CIAP (PO-51): Mandeville Aquatic Ecosystem Restoration Project	Structure/ Habitat Enhancement	+/-	+	+/-	+/-	+/-	o	+/-	o	o	o	o	o

+ positive effect , - negative effect, o no effect, +/- both positive and negative effects

Program	Parish	Year Constructed	Project Description	Direct Overlap	Extended Boundary Overlap
CDBG (PO-0087): Madisonville Bulkhead	St Tammany	2015	Improvements to the existing bulkhead along the shore of Lake Pontchartrain and the Tchefuncte River at the Madisonville Marina in St. Tammany Parish.*	NO	NO
CIAP (PO-0048): Green Property Preservation	St Tammany	2011	Property acquisition and preservation of approximately 27 acres of cypress swamp and bottomland hardwood forests within the Bayou Lacombe watershed in St. Tammany Parish, Louisiana. Purchase completed in August 2011.#	NO	NO
CIAP (PO-0049): French Property Preservation	St Tammany	2009	Property acquisition of approximately 40 acres of pine trees and mixed hardwoods to aid in the extension of the wildlife corridor between critical habitats along Bayou Liberty in St. Tammany Parish, Louisiana. The property will also be utilized for educating the public on wetland value.#	YES -Partial overlap with Alt 5	YES -Partial overlap with Alt 5
CIAP (PO-51): Mandeville Aquatic Ecosystem Restoration Project	St Tammany	2010	Upgrade of the existing wastewater treatment plant including the addition of a wetland assimilation system for disbursement of treated sewerage effluent into an adjacent wetland area on the wester border of the City of Mandeville, Louisiana. Added benefits of the assimilation will be the increase of wetland vegetation to an area impacted during Hurricanes Katrina and Rita.#	YES -Partial overlap with Alt 8 and Alt 2	YES -Partial overlap with Alt 8 and Alt 2
CPRA (PO-4355NP4): Fontainebleau State Park Mitigation	St Tammany	1999	A mitigation project for impacts associated with the construction of park cabins along the northern Lake Pontchartrain shoreline east of Bayou Castine within the Fontainebleau State Park, St. Tammany Parish. The project involved the deposition of sand in the near shore zone to supply sediment to close approximately 600 feet of breaches east of the Fontainebleau State Park cabins along	NO	YES - within 150 feet of Alt 9
CWPPRA (PO-0006): Fritchie Marsh Restoration	St Tammany	2001	Freshwater and nutrient introduction in the Fritchie marsh area in St. Tammany Parish, Louisiana to decrease salinities, improve hydrologic conditions and enrich the marsh habitat.*	YES -Partial overlap with Alt 5 and 6	YES -Partial overlap with Alt 5, 6, and Alt 2
CWPPRA (PO-0033): Goose Point/Point Platte Marsh Creation	St Tammany	2009	A marsh creation project constructed by the placement of dredged material into open water areas behind the Lake Pontchartrain shoreline and within containment dikes. Two areas were built east of Point Platte and two areas north of Goose Point. The goal of this project was to create and nourish degraded marsh and help prevent breaches into the northern shoreline of Lake	NO	NO
CWPPRA (PO-0104): Bayou Bonfouca Marsh Creation	St Tammany	2018	The primary goal of the project is to create 604 acres and nourish 310 acres of low salinity brackish marsh in open water areas adjacent to Bayou Bonfouca with sediment pumped from Lake Pontchartrain.*	YES -Partial overlap with Alt 5	YES -Partial overlap with Alt 5
HSDRSS: HSDRRS Mitigation - LPV Milton Floodside	St Tammany	2018	Created 115 acres of intermediate marsh restoration by placing dredged material in open water adjacent to the bottomland hardwood site to an elevation conducive for wetland development, followed by plating of wetland vegetation. Temporary containment features would be constructed to keep material in place. A shoreline restoration feature is proposed to repair a	NO	NO
HSDRSS: HSDRRS Mitigation - LPV Zydeco Ridge II Marsh Creation	St Tammany	2020	The Zydeco Ridge II Marsh Creation Project created over 156 acres of low salinity brackish marsh in what are now open water ponds. Restoration of this wetland area will improve shoreline stability for residents of St. Tammany Parish, and support waterfowl and estuarine fish habitat for future generations.+	YES - Fully within Alt 7	YES - Partial overlap with Alt 7
NRDA (PR-0001): Middle Pearl River WMA Boat Launch	St Tammany	2021	Improvements to the existing boat launch on the west bank of the Middle Pearl River in the Pearl River WMA in St. Tammany Parish to enhance access to waterborne recreational opportunities within the WMA. &^	NO	NO

**Storm Damage Reconstruction**

<b>Project</b>	<b>Parish</b>	<b>Status</b>	<b>Overview</b>	<b>Agency/Entity/Program</b>
Bridge Painting H.P. Long	Jefferson	Construction	Repairs due to Hurricane Katrina	Louisiana Department of Transportation and Development (La DOTD)
Lapalco Bridge Operator House	Jefferson	Construction	Repairs due to Hurricane Katrina	La DOTD
Live Oak Boulevard (US 90 to Willswood)	Jefferson	Construction	Repairs due to Hurricane Katrina	La DOTD
Old Hammond Highway (17 <sup>th</sup> St. to Carrollton)	Jefferson	Construction	Repairs due to Hurricane Katrina	La DOTD
Repair Damage to Walking Path Lights	Jefferson	Repair Rehabilitation	Repairs due to Hurricane Katrina	La DOTD
USACE Regulatory Permit MVN-2007-2517-EMM	Jefferson	Permit Issued	Deposit fill from the dredging of an un-named canal for debris clean up. Located off Louisiana Highway 1 near Grand Isle and 0.21 acre of non-vegetated waterbottoms would be filled; 0.7 acre of TNW in review area.	Alphonse G. Cassagne, III
USACE Regulatory Permit MVN-2007-554-EGG	Jefferson	Permit Issued	Dredging of approximately 13,440 cy of material from non-vegetated water bottoms, construction of approximately 2,785 feet of bulkhead, installation of piling for construction of approximately 20 boat slips, and deposition of 1,877 cy of hauled-in fill material for stabilization, including 420 cy of rip-rap material for the purpose of erosion control and hurricane damage repair. Located on 1, 2, 3, and 4 East Central Avenue, Grand Isle.	Webb Cheramie
Building Permits from August, 2005 through July 2011 for Orleans Parish	Orleans	Building Permits	A total of 343,220 total applicable building permits. Building Type descriptors-Residential, Commercial, Demolition. See next sheet for Orleans Parish building permits specifics.	City of New Orleans
Chef Menteur Bridge & Approaches	Orleans	Construction	Bridge replacement	La DOTD
E-R Program Support	Orleans	Construction	Submerged Roads Program support	La DOTD
Louisiana Alternative Housing Pilot Program Project, Fischer Group Site Environmental Assessment	Orleans	Construction	Redevelopment of the Fischer-Algiers site with Louisiana Cottages on existing site footprint	Federal Emergency Management Agency (FEMA)
Louisiana Alternative Housing Pilot Program Project, Jackson Barracks Environmental Assessment	Orleans	Construction	Reconstruction of base housing for emergency personnel	FEMA
Louisiana Alternative Housing Pilot Program Project, Orleans Parish Programmatic Environmental Assessment	Orleans	Construction	Construction of 160 Louisiana cottages throughout Orleans Parish, in existing lots throughout the East Bank, to facilitate storm damage reconstruction.	FEMA

**Storm Damage Reconstruction**

<b>Project</b>	<b>Parish</b>	<b>Status</b>	<b>Overview</b>	<b>Agency/Entity/Program</b>
USACE Regulatory Permit MVN-2006-0848-EFF	Orleans	Permit Issued	The construction and maintenance of two high level fixed concrete girder span bridges located between Orleans and St. Tammany Parishes, on Interstate I-10, and removal of the existing Twin Span bridges at Lake Pontchartrain on I-10 between New Orleans and Slidell, LA. The project would impact approximately 24.2 acres of Waters of the U.S..	La DOTD
USACE Regulatory Permit MVN-2008-0787-EFF	Orleans	Permit Issued	Excavate and deposit fill to construct a home site, driveway, install rip rap, and construct a pier and boat house for residential use. Located on Chef Menteur Highway, in Lake St. Catherine, LA. As compensation for project related impacts, the permittee has agreed to donate \$2,286.00 to the Louisiana Coastal Restoration Fund for the restoration of 0.09 of an acre of impacted marsh habitat.	Eugene Larroux
Joe Brown Center	Orleans	Design and Planning	Multipurpose community center would undergo a \$20 million major renovation. Bath house would undergo major renovations. Pool and grounds (including baseball fields and shelter) would receive major enhancements.	City of New Orleans
Municipal Yacht Harbor Repairs	Orleans	Design	Harbor facility will be repaired so it can reopen, including piers, bulkheads, pilings, and rental slips	City of New Orleans
St. Roch Market	Orleans	Design	Former produce market will be restored	The Faubourg St. Roch Project and City of New Orleans
Various library demolitions	Orleans	Unknown	Demolition of damaged facilities	City of New Orleans
USACE Regulatory Permit MVN-2008-3259-EOO	Plaquemines	Permit Issued	Install and maintain three aids to navigation at three locations within the shipping fairway of Southwest Pass in the Mississippi River Delta Region, as a response to hurricane damage.	USCG Civil Eng Unit Miami
USACE Regulatory Permit MVN-2009-0269-ETT	Plaquemines	Permit Issued	Replace and maintain an existing pump station with 0.16 acre affected by a project located on an existing drainage pump station traversing a levee located in Braithwaite, LA. Approximately 0.07 acre of EFH would be impacted.	Plaquemines Parish
USACE Regulatory Permit MVN-2010-0966-EPP	Plaquemines	Permit Issued	Maintenance dredging for access and marina basin, deposition of dredge material in a manner to induce marsh creation/nourishment, demolition of existing structures and removal of debris, and installation and maintenance of docks, walkways, boat slips, and other appurtenant structures associated with the reconstruction of Port Eads Marina. Located off South Pass approximately 20 miles south of Venice, LA. The project would impact 23.76 acres of non-vegetated waterbottom and potentially cause impacts on 24.09 acres of EFH.	Port Eads Marina Reconstruction
Rowley St. (LA 46 - LA 39)	St. Bernard	Construction	Rehabilitation (Phase 1 Submerged Roads Program)	La DOTD

**Storm Damage Reconstruction**

<b>Project</b>	<b>Parish</b>	<b>Status</b>	<b>Overview</b>	<b>Agency/Entity/Program</b>
USACE Regulatory Permit MVN-2008-2955-EBB	St. Bernard	Permit Issued	Rebuild a 70 ft wide by 36 ft deep boat shed destroyed by Hurricane Katrina. No excavation or fill would occur and the project is located in Bayou Terre aux Boeuf, at 5913 Delacroix Highway, Delacroix, LA. The proposed project would result in the destruction or alteration of 0.06 acres of EFH.	Betty Borne
USACE Regulatory Permit MVN-2008-3107KM-EUU	St. Bernard	Permit Issued	Construct and maintain a camp house, walkway, and covered boat dock with slips affecting 0.006 acre approximately 4.1 miles east-northeast of Violet, LA and approximately 900 ft southeast of its intersection with Bayou Dupre. Approximately 0.006 acre of EFH could be impacted by this proposed project.	Dennis Diaz
USACE Regulatory Permit MVN-2009-0105-EBB	St. Bernard	Permit Issued	Install and maintain a pier and walkway post-Hurricane Katrina damage. Affecting 0.02 acre on Bayou Terre aux Boeufs, adjacent to Delacroix Island (6204 Delacroix Highway).	Sweet Guide Service, Lodging, Boat Slip, & Dry Dock Rentals, LLC
Community Development Block Grants	Multiple	Repair Rehabilitation Construction	Housing and infrastructure repair and rehabilitation, as well as new housing and infrastructure construction.	State of Louisiana and Louisiana Recovery Authority
Long Term Community Recovery Project	Multiple	Repair Rehabilitation Construction	Hurricanes Katrina and Rita infrastructure rebuilding projects across coastal Louisiana.	State of Louisiana and Louisiana Recovery Authority
The Road Home Program	Multiple	Repair Rehabilitation Construction	Provides assistance to homeowners who are rebuilding or reconstructing homes and also restores rental units that were damaged, due to Hurricanes Katrina and Rita.	U.S. Department of Housing and Urban Development

