

## 13.0 SPECIFICATIONS

### 13.1 Sampling of References

- ER 1110-1-8155, Engineering and Design Specifications
- ER 1110-2-1200, Plans and Specifications for Civil Works Projects

### 13.2 In General

Specification preparation shall follow ECB 2006-4, dated 08JUN06, which mandates CSI MasterFormat 2004. MVN Guide Specifications are available for download from Design Guidelines page on the MVN Engineering Division web site at <http://www.mvn.usace.army.mil/eng>. These can be used as reference in compiling project specifications using MasterFormat 2004. Certain contracts may require MasterFormat 1995 to comply with prior agreements.

Specifications shall be prepared using the government's SpecsIntact system. SpecsIntact (Specifications-Kept-Intact), a software program copyrighted by NASA, is mandated for use in producing USACE project specifications. The program is available for free download at <http://specsintact.ksc.nasa.gov/Index.asp>. The SpecsIntact web page includes instructions and online help for use of the program.
