
Plaquemines Parish Government  
8056 Highway 23  
Suite 200  
Belle Chasse, Louisiana 70037

Dear Messrs. Bradberry and Cormier:

You are hereby informed that the contract for the New Orleans to Venice (NOV), Non-Federal Levee (NFL), Hurricane and Storm Damage Risk Reduction System, NOV-NF-W-05b, Wilkinson Canal Pump Station, (W912P8-11-D-0010, Task Order 0004), in Plaquemines Parish, Louisiana, has been completed. The project was completed by the U.S. Army Corps of Engineers pursuant to Public Law (PL) 109-234, Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery, 2006, PL 110-252, 6<sup>th</sup> Emergency Supplemental Appropriations Act, and PL 109-148, Department of Defense, Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico, and Pandemic Influenza Act, 2006.

This Notification of Construction Completion (NCC) is for all contractual features associated with the construction contract for the pump station, which can function independently, but does not include the levees on both ends of the contract extending from the limits of the slope paving to natural ground, the receptacle and manual transfer switch, the secondary back-up generator, and the trash racks. A subsequent NCC will be issued for these features upon completion of work for these construction items.

A final inspection of the pump station was conducted on July 12, 2017, and all contract work for the features associated with the construction contract for the pump station, which can function independently, was performed in accordance with the

approved plans and specifications and meets the 50-year event design criteria. For operations and maintenance guidance, refer to the interim operation, maintenance, repair, replacement, and rehabilitation (OMRR&R) manual, Volume 1 and Volume 2, previously provided to you. Please note, Volume 3 of the OMRR&R manual will be provided in the near future which will provide the final OMRR&R information associated with above referenced contract. Please see enclosed the following items:

- a. As-built contract drawings – Enclosure 1
- b. Notification of Contract Completion (NCC) survey data – Enclosure 2
- c. Final inspection attendance roster – Enclosure 3

The punch list items identified during the pre-final inspection have been corrected and inspected by representatives of the Coastal Protection and Restoration Authority Board of Louisiana (CPRAB), Plaquemines Parish Government (PPG), and by our office.

The NCC survey data includes a table presenting elevations at stations that can be compared to the construction plans. The data represents a centerline profile of the fronting protection and slope paving. The survey data indicate the elevations of the fronting protection and slope paving are above the elevations required to provide a 50-year level of risk reduction.

In accordance with the Project Partnership Agreement between the Government; and CPRAB and PPG (hereinafter collectively referred to as the “Non-Federal Sponsors”) dated June 22, 2012, the Non-Federal Sponsors shall undertake the OMRR&R of this completed project feature of the New Orleans to Venice, Hurricane and Storm Damage Risk Reduction System in Plaquemines Parish. In this connection, maintenance is construed as keeping all completed works in working condition to serve the purpose for which they were designed. In accordance with section 1010 of Public Law 113-121, you may appeal this notification.

If there are any questions concerning your OMRR&R responsibilities, please call Ms. Amy Powell, Operations Manager, Completed Works, or Ms. Karen Clement, Assistant Operations Manager, Completed Works, at (504) 862-2241 and (504) 862-2313, respectively.

Sincerely,

  
Michael Clancy  
Colonel, U.S. Army  
District Engineer