The proposed project is located within Chef Menteur Pass, west of Lake Borne, near Venitian Isles, LA. No disturbance of wetland, EFH, or Waters of the U.S. would have any long term effects.	BP America Production Company
Permit MVN-2011-00120-EQ	St. Charles	Standard Permit	FC 2/16/2011	Clearing, grading, excavation of fill, and maintenance of an access road to construct a drill pad with ring levee. Located about 1 mile northeast of Norco, LA in the Good Hope Field. The proposed project would impact approximately 2.79 acres of coast result in in 2.79 acres of EFH impacts.	Mack Energy Company
Permit MVN-2010-01252 EKK	St. Bernard	not available	Permit Issued	Installation and maintenance of a covered boat storage, located on the left descending bank of Bayou Terre aux Boeufs at 6424 Delacroix Highway, St. Bernard, LA. The proposed project would affect approximately 0.02 acre of the coast.	Norman J. Naquin, Jr.
Permit MVN-2010-01372-EKK	St. Bernard	not available	Permit Issued	Installation and maintenance of pilings for the construction of additional boat mooring at Breton Sound Dock. Located on the Bayou La Loutre, at 7600 Highway 624, in Hopedale, LA. The project would impact approximately 0.3 acre of non-vegetated waterbottom.	Amigo Enterprises
Permit MVN-2010-0968-EII	St. Bernard	not available	Permit Issued	Installation and maintenance of four covered boat slips at Shell Beach Bayou, 1936 Yscloskey Highway, Shell Beach, LA. The proposed project would impact approximately 0.01 acres of EFH.	40th Street Properties Management, L. L. C.
Permit MVN-2010-1251-EQ	St. Bernard	not available	Permit Issued	Rebuilding and maintenance of a boatshed at 6326 Delacroix Highway, Delacroix, LA. The proposed project would impact 0.03 acre of EFH.	David Acquistapace
Permit MVN-2010-02947-EKK	Orleans	not available	Permit Issued	Installation and maintenance of approximately 100 steel piles and 1,700 timber piles, a truck marshalling area, refrigerated shed, and an office building. Located on the left descending bank of the Mississippi River, at a point about 101.1 miles above Head of Passes, at New Orleans, LA. No impact on wetlands are anticipated.	Port of New Orleans
Permit MVN-2010-1712-EQ	Orleans	not available	Permit Issued	Installaton and maintenance of fill to extend the working area of the existing weight scales and to stockpile concrete. Located at 9130 Almonaster Avenue, New Orleans, LA. The project would impact approximately 1.2 acres of coast.	Hamp's Enterprise, LLC
Permit MVN-2010-0201-EOO	Jefferson	not available	Permit Issued	Excavation and degradation of existing spoil bank material, and backfill oil and gas canals. Located in JLNHP with approximately 49.5 acres of EFH impacts anticipated.	National Park Service
Permit MVN-2010-2554-EII	Jefferson	not available	Permit Issued	Remove 60 ft of abandoned 12-inch line, cap rest of remnants to remain in place off the Grand Isle coastline with the potential to impact 0.014 acresof Waters of the U.S. resulting in 0.014 acre of impacts on EFH.	Exxonmobil Pipeline Company
Permit MVN-2010-0415 EPP	St. Charles	not available	Permit Issued	Clearing, grading, excavation, and deposition of fill for drainage and picnic/nature walk area at 346 Lakewood Drive, south of existing church, in Luling, LA. The proposed project would result in approximately 1.16 acres of EFH impacts.	Church of Jesus Christ of Latter Day Saints
Permit MVN-2010-1570-EFF	St. Charles	not available	Permit Issued	Installation of structures, excavation, and deposition of fill to improve existing drainage and flooding conditions within an existing residential neighborhood. Located off Harding Street and Airline Drive in Destrehan, LA, this project would impact approximately 0.029 acre of Waters of the U.S. and 0.029 acre of EFH impacts.	St. Charles Parish Department of Public Works
Permit MVN-2010-1204-EQ	Plaquemines	not available	Permit Issued	Repair of an existing dock located on the Mississippi River, right descending bank at a point about 24 miles above Head of Passes near Buras, LA. The proposed project would result in approximately 0.02 acre of EFH impacts.	Gaston Pace
Permit MVN-2010-1461-EPP	Plaquemines	not available	Permit Issued	Clearing grading, and deposition of fill for the construction of a camp, driveway, bulkhead, and a boathouse. Located off Highway 23, in Empire, LA. The project would impact approximately 0.092 acre of EFH.	Johnny Johnson

*Redevelopment*

Project	Parish	Permit Type	Status	Overview	Agency/Entity/Program
Permit MVN-2010-1478-EKK	Plaquemines	not available	Permit Issued	Installation and maintenance of five steel piles in Coup Pass Abel. Located at the entrance of Barataria Bay, near Grand Terre Islands, LA. The proposed project would impact approximately 5 acres of Waters of the U.S..	BP America Production Company
Permit MVN-2010-1558-EPP	Plaquemines	not available	Permit Issued	Proposed construction of a slip with a wing along the location of a typical drill barge and a well head protector. Located 1.62 miles northwest from Pointe a la Hache, LA. Anticipated impacts on 7.98 acres of coast and 2.3 acres of EFH.	BOPCO, L.P.
Permit MVN-2010-2171-EPP	Plaquemines	not available	Permit Issued	Lowering of the existing 16 inch Cypress Crude Pipeline via jetting and excavation at six different work sites. The proposed project is located near Ostrica, LA, and would impact 11.32 acres of non-vegetated waterbottom and 27.7 acres of EFH.	Chevron Pipeline Company
Permit MVN-2010-2320-EII	Plaquemines	not available	Permit Issued	Proposed pipeline and structure removal at Block 84, Main Pass Area.	Brigham Oil & Gas
Permit MVN-2010-2914-EQ	Plaquemines	not available	Permit Issued	Installation and maintenance of two navigational signs along the right descending bank, and five navigation signs along the left descending bank of the Mississippi River, 63 miles above Head of Passes. The proposed project would impact approximately 0.009 acre of non-vegetated waterbottom.	Entergy Louisiana, LLC
Permit MVN-2009-00281-EPP	St. Bernard	not available	Permit Issued	Dredge to move an existing production facility back to its original location. 18.2 acres would be affected. Adverse local long term effects on soil substrate, water movement and circulation, and wetland aquatic habitat. Located within Chandeleur Sound Area, approximately 17 mile southeasterly of Hopedale, LA. Excavation and fill of 9.1 acres non-vegetated waterbottom. 18.2 acres of EFH potentially impacted.	Yuma Exploration and Production Company
Permit MVN-2009-0105-EBB	St. Bernard	not available	Permit Issued	Installation and maintenance of a pier and walkway on Bayou Terre aux Boeufs, left descending bank, adjacent to Delacroix Island, at 6204 Delacroix Highway (LA Hwy 300), Delacroix, LA. Approximately 0.02 acre of non-vegetated water bottom affects would cause 0.02 acre of EFH impacts.	Sweetwater Guide Service, Lodging, Boat Slip & Dry Dock Rentals, LLC
Permit MVN-2009-0589-EII	St. Bernard	not available	Permit Issued	Install and maintain a fishing camp and covered boat shed adjacent to an existing wharf. Potentially affects 0.04 acre, adjacent to Happiness Bayou, near the intersection with the Lake Borgne canal, approximately 3.8 miles east from Violet, LA.	Ronald E. Adams Jr.
Permit MVN-2009-1953-EPP	St. Bernard	not available	Permit Issued	Clear, grade, excavate, and fill for the construction of Gauthier Elementary School complex; located at 1201 Bayou Road, St. Bernard, LA. As compensatory mitigation for the clearing and filling of 2.72 acres of jurisdictional BLH habitat, the permittee has agreed to the restoration of forested wetlands on 3.7 acres at the Paradis Mitigation Bank.	St. Bernard Parish School Board
Permit MVN-2009-2634-EOO	St. Bernard	not available	Permit Issued	Clearing, grading, excavation, and deposition of fill for the construction of a hospital facility. The project would be located on and south of LA 39 (West Judge Perez Drive), adjacent to the Gueregeh Canal, in Chalmette, LA. Anticipated impact of 2.3 acres of coast.	St. Bernard Parish Hospital Service District
Permit MVN-2009-3141-EQ	St. Bernard	not available	Permit Issued	Construct and maintain a boat shed with a total footprint of 300 square ft. Located at Lot #57 of the Fernandez subdivision off of Delacroix Highway, Delacroix, LA. The proposed project would result in the destruction or alteration of 0.007 acre of EFH utilized by various life stages of red drum and penaeid shrimp.	Milton Guarino Jr.
Permit MVN-2009-0782-EBB	Jefferson	not available	Permit Issued	Install and maintain a camp with a boathouse and deck located at Lot 56 on Fran Lane, Bayou Harbor, in Barataria, LA.	Dylan Bourg
Permit MVN-2009-1017-EBB	Jefferson	not available	Permit Issued	Install and maintain two covered boat houses with boat hoists located at 4969 Joan Marie Drive, Barataria, LA.	Dominick Impastato
Permit MVN-2009-1367-EBB	Jefferson	not available	Permit Issued	Install and maintain a 4 by 270 ft pier and pilings, and post for six 250 ft longlines with oyster bags, all to facilitate a new bivalve hatchery research farm. A total of 0.47 total acre of EFH will be affected by this proposed project located at Caminada Bay, near Ludwig Lane, Grand Isle, LA.	Louisiana State University

*Redevelopment*

Project	Parish	Permit Type	Status	Overview	Agency/Entity/Program
Permit MVN-2009-2675-EFF	Jefferson	not available	Permit Issued	Install and maintain concrete revetment, piling, breasting dolphins, and structures in order to replace an existing ship/barge dock facility. Located on the bank of the Mississippi River, at river mile 101.4, near New Orleans, LA. The proposal would result in the destruction or alteration of 0.20 acre of EFH.	Blackwater Midstream Corporation
Permit MVN-2009-3046-EOO	Jefferson	not available	Permit Issued	Excavation of approximately 17 linear miles of canoe trails, removal of woody debris, and spray dredging detrital material into adjacent wetlands located in JLNHP. The proposed project would impact 26.56 acres of vegetated water bottoms and 98.86 acres of non-vegetated water bottoms within 605 acres of coastal areas and 605 acres of EFH impacted.	National Park Service
Permit MVN-2009-1867-EPP	St. Charles	not available	Permit Issued	Clear and maintain a portion of the existing Clovelly-Norco 24-inch pipeline ROW and install and maintain pipeline markers. Located off of U.S. 90, near St. Rose, LA, the project would impact approximately 21.62 acres of jurisdictional forested wetlands.	Shell Pipeline Company
Permit MVN-2009-2960-EQ	St. Charles	not available	Permit Issued	Installation of a 6-inch flowline, walkway, and 16 by 24 ft heater platform at Lake Salvador, 10.3 miles northeast of Larose, LA.	Castex Energy
Permit MVN-2009-3151-EPP	St. Charles	not available	Permit Issued	Clearing, grading, excavation, and deposition of fill for the construction of two commercial storage buildings. Located on East Harding Street, New Sarpy, LA. Approximately 1.22 acres of cypress swamp and wetlands would be impacted.	Quartermen Incorporated
Permit MVN-2009-00600 EPP	Plaquemines	not available	Permit Issued	Utilize a dredge to construct a 1,179 ft chanel and slip for the purpose of preparing a well site to drill the Lake Washington Prospect. Located in Lake Washington field approximately 7 miles southwest of Port Sulphur, LA. Excavations would impact 2.602 acres of non-vegetated waterbottom. Fill areas would impact 23.08 acres of wetland.	Hilcorp Energy Corporation
Permit MVN-2009-0397-EBB	Plaquemines	not available	Permit Issued	Installation of a 12 ft by 38 ft manufactured home on top of a previously permitted deck on Harlem Back Levee Canal, at 201 Harlem Lane, Braithwaite, LA.	Jacob Kansas
Permit MVN-2009-0709-EII	Plaquemines	not available	Permit Issued	Install and maintain a covered boathouse and open deck. Affected area is 0.04 acre at Lot 121, adjacent to the Martin Canal at 564 Martin Lane, Port Sulpur, LA.	Edmond Tassin
Permit MVN-2009-1448-EII	Plaquemines	not available	Permit Issued	Construct and maintain a private recreational wharf and boathouse, with approximated 0.01 total acres affected. Located at 324 Myrtle Grove Road, Port Sulphur, LA. Approximately 0.25 acre of EFH impact would occur.	Fredrick Edgecombe
Permit MVN-2009-1634-EII	Plaquemines	not available	Permit Issued	Install and maintain a gas lift line, approximately 14,851 ft (2.81 miles) in length. A total of 1.04 acres would be affected in the Gulf of Mexico, beginning in Main Pass block 68, and ending in Main Pass block 64. The pipeline begins in Plaquemines Parish and ends in Federal waters.	Medco Energi US LLC
Permit MVN-2009-0959-ETT	Orleans	not available	Permit Issued	Install and maintain an electric cable under the IHNC bottom, by directional bore method. Approximately 0.08 total acre would be affected within the IHNC, New Orleans, LA.	Entergy New Orleans, Inc.
Permit MVN-2008-2485-EII	Orleans	not available	Permit Issued	To moor up to 16 barges, (two long and eight wide) from the eastern bank extending into the canal approximately 290 ft. with two additional barges to be moored in an existing slip located in the Michoud Canal, along the eastern bank at an existing dock facility, at 14900 Intracoastal Drive, New Orleans, LA.	AEP River Operations
Permit MVN-2008-3465-EII	Jefferson	not available	Permit Issued	Installation and maintenance of an 18-inch produced waters pipeline. A total of 16.5 total acres affected by project from the ExxonMobil, Grand Isle station to ExxonMobil, Grand Isle block 19 platform. Excavation of 14.616 acres of non-vegetated waterbottom and 0.095 acre of non-wet areas with fill areas of 14.9 acres of non-vegetated waterbottom and 1.6 acres of non-wet areas would occur. 14.7 acres of EFH would be impacted.	ExxonMobil Pipeline Company

*Redevelopment*

Project	Parish	Permit Type	Status	Overview	Agency/Entity/Program
Permit MVN-2008-00046-EKK	Jefferson	not available	Permit Issued	Deposit fill for the construction of an amphitheater, stage, and temporary tent structure on the bature of the Mississippi River. Located off First Street, along the bank of the Mississippi River, at Mississippi River Mile Marker 97, in Gretna, LA. Approximately 0.006 acre of wetland impact would occur and 0.16 acre of EFH impacts would be altered or destroyed.	City of Gretna
Permit MVN-2008-00525-EPP	Jefferson	not available	Permit Issued	Install and maintain a ramp, dock, two anchor buoys and appurtenant structures for the construction of a ship dock facility. Located on the bank of the Mississippi River, at about 102.45 miles above Head of Passes, Bridge City, LA. The proposed project would result in the destruction or alteration of 1.5 acres of EFH.	Kinder Morgan Terminals
Permit MVN-2008-0496-EII	Jefferson	not available	Permit Issued	Installation and maintenance of a 2-inch, 6-line hydraulic umbilical in the Gulf of Mexico beginning in Grand Isle Area, Block 115, and ending in Ewing Bank Area, Block 878.	Walter Oil and Gas Corporation
Permit MVN-2008-1105-EII	Jefferson	not available	Permit Issued	To install and maintain an artificial reef by the placement of BP's platform jacket in the WF-70H reef site, for the purpose of enhancing fishing opportunities off the coast of Louisiana within the Gulf of Mexico, West Delta Block 70.	LDWF, Artificial Reef Program
Permit MVN-2008-1108-EII	Jefferson	not available	Permit Issued	To install and maintain an artificial reef by the placement of BP's platform jacket in the WD-94G reef site, for the purpose of enhancing fishing opportunities off the coast of Louisiana within the Gulf of Mexico, West Delta Block 94.	LDWF, Artificial Reef Program
Permit MVN-2008-1804-EMM	Jefferson	not available	Permit Issued	Install and maintain dry dock vessel moorings in the GIWW at the Harvey Canal, on Peters Road, approximately 1.25 miles south from Lapalco Boulevard, in Harvey, LA.	FMT Shipyard & Repair, LLC
Permit MVN-2008-2669-EPP	Jefferson	not available	Permit Issued	Install and maintain a 58 by 53 ft bulkhead and deposit fill for recreational parking vehicles. A total of 0.07 ac of EFH affected by the proposed project on Bay St. Honore, at Hwy 1, Grand Isle, LA.	Walter L. Cain Sr.
Permit MVN-2008-3148-EPP	Jefferson	not available	Permit Issued	Replace existing pilings for a 30 ft by 28 ft boathouse with hoist which is located at 5234 Privateer Boulevard, Barataria, LA.	Eric Morgan
Permit MVN-2008-00079_EKK	St. Charles	not available	Permit Issued	Install and maintain a floating barricade located on the left descending bank of Baie Des Deux Chenes, in Des Allemandes.	Michael Arcement
Permit MVN-2008-0030-ETT	St. Charles	not available	Permit Issued	Clear, grade, excavate and deposit fill to construct an expansion for an existing oil refinery with access roads and stormwater management system adjacent to the existing Valero Oil Refinery and abutting Airline Highway in Norco. As compensatory mitigation, the permittee will enhance and preserve 218.5 acres of bald cypress-tupelo swamp wetlands.	Valero St. Charles Refinery
Permit MVN-2008-03361-EUU	St. Bernard	not available	Permit Issued	Construct and maintain a covered boat house on pilings on Bayou Terre Aux Boeufs, Lot # 172, across from 6241 Delacroix Highway (Hwy 300), Delacroix, LA. The project would result in the destruction or alteration of 0.03 acre of EFH.	Kenneth Cook
Permit MVN-2008-1422-EOO	St. Bernard	not available	Permit Issued	Install and maintain 20 pilings along an existing bulkhead for a boat dock containing three boat slips. Located on the bank of Bayou La Loutre at 5701 Hopedale Highway, in Hopedale, LA.	Pintail Fishing Club, Inc.
Permit MVN-2008-1495-ETT	St. Bernard	not available	Permit Issued	Construct and maintain six covered boat slips and decking at 3924 Delacroix Highway, Delacroix Island. The proposed project would result in the destruction or alteration of 0.013 acre of EFH.	Hooks & Shells
Permit MVN-2008-2331-EUU	St. Bernard	not available	Permit Issued	Replace and maintain a bulkhead, and repair and maintain a covered boat dock with slips at 5732 Delacroix Highway, Delacroix, LA. The proposed project would result in the destruction or alteration of up to 0.05 acre of EFH.	Errol Dennis
Permit MVN-2008-2436-EOO	St. Bernard	not available	Permit Issued	Proposed repair sites along 20-inch CAL-KY Pipeline located in the Breton Sound area to the Chandeleur Sound area.	Chevron Pipe Line Company

*Redevelopment*

Project	Parish	Permit Type	Status	Overview	Agency/Entity/Program
Permit MVN-2008-00759-EPP	Plaquemines	not available	Permit Issued	Dredge, install, and maintain fill in an existing borrow area. Affected area is 3.2 acres on the bank of the Mississippi River, at about 67 miles above Head of Passes, in Braithwaite, LA. Impacts would occur on 3.2 acres of excavated non-vegetated waterbottom and 12.69 acres non-wet area for fill.	JA Chorens Investment
Permit MVN-2008-01199-EKK	Plaquemines	not available	Permit Issued	Construction of a driveway with two wings, a board road and drillsite to access and re-enter the Haspel & Davis No. 1 Well, located approximately 1.58 miles southeasterly from Point a la Hache, LA. As compensatory mitigation, the permittee has agreed to the restoration of forested wetlands on 1.3 acres at the Paradis Mitigation Bank.	Martin-Marks Operating Company
Permit MVN-2008-01421 EPP	Plaquemines	not available	Permit Issued	Excavation and deposition of fill and installation and maintenance of bulkheads around an existing marine facility. Located on Grand Pass, Venice, LA. The proposed project would affect approximately 2.03 acres of coast resulting in approximately 2.03 acres of EFH impacts.	Venice Port Complex
Permit MVN-2008-0160-EOO	Plaquemines	not available	Permit Issued	Proposed intallation of a main service dock to erect the widening truss members for the Huey P. Long Bridge widening. Located in Harahan, LA.	MTI, a Joint Venture
Permit MVN-2008-02443-EUU	Plaquemines	not available	Permit Issued	Install and maintain BP America, Inc. 8 pile structure, for the purpose of enhancing fishing opportunities off the coast of Louisiana. In the Gulf of Mexico, South Pass, Block 89, off the coast of Plaquemines Parish, LA.	LDWF, Artificial Reef Program
Permit MVN-2008-2422-EOO	Plaquemines	not available	Permit Issued	This project would use explosives for the removal of West Black Bay Tank Batteries 1, 2, and 3, located in West Black Bay Field, 10 miles northeast of Port Sulphur, LA. Approximately 46.3 acres on non-vegetated waterbottoms (EFH) may be impacted as a result of this project. Protective measures will be utilized for native species, especially the sea turtle.	Anadarko Petroleum Corporation
Permit MVN-2007-001142-EE	Plaquemines	not available	Permit Issued	Install and maintain a 6.625-inch-diameter gas pipeline for a distance of about 2.4 miles. The pipeline would cross the MRGO Safety fairway Anchorage. The pipeline would be buried 10 ft below the waterbottoms at depths of approximately 40 ft. Located in Federal waters offshore Louisiana in Mississippi River Gulf Outlet anchorage, in the Breton Sound Area.	Chevron
Permit MVN-2007-0798-EOO	Plaquemines	not available	Permit Issued	Locate and maintain the platform jacket for Apaches's WD-75 H in WD-75 reef site, to enhance fishing opportunities off the coast of Louisiana. Located in the Gulf of Mexico, approximately 31 miles southeast of Grand Isle in West Delta Block 75.	LDWF, Artificial Reef Program
Permit MVN-2007-109-EKK	Plaquemines	not available	Permit Issued	Proposed 20-inch pipeline to be directionally drilled under the Mississippi River; approximately 2.14 miles northwest of Buras, LA. A total of 20.09 acres of wetland excavation and 23.10 acres of wetland fill area would be impacted with the project.	Chevron Pipe Line Company
Permit MVN-2007-3664-EKK	Plaquemines	not available	Permit Issued	Construct and maintain an elevated camp, a driveway, a levee access ramp, a boat launch ramp and a boat dock for a recreational fishing camp that is located on the bank of the Mississippi River, at a point about 11.5 above Head of Passes, in Venice, LA. The proposed project would result in the destruction or alteration of up to 0.006 acre of EFH.	Venice Group
Permit MVN-2007-3814-EPP	Plaquemines	not available	Permit Issued	Install and maintain a 12-inch waterline along Lake Hermitage Road for the sole purpose of providing potable water to approximately 160 campsites. Adjacent to Lake Hermitage Road, in Lake Hermitage, LA. The project would directly impact 3.41 acres of jurisdictional wetlands and the destruction or alteration of 3.41 acres of EFH.	Plaquemines Parish Government
Permit MVN-2007-4569-ETT	St. Bernard	not available	Permit Issued	Construct and maintain a residential dock for Lot # 70 of the Hopedale Canal residential camp community located in Hopedale, LA.	Kenneth Boos

*Redevelopment*

Project	Parish	Permit Type	Status	Overview	Agency/Entity/Program
Permit MVN-2007-000613-EKK	Orleans	not available	Permit Issued	Hydraulically dredge sand from the Mississippi River and stockpile into the existing Algiers sand pit on the batture to be used as commercial fill material. Approximately 180,000 cy of sand would be pumped into the stockpile area twice per year for duration of 15 days for each pumping. The hydraulic dredge would operate between 500 ft and 1,200 ft from the low water reference plan. Located in the Mississippi River, between two points at about 83.4 and 84.4 miles above Head of Passes, in Algiers.	Kass Bros. Inc., c/o Lambert Engineers
Permit MVN-2007-0342-EFF	Orleans	not available	Permit Issued	Excavate and deposit fill to maintenance dredge an existing channel, conduct water control structure refurbishments, restore existing roads and parking areas, and install and maintain rock dike breakwaters as bankline stabilization. Located in Bayou Sauvage NWR, off of US 90 and 11.	USFWS NWR
Permit MVN-2007-1290-EQ	Orleans	not available	Permit Issued	To install five mooring dolphins, and nine anchor piles with chains to moor standard size barges eight wide by seven long extending 2,000 ft channelward at the upstream end of the project, and four wide by two long extending 1,000 ft channelward at the downstream end of the project. Also to construct and maintain a new 14 ft wide levee crossing and associated parking area on the batture. Located on the bank of the Mississippi River, at a point about 86.7 miles above the Head of Passes the proposed project would impact 0.48 acre of batture wetlands. The permittee will restore 0.7 acre of BLH credits. Although, there are 0.19 acre of EFH in our project area, none will be substantially impacted.	Turn Services
Permit MVN-2007-002421-EKK	Jefferson	not available	Permit Issued 2007	Construct 2,590 linear ft of access road approximately 22 ft wide and install six work pads, 60 ft by 32 ft each, for the installation of 6 new guy wire foundations for the WWL radio transmission towers. Approximately 1,500 ft south of the intersection at Louisiana Highway 45 and Pritchard Road, Barataria, LA. The permittee will contribute funds to the Louisiana Coastal Restoration Fund for the restoration of 1.61 acres of fresh marsh habitat to compensate for EFH impact.	Entercom New Orleans
Permit MVN-2007-005065-EKK	Jefferson	not available	Permit Issued 2007	Deposit fill for the development of two residential lots, each consisting of a 25 ft by 50 ft elevated camp and limestone parking area. Project implementation will require the deposition of approximately 590 cy of fill material, permanently impacting approximately 0.12 acre of saline marsh. The project is located off Plum Lane, on Lots 6 and 7, in Grand Isle. The permittee will contribute funds to the Louisiana Coastal Restoration Fund for the restoration of 0.12-acre of saline marsh habitat.	Raleigh J. Galiano, Jr.
Permit MVN-2007-03463-EPP	Jefferson	not available	Permit Issued	Repair a pinhole leak on the Grand Isle Gas & Condensate Line. The line will be pressured up and tested and repaired with the use of divers. Located near Caminada Pass, approximately 6.8 miles from Grand Isle. No impacts are anticipated.	Exxon Mobil
Permit MVN-2007-04249-EPP	Jefferson	not available	Permit Issued	Reclaim land for a parking area as well as construct a bait stand with attached wharf and pier with boat slips. Located at 1018 Louisiana Highway 1, Grand Isle, 0.578 acre of Traditional Navigable Water in review area. Project implementation will require the deposition of approximately 60 cy of sand into a 0.02 acre area of tidal waters as well as 0.56 acre docking facility over tidal waters.	Chris Camardelle
Permit MVN-2007-0554-EPP	Jefferson	not available	Permit Issued	Dredge, fill, and construct pier and remove, transport, and deposit fill material at previously permitted site located at 1119 LA 1. Approximately 0.8 acre of EFH are in project area, but will not be substantially impacted.	Cheramic's Landing LLC
Permit MVN-2007-3370-EOO	Jefferson	not available	Permit Issued	Excavate and deposit fill to drive four concrete piles for a tower crane pedestal on the batture of the Mississippi River. Located along the right descending bank of the Mississippi River, mile marker 104, at Nine Mile Point.	T.T. Coatings, Inc.

*Redevelopment*

Project	Parish	Permit Type	Status	Overview	Agency/Entity/Program
Permit MVN-2007-3856-EOO	Jefferson	not available	Permit Issued	Construct a residential camp site with a dock and boat slip on an existing private canal with access to Bayou Barataria. The camp will be constructed on an existing residential lot and directly connected to a proposed second story dock with two boat slips extending 23 ft into the channel. Located off Privateer Boulevard (Highway 3257) on Kaylee Lane, in Barataria.	Duane and Cynthia Abadie
Permit MVN-2007-303-EKK	St. Charles, Jefferson, and Orleans	not available	Permit Issued	Install and maintain approximately 36.6 miles of 14-in hydrogen pipeline beginning at the Norco facility, through the Bonnet Carré Spillway, across Lake Pontchartrain, and ending at the Michoud facility in New Orleans East. As compensatory mitigation, the permittee has agreed to the enhancement and preservation of bald cypress forested wetlands on 7.0 acres at the High Point Wetlands Mitigation Area.	Air Products & Chemicals
Permit MVN-2007-002686-EOO	St. Charles	not available	Permit Issued	Construct a road, install culverts, and a ring levee, and a well pad to drill and produce the Simoneaux Well No. 001. Located approximately 5.5 miles southeast of Paradis. Potential impact on Waters of the U.S. and esuarine dependant fishery habitat. Implementation of the proposed project will impact fresh marsh wetlands via deposition of fill; as compensation for unavoidable project-related impacts, the permittee has agreed to donate funds to the Louisiana Coastal Restoration Fund for the restoration of 6.42 acres of fresh marsh habitat.	Castex Energy
Permit MVN-2007-003129-EE	St. Charles	not available	Permit Issued	Clear, grade and maintain fill to construct South Lakewood subdivision containing 85 single-family homes, roads, driveways, and sub-surface drainage. Located in the Willow Ridge area, south of Louisiana Highway 90. The 35-acre project site contains approximately 6 acres of wooded wetlands, of which all will be impacted. The restoration of 10.2 acres of offsite abandoned agricultural land has been agreed as compensatory mitigation.	RJM Enterprises
Permit MVN-2007-3286-EOO	St. Charles	not available	Permit Issued	Wheelwash, dredge, and install appurtenant structures to service Simoneaux Well No. 003. Located approximately 5.5 miles southeast of Des Allemands, on an existing oil and gas canal off Bayou Gauche and the Simoneaux Ponds. As compensation for project related impacts, the permittee will restore 3.5 acres of fresh marsh habitat, 2.6 acres of non-vegetated waterbottom and 0.03 acre of SAV will be affected.	Castex Energy
Permit MVN-2006-000857	Plaquemines	not available	Permit Issued	Clear, excavate, grade and deposit fill to construct house pads, driveways, roadways and a walking path for the purpose of developing a residential subdivision. The 207-acre site (reduced to 149 acres) is located on and east of Highway 406 along Planters Canal. Compensatory mitigation of 16.5 acres of BLH with avoidance of 2 acres of wetland on site would occur.	Parks of Plaquemines (Classic Homes)
Permit MVN-2006-2948-EFF-2	Plaquemines	not available	Permit Issued	Excavate and deposit fill to construct two recreational fishing lakes and a camp development planned in a fishing community development. Spoil to be removed from the site is presently under review by the USACE as potential material to be utilized for rehabilitation of hurricane protection levees in the Parish. Located on the south side of Highway 23, near Point Celeste. Compensation for impacts on 53 acres (previous determination of 62 acres of wet pastureland) of jurisdictional wetland pasture will be accomplished through the creation of approximately 24 acres of freshwater marsh habitat on site.	Duckland/William Nungesser, Jr.
Permit MVN-2006-3627-EOO	Plaquemines	not available	Permit Issued	Maintenance dredging and drilling structure to service proposed Cockrell No. 5 ST Well; 29.406797, -89.809647. Potential impact on approximately 0.35 acre of navigable waters in the project area.	Hilcorp Energy
Permit MVN-2006-5087-EMM	Plaquemines	not available	Permit Issued	Construct three satellite artificial reefs in West Delta Blocks 103 and 104 from three platforms that were destroyed, to enhance and maintain fishing opportunities off the coast of Louisiana. Located in the Gulf of Mexico, approximately 18 miles southeast of Southwest Pass, in West Delta Block 103 and 104.	LDWF, Artificial Reef Program

Project	Parish	Permit Type	Status	Overview	Agency/Entity/Program
Permit MVN-2006-1797-EFF	St. Charles	not available	Permit Issued	Clear, grade, excavate and fill to construct a commercial storage facility, roads, drainage amenities, and parking. Located off of Highway 90 and JB Green Road, near Boutte. Mitigation for the impacts on 4.8 acres of BLH will occur through the purchase of 4.8 acres of BLH credits from the Greenwood Mitigation Bank.	Paul Hogan
Permit MVN-2006-1020-EII	Jefferson	not available	Permit Issued	Construct and maintain a private recreational pier, 5 ft wide and 350 ft in length with a deck 10 ft by 20 ft. Approximately 0.05 acre of EFH would be affected. Beginning from Lot 32a-2b of the Bougerol subdivision, on Grand Isle, LA, extending approximately 350 ft into Caminada Bay.	Scott Robichaux
Permit MVN-2006-1724-EKK	Jefferson	not available	Permit Issued	Clear, grade, and deposit fill for the construction of Water Oaks Subdivision and extension of Dandelion Drive and is located off Live Oak Boulevard, in Waggaman. Project implementation will require the deposition of approximately 28,210 cy of fill material, permanently impacting approximately 21.49 acres of BLH wetland habitat. The permittee will restore BLH on 30 acres of abandoned agricultural land to compensate for 21.49 acres of BLH adversely affected by project.	Water Oaks Subdivision / Cliff Baldwin
Permit MVN-2006-2815-EMM	Jefferson	not available	Permit Issued	Deposit fill for the construction of a boat access and parking area. Approximately 0.03 acre of saline marsh will be filled with sand and concrete. Located off Louisiana Highway 1 near Grand Isle. The permittee will contribute funds to the Louisiana Coastal Restoration Fund for the restoration of 0.03-acre of saline marsh habitat. Proposal would not be a substantial adverse impact on EFH.	Richard L. Spaulding
Permit MVN-2006-3732-MJ	Jefferson	not available	Permit Issued	Clear, grade, excavate and deposit fill material to construct a public school, sheriff's substation and other amenities associated with a public park/playground area in Parc Des Familles located near Marrero. The permittee will compensate for the impacts on 226.6 acres of forested wetlands by the restoration of forested wetlands on 267.9 acres at the Paradis Mitigation Bank.	Jefferson Parish Department of Parc des Familles
Permit MVN-2006-3803-EMM	Jefferson	not available	Permit Issued 2006	Construct a walking pier and deck off Bienville Lane near Grand Isle. The pier will have shading effects for 0.035 acre of marsh.	Martha Ham
Permit MVN-2006-0209-EPP	Jefferson	not available	Permit Issued	Installation of six proposed dolphins affecting 60 acres at 87 First Street, Gretna, LA. A total of 900 linear ft with 0.04 acre of non-vegetated waterbottom fill area would be impacted.	John W. Stone Oil Distributer
Permit MVN-2006-1742 EKK (Lake Pontchartrain) 84	Orleans	not available	Permit Issued	Relocation of two, 20-inch pipelines, and one, 30-inch pipeline. The project is located in the GIWW, in eastern New Orleans, LA. and would impact 4.71 acres of coastal area.	Southern Natural Gas Company
Permit MVN-2005-00794 EKK (Mississippi River) 1068	St. Bernard	not available	Permit Issued	Installation and maintenance of an aggregate unloading conveyor on an existing permitted dock and construction of a levee ramp. Located on the left descending bank of the Mississippi River, at a point about 83.2 miles above Head of Passes, at Violet LA.	Violet Dock Port, Inc.
Permit MVN-2005-1498-EGG	Plaquemines	not available	Permit Issued	Locate and maintain one oil/gas jacket to enhance fishing opportunities off the coast of Louisiana. Located in the Gulf of Mexico, Main Pass Planning Area, Block 300.	LDWF, Artificial Reef Program
Permit MVN-2005-1498-EMM	Plaquemines	not available	Permit Issued	Convert Apache's Main Pass 312 platform into an artificial reef in Main Pass 300, to enhance and maintain fishing opportunities off the coast of Louisiana. Located in the Gulf of Mexico, approximately 35 miles east of Venice.	LDWF, Artificial Reef Program
Permit MVN-2005-2340-ELL	Plaquemines	not available	Permit Issued	Install and maintain appurtenant structures for drilling the SL 18148 Well #2. Located in Lake Washington, approximately 11 miles southwest of Port Sulphur, LA.	Swift Energy
Permit MVN-2004-2805-EII	St. Charles	not available	Permit Issued	Proposed development of a commercial industrial park located at the Town of St. Rose, LA.	James II, L.L.C.
Permit MVN-2004-2721-EKK	Jefferson	not available	Permit Issued	Permit modification for change in use to include soil processing and staging areas for borrow material; located north of Hwy 90 and west of Live Oak Boulevard in Avondale, LA. The proposed project would impact approximately 29 acres of coast.	Hwy-90 LLC

<b>Project Name</b>	<b>Parish</b>	<b>Permit Type</b>	<b>Date Issued/Denied</b>
Labranche Central Marsh Creation (PO-133)	St. Charles	Standard Permit	1-Sep-20
North Delacroix Marsh Creation and Terracing (BS-41)	St. Bernard	Standard Permit	Jan-20
Phoenix Marsh Creation (BS-42)	Plaquemines	Standard Permit	Jan-20
East Catfish Lake Marsh Creation and Shoreline Protection (TE-157)	Terrebonne	Standard Permit	Jan-20
Bay Raccourci Marsh Creation and Ridge Restoration (TE-156)	Terrebonne	Standard Permit	Jan-20
LaBranche East Marsh Creation CWPPRA (PO-75)	St. Charles	Standard Permit	1-Sep-19
Caminada Headlands Back Barrier Marsh Creation Increment 2 (BA-193)	Jefferson, Lafourche	Standard Permit	Apr-19
Caminada Headlands Back Barrier Marsh Creation (BA-171)	Lafourche	Standard Permit	Apr-19
East Delacroix Marsh Creation and Terracing (BS-37)	St. Bernard	Standard Permit	Feb-19
Breton Landbridge Marsh Creation (west) (BS-38)	Plaquemines	Standard Permit	Feb-19

New Orleans Landbridge Shoreline Stabilization and Marsh Creation (PO-169)	Orleans	Standard Permit	Feb-19
Bayou Decade Ridge Restoration and Marsh Creation (TE-138)	Terrebonne	Standard Permit	Feb-19
Caminada Headlands Back Barrier Marsh Creation (BA-171)	Lafourche	Standard Permit	23-Jan-19
Grand Bayou Ridge and Marsh Restoration (BA-217)	Plaquemines	Standard Permit	2019
Northeast Turtle Bay Marsh Creation and Critical Shoreline Protection (BA-206)	Jefferson	Standard Permit	2018
Lost Lake Marsh Creation and Hydrologic Restoration (TE-72)	Terrebonne	Standard Permit	30-Nov-18
Central Terrebonne Freshwater Enhancement (TE-66)	Terrebonne	Standard Permit	1-Jul-18
South Lake Lery Shoreline and Marsh Restoration (BS-16)	Plaquemines	Standard Permit	1-Jun-18
Bayou Cane Marsh Creation (PO-181)	St. Tammany	Standard Permit	Feb-18
Hydrologic Restoration and Vegetative Planting in the Des Allemands Swamp (BA-34-2)	Lafourche, St. James	Standard Permit	Feb-18
Mid Breton Land Bridge Marsh Creation and Terracing (BS-32)	Plaquemines	Standard Permit	Feb-18
Bayou Bonfouca Marsh Creation Project (PO-104)	St. Tammany	Standard Permit	20-Jan-18
Barataria Basin Landbridge Shoreline Protection, Phase 3 (BA-27c)	Jefferson	Standard Permit	2017

Bayou La Loutre Ridge Restoration and Marsh Creation (PO-178)	St. Bernard	Standard Permit	Jan-17
St. Catherine Island Marsh Creation and Shoreline Protection (PO-179)	Orleans	Standard Permit	Jan-17
Barataria Bay Rim Marsh Creation and Nourishment (BA-195)	Jefferson	Standard Permit	2016
Terracing and Marsh Creation South of Big Mar (BS-24)	Plaquemines	Standard Permit	Dec-16
Bayou Dupont Sediment Delivery - Marsh Creation #3 (BA-164)	Jefferson Plaquemines	Standard Permit	Nov-16
Northwest Turtle Bay Marsh Creation (BA-125)	terrebonne	Standard Permit	Apr-16
Marsh Creation - Terrebonne MVN-2011-00954-CM	Terrebonne	Standard Permit	28-Mar-16
East Leeville Marsh Creation and Nourishment (BA-194)	Lafourche	Standard Permit	Jan-16
Fritchie Marsh Creation and Terracing (PO-173)	St. Tammany	Standard Permit	Jan-16
Madison Bay Marsh Creation and Terracing (TE-51)	Terrebonne	Standard Permit	1-Dec-15
USFWS - Bayou Bonfouca Marsh Creation (PO-104) MVN-2012-01645-EPP	St. Tammany	Standard Permit	6-Nov-15
Grand Liard Marsh and Ridge Restoration (BA-68)	Plaquemines	Standard Permit	Aug-15
Lake Hermitage Marsh Creation (BA-42)	Plaquemines	Standard Permit	19-May-15
West Fourchon Marsh Creation & Nourishment (TE 134)	Terrebonne	Standard Permit	Jan-15

Shell Beach South Marsh Creation (PO-168)	St. Bernard	Standard Permit	Jan-15
Marsh Restoration - Plaquemines MVN-2012-000012-EOO	Plaquemines	Standard Permit	6-Jan-15
Bayou Grande Cheniere Marsh & Ridge Restoration (BA-173)	Plaquemines	Standard Permit	2014
North Lake Boudreaux Basin Freshwater Introduction and Hydrologic Management (TE- 32a)	Terrebonne	Standard Permit	Oct-14
South Shore of The Pen Shoreline Protection and Marsh Creation (BA-41)	Jefferson	Standard Permit	Jun-14
GIWW Bank Restoration Bank of Critical Areas in Terrebonne (TE-43)	Terrebonne	Standard Permit	Feb-14
Whiskey Island Back Barrier Marsh Creation (TE- 50)	Terrebonne	Standard Permit	Nov-13
Racoon Island Shoreline Protection/ Marsh Creation (TE-48)	Terrebonne	Standard Permit	13-Mar-20
Barataria Barrier Island: Pelican Island and Pass La Mer to Chalard Pass (BA-38)	Plaquemines	Standard Permit	28-Nov-12

West Belle Pass Barrier Headland Restoration (TE-52)	Terrebonne	Standard Permit	Oct-12
Jonathan Davis Wetland Protection (BA-20)	Jefferson	Standard Permit	12-Jan-12
Venice Ponds Marsh Creation and Crevasses (MR-15)	Plaquemines	Standard Permit	Nov-11
Penchant Basin Natural Resources Plan, Increment 1 -34 (TE-34)	Terrebonne	Standard Permit	24-Aug-11
South Lake De Cade Freshwater Introduction (TE-39)	Terrebonne	Standard Permit	12-Jul-11
West Lake Boudreaux Shoreline Protection and Marsh Creation (TE-46)	Terrebonne	Standard Permit	4-Apr-11
Bayou Chevee Shoreline Protection (PO-22)	Orleans	Standard Permit	Jan-11
Enhancement of Barrier Island Vegetation Demonstration (TE-53)	Terrebonne	Standard Permit	31-Dec-10

Mississippi River Sediment Delivery System - Bayou Dupont (BA-39)	Jefferson & Plaquemines	Standard Permit	May-10
Lake Borgne Shoreline Protection (PO-30)	St. Bernard	Standard Permit	4/12/2010+D59:D72
Dedicated Dredging on the Barataria Basin Landbridge (BA-36)	Jefferson	Standard Permit	15-Apr-10
North Lake Mechant Landbridge Restoration (TE-44)	Terrebonne	Standard Permit	16-Dec-09
Pass Chaland to Grand Bayou Pass Barrier Shoreline Restoration (BA-35)	Plaquemines	Standard Permit	25-Aug-09
Barataria Basin Landbridge Shoreline Protection, Phase 1 and 2 (BA-27)	Jefferson & Lafourche	Standard Permit	Mar-09
Goose Point/Point Platte Marsh Creation (PO-33)	St. Tammany	Standard Permit	12-Feb-09
New Cut Dune and Marsh Restoration (TE-37)	Terrebonne	Standard Permit	30-Sep-08
Terrebonne Bay Shore Protection Demonstration (TE-45)	terrebonne	Standard Permit	Nov-07

Bayou Dupont Sediment Delivery - Marsh Creation #3 and Terracing (BA-48)	Jefferson and Plaquemines	Standard Permit	Jul-07
Little Lake Shoreline Protection/Dedicated Dredging Near Round Lake (BA-37)	Lafourche	Standard Permit	30-Mar-07
Delta Management at Fort St. Philips (BS-11)	Plaquemines	Standard Permit	14-Dec-06
Barataria Basin Landbridge Shoreline Protection, Phase 4 (BA-27d)	Jefferson	Standard Permit	26-Apr-06
Timbalier Island Dune and Marsh Restoration (TE-40)	Terrebonne	Standard Permit	Jun-05
Delta Wide Crevasses (MR-09)	Plaquemines	Standard Permit	1-May-05
Hopedale Hydrologic Restoration (PO-24)	St. Bernard	Standard Permit	15-Jan-05
West Bay Sediment Diversion (MR-03)	Plaquemines	Standard Permit	28-Nov-03
Mandalay Bank Protection Demonstration (TE-41)	Terrebonne	Standard Permit	1-Sep-03
Caernarvon Diversion Outfall Management (BS-03a)	Plaquemines	Standard Permit	Jun-02
Dustpan Maintenance Dredging Operation for Marsh Creation in the Mississippi River Delta Demonstration (MR-10)	Plaquemines	Standard Permit	Jun-02

Chandeleur Islands Marsh Restoration (PO-27)	Plaquemines, St. Bernard	Standard Permit	Jul-01
Vegetative Plantings of a Dredged Material Disposal Site on Grand Terre Island (BA-28)	Jefferson	Standard Permit	Jul-01
Thin Mat Floating Marsh Enhancement Demonstration (TE-36)	terrebonne	Standard Permit	May-01
Barataria Bay Waterway East Side Shoreline Protection (BA-26)	Jefferson	Standard Permit	May-01
Fritchie Marsh Restoration (PO-06)	St. Tammany	Standard Permit	Feb-01
Barataria Bay Waterway West Side Shoreline Protection (BA-23)	Jefferson	Standard Permit	Nov-00
GIWW (Gulf Intracoastal Waterway) to Clovelly Hydrologic Restoration (BA-02)	Lafourche	Standard Permit	Oct-00
Whiskey Island Restoration (TE-27)	Terrebonne	Standard Permit	Jun-00
Brady Canal Hydrologic Restoration (TE-28)	Terrebonne	Standard Permit	May-00

East Timbalier Island Sediment Restoration, Phase 1(TE-25)	Terrebonne	Standard Permit	Jan-00
East Timbalier Island Sediment Restoration, Phase 2 (TE-30)	Terrebonne	Standard Permit	Jan-00
Isles Dernieres Restoration Trinity Island (TE-24)	Terrebonne	Standard Permit	Jun-99
Isles Dernieres Restoration East Island (TE-20)	Terrebonne	Standard Permit	Jun-99
Lake Chapeau Sediment Input and Hydrologic Restoration, Point Au Fer Island (TE-26)	Terrebonne	Standard Permit	May-99
Mississippi River Gulf Outlet (MRGO) Disposal Area Marsh Protection (PO-19)	St. Bernard	Standard Permit	Jan-99
Barataria Bay Waterway Wetland Restoration (BA-19)	Jefferson	Standard Permit	Dec-98
West Belle Pass Headland Restoration (TE-23)	Terrebonne	Standard Permit	Jul-98

Lake Salvador Shore Protection Demonstration (BA-15)	St. Charles	Standard Permit	Jun-98
Channel Armor Gap Crevasse (MR-06)	Plaquemines	Standard Permit	Nov-97
Raccoon Island Breakwaters Demonstration (TE-29)	Terrebonne	Standard Permit	31-Jul-97
Bayou Sauvage National Wildlife Refuge Hydrologic Restoration, Phase 2 (PO-18)	Orleans	Standard Permit	5/28/1997+D98:D104
Point au Fer Canal Plugs (TE-22)	Terrebonne	Standard Permit	May-97
Falgout Canal Planting Demonstration (TE-17)	terrebonne	Standard Permit	Dec-96
Vegetative Planting, Timbalier Island Demonstration (TE-18)	Terrebonne	Standard Permit	Jul-96
Bayou Sauvage National Wildlife Refuge Hydrologic Restoration, Phase 1 (PO-16)	Orleans	Standard Permit	May-96

Status	Description
--------	-------------

**CWPPRA**

Engineering/Design	Marsh creation, total project area: 902 acres; AAHUs: 309; acres created/restored: 731; acres protected: 0
Engineering/Design	Create and nourish marsh and construction 8,548 linear feet of terraces utilizing a layout to help protect the community of Delacrois. Sediment would be hydraulically dredged from Lake Lery and placed into 2 confined disposal areas. Project Area 411 acres; AAHU: 134; Acres created/restored: 294; Acres protected: 0
Engineering/Design	Restore marsh in the open water areas between Bayou la Croix and River aux Chenes through the placement of dredged material via hydraulic dredging. Project Area: 392 acres; AAHU 107; Acres created/restored: 297; Acres protected: 0
Engineering/Design	Restore marsh in open water areas east and south of Catfish Lake; Restore and protect the eastern and southern Catfish Lake Shoreline. Total Project Area: 306 acres; AAHU: 132; Acres created/restored: 248; Acres Protected: 0
Engineering/Design	Create and nourish marsh with sediments dredged from Lake Mechant and confined with earthen dikes. Total project area: 461 acres; AAHU: 135; Acres created/restored: 343; Acres Protected: 0
Awaiting Construction Funding	Marsh creation, between Lake Pontchartrain and I-10, bounded on the west by the Fall Canal and the Bayou LaBranche Wetland Creation Project (PO-17) and the east by a pipeline canal. Total project area: 931 acres; AAHUs: 339; acres created/restored: 715; acres protected: 0
Construction funds approved. Project combined with BA-171	Marsh Creation total Project Area: 444; AAHU 142; Acres created/restored 207; Acres Protected: 0; Total Net Acres 207
Construction Funds Approved. Project combined with BA-193	Marsh creation, total project area: 928 acres; AAHUs: 269; acres created/restored: 379; acres protected: 0
Engineering/Design	Crate and nourish marsh and construction terraces utilizing a layout of help rprotect the community of Delacroix. Project Area: 597 acres; AAHU 140; Acres created/restored: 314; Acres protected: 0
Engineering/Desgin	Restore marshes and bank lines along the south side of Grand Lake via confined disposal areas of sediment dredged from Grand Lake. Project Area: 423; AAHU: 107; Acres created/restored 372; Acres protected: 0

Under Construction	Restore and protect marsh and to protect shoreline by armoring lakeshore containment dikes. Project Area 271 acres; AAHU 94; Acres created/restored 167; Acres Protected: 0
Construction Funding approved	Create and nourish marsh adjacent of Lake De Cade and restore ridge habitat along the northern bank of Bayou De Cade. Project areas: 517 acres; AAHU: 133; Acres created/restored: 378; Acres Protected: 0
FC 8/20/2018	CPRA - Marsh Creation - Lafourche MVN2014-02026-CE
Engineering/Design	Marsh Creation, Project Area: 719; AAHU: 171; Acres created/restored: 336; Acres Protected: 0
Engineering/Design	Marsh Creation, Project Area 687; AAHU: 183; Acres created/restored: 367; Acres protected: 5
Construction Complete	Create approximately 465 acres around Lake Paigie, north of Bayou DeCade and along the northwestern Lost Lake shoreline. Total project area: 7312 acres; AAHUs: 266; acres created/restored: 452; acres protected: 113
Transferred Project features are being incorporated into the Restore Act Project: Bayou Dularge Ridge, Marsh, and Hydrologic Restoration.	Reestablish historic hydrologic and salinity conditions by reducing the artificial intrusion of Gulf marine waters via the Grand Pass into the Central Terrebonne marshes while enhancing the influence of the Atchafalaya River waters into the area. Total project area: 48446 acres; AAHUs: 470, acres; created/restored: 0; acres protected: 456; Total Net Acres: 456
In construction; on-going concerns related to erosion along lake rim embankments	Marsh creation, total project area = 551 acres, AAHUs = 159, acres created/restored = 409, acres protected = 0
Engineering/Design	Fill 384 acres of shallow open water and nourish 65 acres of fragmented marsh with hydraulically dredged material from Lake Pontchartrain.. Marsh Restoration Project Area: 449 acres; AAHU: 112; Acres created/restored: 356; Acres Protected: 0
Construction Complete	Hydrologic Restoration Project Area: 2394; AAHU 530; Acres Created/Restored: 0; Acres Protected: 0;
Engineering/Design	Maintain/restore the landbridge between the Bayou Terre aux Boeufs and River aux Chenes ridges by restoring critical wetlands. Marsh Creation, project area: 792; AAHU: 121; Acres created/restored: 364; Acres protected: 0
Construction Complete	Create and nourish marsh in open water areas adjacent to Bayou Bonfouca with sediment pumped from Lake Pontchartrain. Marsh creation total project area: 621 acres; AAHUs: 202; acres created/restored: 478; acres protected: 0
Construction Complete 11/20/2018 *	Shoreline Protection, total project area = 2,380 acres, AAHUs = 101, acres created/restored = 0, acres protected = 264

Engineering/Design	Create ridge feature with material from bucket dredging Bayou La Loutre. Dredged material from Lake Borgne to create marsh. Project Area: 453 acres; AAHU: 104; Acres created/restored: 187; Acres Protected: 0
Engineering/Design	Extend the Bayou Chevee (PO-22) rock dike along 33,324 LF of weakened Lake Pontchartrain shoreline. A 6,468 LF foreshore dike and 13,851 LF revetment totaling 20,319 LF is proposed to be built along a portion of the Bayou Sauvage NWR. Project Area: 339 acres; AAHU: 91; Acres created/restored: 120; Acres Protected: 94
Phase I Engineering/Design	March Creation Project Area: 520; AAHU 158: Acres created/restored 251; Acres protected 0
Construction Funds requested	Crete Terraces in shallow open water south of Big Mar. Terraces will reduce wave fetch in large open water area and promote growth of marsh vegetation and SAV. Marsh creation, total project area = 969 acres, AAHUs = 63, acres created/restored = 314, acres protected = 0
Construction Complete 29-Jun-2017 (Actual)	Marsh creation, total project area: 323 acres; AAHUs: 47; acres created/restored: 296; acres protected: 0
Project Start; Under Construction Completion 1-Mar-2020 *	Marsh creation, total project area: 798 acres; AAHUs: 221; acres created/restored: 432; acres protected: 0
FC 10/7/2015	GeoEngineers - Lost Lake Marsh Creation & Hydrologic Restoration Project (TE-72)
Phase I Engineering/Design	Marsh Creation, total project area: 484; AAHU 185; Acres created/restored: 322; Acres Protected: 0
Engineering/Design	Marsh Restoration and Creation: Project Area: 882 acres; AAHU: 141; acres created/restored: 290; Acres Protected: 0
NMFS intends to seek Phase 2 authorization in December 2014 INACTIVE	Marsh creation, total project area: 943 acres; AAHUs: 187; acres created/restored: 333; acres protected: 1; Total Net Acres: 334
FC 1/11/2013	Bayou Bonfouca Marsh Creation - St. Tammany
Construction Complete 10/1/2015 (Actual)	Marsh creation within the Bastian Bay and Grand Liard mapping units, near the vicinity of Triumph; total project area: 484 acres; AAHUs: 188; acres created/restored: 370; acres protected: 0
Construction Complete	Marsh creation in West Pointe a la Hache Mapping Unit, total project area: 1,600 acres; AAHUs: 211; acres created/restored: 441; acres protected: 6
Engineering/Design	Create 295 acres and nourish 242 acres of open water, emergent saline smooth cordgrass marsh and black mangrove habitat using material dredged from the Gulf of Mexico, southwest of the project area. Containment dikes were constructed along the boundaries to contain the material. Total Project Area: 614 acres; AAHU: 195; Acres created/restored: 304; Acres Protected: 0

Engineering/Design Complete 30-Sep-2019 *	Construction	Create and nourish marsh using dredged sediment from Lake Borgne. Existing high shorelines along Lake Borgne, remnants of previous containment dikes and marsh edge, would be used for containment to the extent practical. Containment dikes would be breached/gapped as needed to provide tidal exchange. Project Area 634 acres; AAHU: 184; Acres created/restored: 344; Acres Protected: 0
FC 12/9/2014		USFWS - South Lake Lery Shoreline and Marsh Restoration BS-16
Engineering/Design		Restore marsh habitat adjacent to the eastern shoreline of Bayou Grande Chenier, reestablish the corresponding section of the bayou's forested ridge habitat along this shoreline, and create terraces to restore marsh in open water habitat. Total project area: 486 acres; AAHUs: 129; acres created/restored: 237; acres protected: 0
Construction Complete 10/1/2014 (Actual)		Reduce deterioration and loss of area marshes by seasonally introucing fesh water from the Houma Navigation Canal. This project includes the construction of a freshwater conveyance channel with water managment gates and the installation of seveal outfall management structures to allow drainage and reduce ponding of water. Total project area: 9795 acres; AAHUs: 595; acres created/restored: 0; acres protected: 266; Total Net Acres: 266
Construction Complete 6/6/2012 (Actual)		Shoreline protection and marsh restoration, located in the vicinity of Bayou Dupont and the Barataria Bay Waterway, total project area: 141 acres; AAHUs: 44; acres created/restored: 55; acres protected: 51
Construction Complete 2/1/2014 (Actual)		Restore critical lengths of deteriorated channel banks and stabilize/armor selected lengths of channel banks with hard shoreline stabilization materials. Total project area: 355 acres; AAHUs: 23; acres created/restored: 39; acres protected: 26; Total Net Acres: 64
Construction Complete 6/18/2010 (Actual)		Increase longevity of the prviously restored and natural portion of the island by increasing the island's width. Increasing the island's width will help to retain sand volume and elevation. Marsh creation, total project area: 1038 acres; AAHUs: 292; acres created/restored: 272; acres protected: 0; Total Net Acres: 272
Construction Complete 4/27/2013 (Actual)		Marsh creation, total project area = 502 acres, AAHUs = 64, acres created/restored =55, acres protected = 16, Total Net Acres=71
Construction Complete		Barrier island restoration along two sections of the Plaquemines/Barataria Shoreline. Chaland Headland segment and Pelican Island project; total project area: 1,117 acres; AAHUs: 287; acres created/restored: 334; acres protected: 0

Construction Complete 6/4/2013 (Actual)	Reestablish the West Belle headland by rebuilding a large portion of the beach, dune, and back barrier marsh. Approximately 9800 feet of beach and dune was rebuilt using 2.8 mcu of dredged sand and 150 acres of marsh habitat rebuilt using 1.4 mcu of dredge material. The area was planted. Total project area: 48446 acres; AAHU 407; acres created/restored: 0; acres protected: 456
Construction Complete	Hydrologic reestoration; 4 units; total project area = 7,199 acres, AAHUs = 485, acres created/restored = 0, acres protected = 510
Engineering/Design completed. Awaiting construction funding	Create marsh in open water areas by depositing material acquired through dedicated dredging and constructing crevasses. Project Area: 917 acres; AAHU 85; Acres created/restored: 318; Acres Protected: 0
Construction Complete	Project will combine the long-term realignment of Penchant Basin hydrology with reestoration and protection measures aimed at maintaining the physical integrity of the area during the transition toward greater riverine influence. Hydrologic restoration, total project area: 80719 acres; AAHUs: 521; acres created/restored: 35; acres protected: 640; Total Net Acres: 675
Construction Completion	Install three control structures along the south rim of the lake and enlarging Lapeyrouse Canal to allow the controlled diversion of Atchafalyaya River water, nutrients, and sediments south into project area marshes. Freshwater Introduction, total project area: 1685 acres; AAHUs: 61; acres created/restored: 0; acres protected: 202; Total Net Acres: 202
Construction Complete	Reduce erosion of the west Lake Boudreaux shoreline to protect marsh and SAV, maintain shallow open water habitat west of the lake rim, create marsh along the southwestern shoreline of Lake Boudreaux and interior marsh through deposit of dredged material. Marsh creation, total project area: 1207 acres; AAHUs: 129; acres created/restored: 157; acres protected: 120; Total Net Acres: 277
Construction Complete 12/17/2001 (Actual)	Construct rock dike across the mouth of the north cove and south cove. New dikes would tie into an existing USFWS rock dike. Total project area: 212 acres; AAHUs: 42; acres created/restored: 0; acres protected: 75
Construction Complete	Test several technologies and/or products to enhance the cost-effective establishment and growth of key barrier island and salt marsh vegetation. Humic acid and broadcast fertilization regimes were applied to jump start and facilitate the rapid establishment and expansion of vegetation.

Construction Complete 6/3/2010 (Actual)	Marsh Creation, Dredged Material, adjacent to Bayou Dupont and southeast of Cheniere Traverse Bayou, total project area: 471 acres; AAHUs: 159; acres created/restored: 326; acres protected: 0
Construction Complete	Preventing and reducing Lake Borgne shoreline retreat in the areas adjacent to Old Shell Beach and Bayou Dupre to mitigate further joining of the lake and MRGO; reestablish a sustainable lake rim and prevent or reduce conversion of emergent marsh to open water. Construct continuous breakwaters to prevent shoreline erosion. Total project area: 192 acres; AAHUs: 61; acres created/restored: 0; acres protected: 165
Construction Complete	Marsh creation, Barataria Basin southern end of Bayous Perot and Rigolettes on both sides of the Harvey Cut. Marsh Creation, total project area: 1245; AAHUs: 337; acres created/restored: 605; acres protected: 0
Construction Complete	Dredged material from northern Lake Mechant will be used to create marsh. Marsh plants planted along shorelines of Lake Mechant, Goose Bay and Lake Pagie. Repair breeches formed by erosion and oilfield access canals which threaten the integrity of the landbridge. Total project area: 7571 acres; AAHUs: 367; acres created/restored: 408; acres protected: 196; Total Net Acres: 604
Construction Complete	Barrier island restoration, in the Barataria Basin, between Pass Chalard and Grand Bayou Pass; total project area = 596, AAHUs = 208, acres created/restored = 253, acres protected = 10
Construction Complete 5/5/2009 (Actual)	Shoreline protection in western Jefferson Parish and eastern Lafourche Parish, Louisiana, on the western shoreline of Bayou Perot and the east/southeastern shoreline of Bayou Rigolettes
Construction Complete	Marsh creation on the north shore of Lake Pontchartrain between Fontainebleu State Park and Louisiana Highway 11 and within the Big Branch Marsh NWR. Total project area = 1384 acres, AAHUs = 297, acres created/restored = 424, acres protected = 12
Construction Complete	Close breach between Trinity and East Islands through the direct creation of beach, dune and marsh habitat. Project also lengthened the structural integrity of eastern Isles Dernieres by restoring the littoral drift by adding sediment into the nearshore system. Total project area: 386 acres; AAHUs: 43; acres created/restored: 27; acres protected: 75; Total Net Acres: 102
Construction Complete 19-Dec-2007 (Actual)	Maintain shoreline integrity along Terrebonne Bay. This demonstration project would seek to demonstrate the cost and effectiveness of alternative shore protection methods including artificial oyster reefs. Three techniques were chosen - gabion mats, concrete onshore armor units and foreshore triangle units

Construction Complete	Marsh creation in Barataria Basin, Total Project area 309 acres; 10.2 Acres Ridge Habitat; Construct both marsh and ridge features from Sediment pumped from Bayou Dupont. AAHU 108; Acres Created/Restored 186
Construction Complete	Marsh creation and shoreline protection; total project area: 1,373 acres; AAHUs: 348.57; acres created/restored: 409; acres protected: 304
Construction Complete	Sediment and nutrient trapping, outfall management; total project area = 1,305 acres, AAHUs = 77, acres created/restored = 267, acres protected = 0
Construction Complete	Shoreline Protection, total project area = 589 acres, AAHUs = 93, acres created/restored = 0, acres protected = 256
Construction Complete 19-Mar-2009 (Actual)	Restore the eastern end of Timbalier Island through the direct creation of dune and marsh habitat. Area A was restored through direct creation of dune and marsh on the east end of Timbalier Island. Area B was enhanced through addition of sediment into the nearshore system. Total project area: 663 acres; AAHUs: 124; acres created/restored: 161; acres protected: 112; Total Net Acres: 273
Construction Complete	Maintain existing crevasse splays, construct new crevasse splays and plugs and future maintenance of selected crevasse splays in both the Pass a Loutre WMA and the Delta NWR. Water diversion; total project area = 5,210 acres, AAHUs = 927, acres created/restored = 2,298, acres protected = 88
Construction Complete	Replace collapsed culverts near Yscloskey that will allow tidal water to move. Total project area: 3,805 acres; AAHUs: 269; acres created/restored: 0; acres protected: 134
Construction Complete	Restore vegetated wetlands in shallow open water. Project diverts sediments to create marsh in the West Bay Area. Water diversion; total project area = 12,910 acres, AAHUs = 4,912, acres created/restored = 9,831, acres protected = 0
Construction Complete	Develop new techniques for protecting and restoring easily erodable organic soils. Intact banks and breakthroughs will be treated to determine the cost effectiveness of demonstrated approaches.
Construction Complete	Outfall management; total project area = 15,556 acres, AAHUs = 504, acres created/restored = 802, acres protected = 0
Construction Complete	Project demonstrated the safe operation of a dustpan hydraulic dredge in the Head of Passes reach of the Mississippi River. This demonstration enables the use of this type of dredge for the maintenance of this reach and additional opportunity for the beneficial use of the dredge material. Demonstration projects restored 40 acres of marsh

Construction Complete	Provide stabilization to 364 acres of unvegetate washover deposits on 22 overwash fan sites through plantings. Total project area: 504 acres; AAHUs: 194; acres created/restored: 220; acres protected: 0
Construction Complete	Vegetative Planting, total project area = 297 acres, AAHUs = 73, acres created/restored = 100, acres protected = 27
Construction Complete	Demonstration project evaluated specific techniques for enhancing existing thin-mat floating marsh, or flotant. The effects of sediment availability and water movements on thin-mat were also studied. Goal to induce the development of thick-mat, continuously floating marsh from a thin-mat flotant at four sites using various combinations of treatments that include fertilication, herbivory reduction, and the transplanting of healthy, thick-mat marsh plugs into the thin-mat flotant.
Construction Complete	Shoreline Protection, total project area = 2,790 acres, AAHUs = 128, acres created/restored = 0, acres protected = 217
Construction Complete	Restore natural hydrologic regime by enlarging the Salt Bayou culvert under Highway 90. This would increas flow of fresh water nutrients and sediment from the West Pearl River. Marsh creation, total project area = 5,924 acres, AAHUs = 201, acres created/restored = 0, acres protected = 1,040
Construction Complete	Shoreline Protection, total project area = 1,789 acres, AAHUs = 63, acres created/restored = 0, acres protected = 232
Construction Complete	Hydrologic restoration; total project area = 14,948, AAHUs = 885, acres created/restored = 0, acres protected = 175
Construction Complete	Create 657 acres of back island marsh, including breach closure of Coupe Nouvelle, using material dredged from teh bay north of hte island. Plant vegetationin the Coupe Nouvelle marsh restoraition area and in the restored back bay marsh areas. Added sand fencing on the dune to halp capture and retain wind blown sand. Total project area: 4926 acres; AAHUs: 549; acres created/restored: 447; acres protected: 792; Total Net Acres: 1239
Completion	Replace and maintain weirs, constructed a rock plug, stabilize channel cross-sections, and restore and maintain channel banks. These measures will maintain and enhance existing marshes in areas. Along the southern boundary bank restoration and water control structures are used to reduce tidal flow rate from channels into interior poinds, helping ot improve the retention of sediment and fresh water. Total project area: 7653 acres; AAHUs: 337; acres created/restored: 0; acres protected: 297; Total Net Acres: 297

Construction Complete	Dredge 2.8 mcy of sediment to establish a 200-foot wide dune and a 600-foot wide marsh along the length of the island. Construct 13,000 feet of sand fence and plants. Total project area: 45102 acres; AAHUs: 319; acres created/restored: 37; acres protected: 1876; Total Net Acres: 1913
Construction Complete	Dredge 2.8 mcy of sediment to establish a 200-foot wide dune and 600-foot wide marsh along the length of the island and construction of 7,000 feet of rubble mound revetment to protect the newly created habitats. Total project area: 9330 acres; AAHUs: 140; acres created/restored: 61; acres protected: 154; Total Net Acres: 215
Construction Complete	Restoration of 7.5 miles of Trinity and East islands. Constructed temporary perimeter containment dikes behind the islands. Dredged sediment from Lake Pelto borrow areas was used to fill areas within the retaining dunes and dike structures. Total project area: 776 acres; AAHUs: 120; acres created/restored: 49; acres protected: 60; Total Net Acres: 109
Construction Complete	Restoration of 7.5 miles of both Trinity and East island. Construction of temporary perimeter containment dikes behind stretches of islands. Dredging of sediment from borrow areas of Lake Pelto and used to hydraulically fill the areas within the retaining dunes and dike structures. Create an elevated marsh platform sloping from the dunes to the back bay dikes. Total project area: 449 acres; AAHUs: 45; acres created/restored: 9; acres protected: 0, Total Net Acres: 9
Construction Complete	Reestablish hydrologic control points, reducing tidal fluctuations that cause erosion and scouring of interior marsh. Dredge 850,000 cy from Atchafalaya Bay and spread to create 60 acres of marsh. Total project area: 13024 acres; AAHUs: 468; acres created/restored: 194; acres protected: 315; Total Net Acres: 509
Construction Complete	Repaired wave and storm damage to earthen back dike south of La Loutre Ridge. Marsh preservationMarsh creation, total project area = 855 acres, AAHU: 435, acres created/restored: 0; acres protected: 755
Construction Complete	Marsh creation, total project area = 510 acres, AAHUs = 151, acres created/restored = 445, acres protected = 0
Construction Complete	1.5 mcy of material were dredged from Bayou Lfourche and used to build 184 acres of marsh on the west side of Belle Pass. Additional material was placed on the shore for beach nourishment. Total project area: 2459 acres; AAHUs: 216; acres created/restored: 162; acres protected: 312; Total Net Acres: 474

Constructon Complete	Located on the SW end of Lake Salvador near Des Allemands. Phase 1 of the project tested four types of shoreline protection structures along a section of the northern lakeshore to determine their effectiveness in reducing erosion. Phase 2 constructed a 9,000 foot rock shoreline stabilization structure along a section of the western lakeshore to protect the shoreline and adjacent marsh from wave-induced erosion. Project Area 1200 acres
Construction Complete	Sediment diversion; total project area = 2,097 acres, AAHUs = 234, acres created/restored = 611, acres protected = 325
Construction Complete	Constructed eight segmented breakwates along the eastern end of the island to reduce the rate of shoreline retreat, promote sediment deposition along the beach, and protect seabird habitat
Construction Complete	Pumps installed to lower water levels during the growing season so that vegetative growth would be promoted. Total project area: 5,475 acres; AAHUs: 584; acres created/restored: 750; acres protected: 530
Construction Complete	Phase 1 is a series of wooden plugs reinforced with oyster shells constructed in two major natural gas/oil pipeline canals on the eastern half of the Point Au Fer Island. Phase 2 is the construcion of a rock shoreline stabilization structures along a thin stretch of beach reestablishing the natural hydrology of the island. Total project area: 5230 acres; AAHUs: 158, acres: created/restored: 0; acres protected: 375; Total Net Acres: 375
Construction Complete	Plants were planted along the northern bank of Falgout Canal to pervent the canal shoreline from breaching and exposing interior marshes to salwater intrusion. Six types of wave damping structures were constructed along the northern bank to protect vegetative planting from boat wake erosion.
Construction Complete	Construct sand dune fencing segments totaling approxijately 7,390 linear feet to trap sand and increase elevation on several bare-beach or overwash sites. Plants were planted in selected setments to help maintain integrity of barrier island.
Constructoin Complete	Install two 48-inch pumps in northern and southern units of the project area to drain surplus water caused by excess rainfall to promote growth of fresh marsh vegetation. A weir in Bayou Thomas will allow the units to be managed independently. Total project area: 3,800 acres; AAHUs: 520, acres; created/restored: 1,050; acres protected: 500

Construction Complete	Create 70% land and 30% water within 5 years of construction. Depositing 2.7 mcy of sediments dredged from Lake Pontchartrain within an earthen containment berm. Total project area: 487 acres; AAHUs: 191; acres created/restored: 203; acres protected: 0
Transferred from CWPPRA Program on 25-Oct-07	Freshwater diversion; total project area = 9,435 acres, AAHUs = 560, acres created/restored = 620, acres protected = 0
Transferred from CWPPRA Program	Water diversion; total project area = 36,121 acres, AAHUs = 8,486, acres created/restored = 0, acres protected = 5,438
Awaiting Construction Funding INACTIVE	Marsh creation, total project area = 1249 acres, AAHUs = 269, acres created/restored = 195, acres protected = 0, Total Net Acres=195
Engineering/Design Project Status Last Updated: 22-Sep-2017	Create marsh habitat and reestablish the northern shoreline of Catfish Lake. Sediment dredged from Catfish Lake was used to strategically create marsh along the northern shoreline. Plants were planted along the lake shore-face to help stabilize the shoreline. Dredged sediments created 415 acres of marsh habitat and nourished an additional 251 acres of marsh. Total project area: 666 acres; AAHUs: 256; acres created/restored: 401; acres protected: 0
Engineering/Design	Create 364 acres and nourish 19 acres of saline marsh. Sediment was hydraulically pumped from a borrow source near Lake Felicity. Containment dikes were constructed around the marsh creation area to retain sediment during pumping area which were degraded and/or gapped later. Total project area: 383 acres; AAHUs: 166; acres created/restored: 312; acres protected: 0
FC 7/5/2019	CPRA - Marsh Creation

## CIAP

	Provide protection to approximately 21 miles of shoreline in St. Bernard parish from Eloi Point to the mouth of Bayou La Loutre around Lydia Point and Pauline Point and around the southern shore of Treasure Bay by installing living shoreline products
Completion Anticipated	Development of a strategic framework for feasibility evaluation of improved management of freshwater, nutrients, and sediment resources of the Lower Mississippi River
Completion Anticipated	Evaluation for effectiveness of restoration project features constructed with either parish or State funds through the CIAP
FC	CPRA - Living Shorelines at Grand Isle, State Project PO-148

Construction Complete	This initiative is part of an overall strategy for restoring, protecting, and conserving Louisiana's coastal forest system
Construction Complete	Establishment of an appropriate long-distance pipeline capability for conveying Mississippi River sediment for land building
FC 9/14/2015	Lafourche Parish Government - CIAP 2007 - Small Dredge Project Marsh Creation - Lafourche
FC 2/9/2015	Lake Lery Marsh Creation Project, Bayou Terre Aux Boeufs
Design Completed	Dredge sediment from Lake Lery and use the dredged material to create a nearly continuous strip of marsh platform along the western bank of Bayou Terre Aux Boeufs, place a rock dike along the northern and eastern shoreline on Lake Lery. Total project area: 212 acres; AAHUs: N/A, acres created/restored: Create approximatel. 212 acres of brackish marsh, protect and nourish more than 300 additional acres, and protect approximately 5 miles of ridge habitat, approximately 5 miles of shoreline protected
FC 7/27/2014	Lafourche Parish Government - 2007 - Small Dredge Project Marsh Creation
Construction Complete	Installing approximately 10,500 linear ft of rock dike at or near the +1.0 ft NAVD 88 contour on the existing shoreline. Total project area = 10,500 linear ft, AAHUs = N/A, acres created/restored = N/A, acres protected = N/A
Construction Completion Anticipated	Proposed wetland restoration project will integrate sustainability with mitigation measures
Completed	Create a rock dike with gaps for fish and public access to the lakeshore to stop the shoreline eroding at 2.9 acres per year. Total project area = 7,535 ft of shoreline, AAHUs = N/A, acres created/restored = N/A, acres protected = N/A
Completed	Create a rock dike with gaps for fish and public access to the lakeshore that exstends in an easterly and westerly direction from the Reserve Relieve Canal. Total project area: ,400 linear ft of shoreline, AAHUs: N/A, acres; created/restored: N/A; acres protected: N/A
Completed	Dredging drainage canals to restore approximately 300 acres of wetland area seaward of the back levee toe. Total project area: multiple project areas ranging in size from 10 to 50 acres, AAHUs: N/A; acres created/restored: approximately 300 acres created
Construction Complete	Building a V-shaped rock revetment which would be filled with dredged material from Bayou Rigaud and planted with appropriate Marsh vegetation, total project area: 1,000 linear feet with a head width of 200 feet; AAHUs: N/A; acres created/restored: 6 acres; acres protected: 2,200 linear ft of rock dike protection

Construction Complete	Dredging of the Jump Basin Marina and beneficial use of that material to restore marsh across from Tidewater Road. Total project area: N/A; AAHUs: N/A; acres created: 4 to 7 acres; acres protected: N/A
Construction start: January 2011, Complete	Construction of approximately 50,000 feet of rock breakwater and restoration approximately 220 acres of marsh with dredged material in the Golden Triangle area bounded by the MRGO, the GIWW, and the western shore of Lake Borgne
Completed	Installing approximately 2,150 linear ft of rock dike and the construction of a 130 ft long timber pile bridge at the mouth of Bayou LaBranche. Total project area: 2,150 linear ft; AAHUs: N/A; acres created/restored: N/A; acres protected: N/A
Construction Complete	Reduce erosion on the bay side of Grand Isle by constructing 1.5 mile of breakwater, total project area: 1.5 miles; AAHUs: N/A; acres created/restored: N/A; acres protected: 1.5 miles
Construction Start	Build rock dikes and install water control structure to limit saltwater intrusion for segment 1. Segment 2 will include building protective barrier around water tanks then filling with sediment to be overlaid with concrete. Total project area: two segments: segment 1 extends south 1.5 mi along Bayou Barataria and west 0.25 mi along Bayou Rigolettes. Segment 2 is area directly adjacent to Grand Isle water tanks on north end of Bayou Barataria, AAHUs: N/A, acres created/restored: N/A; acres protected: shoreline of Barataria Waterway
Construction Complete	The project area includes 2,590.4 contiguous acres of coastal wetland forest, specifically bald cypress-tupelo swamp, with roughly 200 acres fronting the western edge of Lake Maurepas
Construction Complete	Approximately 8,000 linear ft of additional shoreline protection would be added along the west side of Goose Bayou to its intersection with Cypress Bayou, a dedicated dredge would then deposit material to restore the historical ridge that would be planted with woody vegetation. Total project area: benefit 1,200 acres of freshwater marsh, acres created/restored: 50 acres of wooded ridge, acres protected: shoreline protection of 1,650 feet along Goose Bayou
Construction Completion	Dredging to create 30 to 40 acres of wetlands, enhance or nourish 70 to 100 acres of marsh, and plant two rows of smooth cordgrass along 500 ft of NW Little Lake shoreline. Total project area: Northwest Little Lake Shoreline, acres created/restored: create approximately 30 to 40 acres, enhance or nourish 70 to 100 acres, and plant two rows of smoothgrass for 7,500 ft, acres protected: 15 to 20 acres

Completed	Acquisition of wetland to preserve this property from future commercial or residential development. Total project area = 27.2 acres, AAHUs = N/A, acres created/restored = N/A, acres protected = N/A
Construction Complete	Beneficial use of dredged material to restore coastal wetlands
Completed:	Tidewater Road is outside of levee protection and is the last stretch of road before the Gulf that is constantly flooded; flood protection for the road will be created. Total project length: 3 miles, AAHUs: N/A, acres created/restored: N/A; acres protected: N/A
Construction Complete	1.8 million cy of beach fill and 1.7 million cy of marsh fill for beach/dune and marsh restoration
Construction Completion	Using a small dredge to hydraulically dredge borrow canals and other open water areas to restore approximately 175 acres of marsh apron along levees, cheniers, and roadways. Total project area: N/A, AAHUs: N/A; acres created/restored: approximately 175; acres protected: N/A
Completed	Upgrade of the existing wastewater treatment plant and construction of a discharge structure and piping system for wetland assimilation. Total project area = 1.7 sq miles of uninhabited wetland, AAHUs = N/A, acres created/restored = N/A, acres protected = N/A
Construction Complete	Purchase approximately 615 acres of existing wetland from the Bayou Chevreuil Land Co LLC. Total project area = N/A, AAHUs = N/A, acres created/restored = N/A, acres protected = 242 acres of healthy cypress swamp and 373 acres of bottomland hardwood forest.
Completed	Construct a waterline booster pump station in Convent, LA. Total project area: N/A, AAHUs: N/A; acres created/restored: N/A; acres protected: N/A
Construction Complete	Shoreline protection located near Bayou des Allemands along the northwestern Lake Salvador shoreline tying into the western BA-15 CWPPRA shoreline protection feature and extending 3 miles east
Complete	Develop a plan to allow wetland assimilation to provide tertiary treatment to wastewater while improving wetland quality. Analyze potential sites and set project goals. Final report will provide preliminary characterizations of the parish's wetland systems, their suitability for wastewater assimilation, an analysis of the wetlands' loading and assimilation capacities and capabilities of the wetlands and preliminary engineering and cost analysis.
Completed	Acquisition of a 39.5 acre parcel (French Property) to preserve this property from future commercial or residential development. Total project area = 39.5 acres, AAHUs = N/A, acres created/restored = N/A, acres protected = N/A

Construction Complete	Construct a waterline booster pump station in Welcome, LA.
Transferred to CIAP Program	Barrier Island Restoration, total project area = 638 acres, AAHUs = 269, acres created/restored = 335, acres protected = 0
Design Complete	Shape sediment that was pumped in last year into a 4,000 ft maritime ridge which will then be planted with native vegetation. Total project area: N/A; AAHUs: N/A; acres created/restored: 60 acres of salt marsh and 60 acres of maritime forest ridge habitat
N/A	Funds allocated to the Parish so that they may update their coastal zone management plan
Design Only Project: Design Complete	The goal of this project is to remove the existing floodgates from two separate water control structures
Pending	Objective is to allow floodwaters to introduce additional fresh water, nutrients and sediment into the western Maurepas Swamp via the Amit River. The exchange of flow would occur during flood events on the river and from runoff of localized rainfall events and would in turn provide nutrients and sediment to facilitate organic sediment deposition in the swamp, fluctuation of water levels, improve biological productivity and prevent further swamp deterioration.
Pending	Funds were utilized to update the St. Bernard Parish Coastal Zone Management Plan
Pending	Construct a wetland assimilation treatment plant which will collect wastewater from secondary treatment modules in Grand Point, Louisiana. It will pump the wastewater to the pond area that will discharge into seven acres of forested wetland areas that will directly affect 2,400 acres of wetlands
Pending	Located between Pass Manchac and the mouth of the Tangipahoa River. The goal of the project is to construct approximately 12,000 linear feet of foreshore protection
Construction Complete	Marsh restoration; total project area: N/A; AAHUs: N/A, acres; created/restored: 600 acres created; acres protected: N/A
2016	17 acres. This water assimilation demonstration project will be completed in conjunction with the Sewerage and Water Board of New Orleans.
Completed August 2010	of marsh To restore critical lengths of deteriorated channel banks along the Gulf Intracoastal Waterway in Terrebonne Parish and stabilize/armor selected critical lengths of deteriorated channel banks with hard shoreline stabilization materials.
On Hold	Construction and operation a 1,500 cfs maximum capacity siphon to divert freshwater from the Mississippi River into the Blind River
Unknown	Converting 100 miles of berms to dunes

Not implemented; No CIAP grant award.	Unknown Create and nourish approximately 390 acres of marsh through sediment pipeline delivery from the Mississippi River and create over two miles of ridge (10.5 acres of ridge habitat) along a portion of the southwestern shoreline of Bayou Dupont.
Not implemented; no CIAP grant award.	Unknown The proposed shoreline protection project at Jean Lafitte's Barataria Preserve would install a rock breakwater along the eastern shorelines of Lake Cataouche, Lake Salvador, and Bayou Bardeaux. The breakwater will include several openings for water to pass in and out, improving fish passage and water quality behind the structure.
Not implemented; No CIAP grant award.	Unknown
Not implemented: No CIAP grant award.	Unknown
Not implemented: no CIAP grant award.	Implementation of approximately 10,000 linear ft of shoreline protection project features between the CIAP Alligator Point to Bayou Bienvenue Shoreline protection project, which ends at Bayou Bienvenue, and the CWPPRA Shell Beach shoreline protection project, which ends at Bayou Dupre
Not implemented: No CIAP grant award.	Purchase a tract of land extending from the Mississippi River to the Parish Canal for a future freshwater diversion canal. Total project area = N/A, AAHUs = N/A, acres created/restored = N/A, acres protected = N/A
Not implemented: No CIAP grant award.	Purchase a tract of land extending from the Mississippi River to the Parish Canal for a future freshwater diversion canal. Total project area = N/A, AAHUs = N/A, acres created/restored = N/A, acres protected = N/A
Not implemented: No CIAP grant award.	Creation of approximately 200 to 300 acres of intermediate marsh
Not implemented: No CIAP grant award.	Acquisition of the 352 acre tract of marshland on which the Guste Island Utility Company's operations currently reside and into which they discharge effluent
Not implemented: No CIAP grant award.	Marsh restoration Creation of approximately 6,700 acres of marsh in St. Tammany Parish along northern shore of Lake Pontchartrain to create new wetland habitat and restore degraded marsh.

**USACE**

	Beneficially used material from the routine operation and maintenance dredging of the Mississippi River restored 80 acres of historic ridge and marsh at Spanish Pass in Plaquemines Parish in FY18.
--	--

	<p>Spanish Pass project in design will restore 120 acres of ridge and create or nourish 1,100 acres of marsh by dredging sediment from the Mississippi River and Gulf of Mexico. This project, the Barataria Basin Ridge and Marsh Creation Spanish Pass Increment, is one of five large-scale restoration projects that will work together to benefit more than 6,500 acres of marsh throughout the Barataria Basin in Plaquemines Parish.</p>
Permit Issued	<p>CWPPRA project BA-39 located approximately 5.8 miles east-southeast of Lafitte, LA. The proposed project would maintain an existing culverted crossing and an existing bridged crossing in order to limit water access and improve land access. The proposed project would result in effects on approximately 0.5 acre of the coast with 0.528 acre of EFH impacts.</p>
Permit Issued	<p>Installation and maintenance of oyster reef units located within the near shore coastal waters behind Grand Isle. The proposed project would affect 1.9 acres of Waters of the U.S. and 2.9 acres of EFH.</p>
Permit Issued	<p>Installation and maintenance of three oil and gas platform top jackets, for the purpose of enhanced fishing opportunities off the coast. Located in the Gulf of Mexico, Main Pass, Block 305, approximately 35 nautical miles east from Pilottown, LA. The proposed project would result in 0.1 acres of Waters of the U.S. impacts.</p>
Permit Issued	<p>Excavation and deposition of fill to implement the Mississippi River Sediment Delivery System-Bayou Dupont Marsh Creation Project (BA-39). Located southeast off Highway 23, north of Myrtle Grove, near Naomi, LA. The proposed project would affect 219 acres of non-vegetated water bottom resulting in 724 acres of coastal impacts and 724 acres of EFH impacts.</p>
Permit Issued	<p>Deposition of approximately 127,500 cy of hydraulically dredged material to repair a breach on Elmer's Island by hydraulic dredging. Located across from Caminada Pass along the gulf shore of Elmer's Island. USFWS and NMFS concurred with LDNR's determination that the proposed project is not likely to adversely affect designated critical habitat for the piping plover.</p>
Permit Issued	<p>Excavate and deposit fill to create earthen terraces for the purpose of erosion control and promotion of wildlife habitat through the promotion of submerged aquatic vegetation. Approximately 191,400 cy of native material will be excavated on-site and redeposited to create earthen terraces. The project area is located in open water approximately 3 miles south of Lafitte at the point of intersection of Bayou DuPont. A total of 4.39 acres of EFH would be destroyed or altered.</p>

Permit Issued	Create an artificial reef by the placement of three jackets in the existing WD 89 reef site, for the purpose of enhancing fishing opportunities off the coast of Louisiana. The platforms would be towed to the site. In the Gulf of Mexico, West Delta Area WD-89, off the coast of Plaquemines Parish.
Permit Issued	Placement of approximately 7,000 cy of concrete rip-rap along a 1,100 ft corridor of shoreline at Fort Pike State Historic Site and the adjoining public park and launch area for the purpose of erosion control. Located approximately 23 miles east of downtown New Orleans, off of Highway 90 at the Fort Pike Bridge, Compensatory mitigation is required to compensate for the unavoidable loss of 0.48 acre of saline marsh and tidally influenced wetlands and will mitigate for impacts via a donation to the Louisiana Wetlands Conservation and Restoration Fund. The proposed action would not have a substantial adverse impact on EFH or Federally managed fisheries in the Gulf of Mexico.
Planning	Describes purpose of the LCA Program The Louisiana Coastal Area (LCA) Program - as authorized in the Water Resources Development Act of 2007 - is a systematic approach to coastal restoration using critical near-term ecosystem restoration projects and large-scale, long-term studies and programs to restore natural features and ecosystem processes. The LCA Program is being developed and implemented in partnership with the Coastal Protection and Restoration Authority of Louisiana (CPRA) and aims to slow the current trend of coast-wide wetland loss and resource degradation. Several restoration techniques are employed in this program, including river diversions, marsh creation and barrier island restoration.
Planning. BUDMAT projects in process; No Sponsor for LCA near term projects. CPRA suspended the program in Aug 2012. CPRA recently (8/9/20) indicated a desire to restarting the LCA Program. CPRA has indicated its intent to provide MVN with their vision of a re-engaged LCA Program in the near term.	LCA Program WRDA 2007 authorizes 15 near-term features aimed at addressing the critical restoration needs of coastal Louisiana, with five of the features designated as critical restoration features. Further, it authorizes demonstration projects, a beneficial use of dredged material program, project modifications, and a science and technology program.
Planning	Create 246 acres of Marsh; 430 SAV habitat

Construction complete	Create 44 acres marsh The Beneficial Use of Dredged Material (BUDMAT) Program, using material removed from the hopper dredge disposal area (HDDA) located near the Head of Passes in the Mississippi River as identified by the Federal Standard. Restore and approximately 5,000' long, non-continuous ridge (23 acres without plantings). The ridge will be backed by a 500 foot wide marsh platform (55 acres).
Completed Design	Create 23 acres marsh
On-going Design	Create 75 acres marsh The purpose of the proposed action discussed in EA #567 is to maximize beneficial use of dredged material from operation and maintenance (O&M) of the federally-authorized Barataria Bay Waterway in the vicinity of Jefferson Parish, LA. Evaluation of the proposed action includes application of the Section 404(b)(1) guidelines promulgated by the Administrator of the U.S. Environmental Protection Agency, through 40 CFR 230.
Complete	Restore 5,000'ft long conn-continuous ridge (23 acres). 55 acres of marsh
	supplemented EA#542 Create coastal forested ridge and emergent marsh habitat adjacent to Spanish Pass in coordination with the USACE O&M dredging program.
Complete	Restore 6800 ft of ridge habitat; XX acres of Marsh
On-going Design	Create 227 acre marsh; nourish 105 acres existing marsh west of Tiger Pass Channel Mile 4 and 5
Under Construction	Mitigation for New Orleans East and Walker Road borrow pit impacts, 57.5 acres of BLH wet - Bayou Sauvage Mitigation Project. Mitigation for impacts incurred for repairing the Braithwaite/Scarsdale breaches, 21.3 acres of marsh - Big Mar Mitigation Project. Mitigation for impacts incurred during the construction of the LPV HPS, 1,300 acres of marsh - Manchac WMA Mitigation. Mitigation for impacts incurred during the construction of the LPV HPS, 724 acres BLH and swamp - WBV Previously Authorized Mitigation. Mitigation for impacts incurred during repair and improvement of existing non-Federal levees impacted by recent hurricanes, 51.6 acres of marsh and 12.1 acres of BLH - Terrebonne NFL Mitigation Project.
Completed	Creation of 100 miles of berms in response to the BP Deepwater Horizon oil spill to protect wetlands

	Beneficial use of dredge material and Shoreline Protection. The beneficial use of dredged material from Bayou Segnette Waterway and additional material from Algiers Canal associated with the construction of the West Closure Complex/HSDRRS were placed in the site bounded by the 1997 NPS wave break features on the west existing marsh lands to the north and south, and the 1994 State of Louisiana BA-16 rock dike to the east.
Construction complete 1-Oct-20	Construction consisted of placement of rock on the floodside of the geocrib area and repairing existing rock dike on the JLNHPP along the eastern Lake Salvador shoreline adjacent to the geocrib constructed in 1997.

Construction Completion Date: Pending	This project is a continuation of an existing shoreline protection project along the northwestern portion of Lake Salvador in St. Charles Parish
	JLNHPP canals partially backfilled in 2010 to restore marsh integrity
Construction possibly complete 1-Oct-20	Dredged material from Mississippi River near La Reussitee, LA was pumped into confined open water areas south of Cheniere Traverse Bayou and adjacent to the West Plaquemines non-federal levee using a pipeline conveyance system to creat and restore marsh. 100 Acres of marsh created
Construction possibly complete 1-Oct-20	Shoreline Protection features were constructed by the USACE within the JLNHPP along the northeastern Lake Salvador shoreline from the entrance of Bayou Bardeaux southeast along the Lake Slvador shoreline until it meets the NPS breakwater constructed in 1997. Projects goal is to protect an archaeological site from wave induced erosion
	JLNHPP canals backfilled in 2002 to restore marsh integrity
	Shoreline protection barrier was built by the USACE under the authority of the National Parks and Recreation Act of November 10, 1978 to protect the Jean Lafitte National Historical Park and Preserve (JLNHPP) lands from wave induced erosion in an area of the central eastern Lake Salvador shoreline where breaching was possible between the lake Salvador shoreline and the Bayou Segnette Waterway. The wave break is approximatley 8,000 feet long.

**Flood Risk Reduction**

<b>Project</b>	<b>Parish</b>	<b>Status</b>	<b>Overview</b>	<b>Agency/Entity</b>
Climber Screens Westminster and Parish Line JSP-01	Jefferson	Construction Complete 2009	Contractor is completing touch-up painting to climber frames	USACE
Construct temporary access channels and install segmented breakwaters in Jefferson Parish	Jefferson	Unknown	The proposed project consists of construction of 25 to 30 ft bayside segmented breakwaters, temporary access channel and temporary disposal area. The proposed breakwaters would be placed between the existing breakwaters.	USACE
Cousins Canal (Phase II) (SELA Project)	Jefferson	Construction Complete March 2010	Canal improvements were made from a point approximately 700 ft west of the Woodmere Bridge to the Pipeline Canal by constructing a concrete "U" frame. The canal work was completed for a cost of \$9.3 million.	USACE and Jefferson Parish
Elmwood Canal at West Esplanade (SELA Project)	Jefferson	Construction Complete: October 2010	The channel improvements at the intersection of West Esplanade and the Elmwood Canal required the demolition of existing bridges and construction of a replacement bridge. The construction was completed for a cost of \$8.5 million.	USACE and Jefferson Parish
Gardere Canal (Phase 3) Murphy Canal (Phase 2) (SELA Project)	Jefferson	Under Construction	Project consists of drainage improvements (slope grading and slope paving) to the Gardere and Murphy Canals from the south side of Martin Luther King Playground to Bayou Baratavia. The approximate length of improvements is 15,000 lf. Estimated Cost is \$23.5 million.	USACE and Jefferson Parish
Gardere Canal Improvements (Phase II) (SELA Project)	Jefferson	Construction Complete August 2009	Improvements included 350 ft of paved trapezoidal section south of the Brown Avenue Canal; 5,400 ft of sheet pile "U" frame section, from the trapezoidal section to the West Bank Expressway; and 1,300 ft of concrete "U" frame section, from the Westbank Expressway to 8th Street. This project was completed for an approximate value of \$33 million.	USACE and Jefferson Parish
Grand Cross Canal at Lapalco (SELA Project)	Jefferson	Construction Complete August 2009	This project includes the construction of box culverts at the intersection of Lapalco and the Grand Cross Canal to supplement the existing culvert. The project was completed for a cost of \$9.1 million.	USACE and Jefferson Parish
Grand Isle and Vicinity Hurricane Protection, LA	Jefferson	Completed	Grand Isle and Vicinity Hurricane Protection Project consists of a 7.5 mile vegetated sand dune extending the length of Grand Isle's gulf shore, a jetty to stabilize the western end of the island at Caminada Pass, and an offshore breakwater system.	USACE
Grand Isle Non Federal levee	Jefferson	Contract not awarded	Restoration of back levees	USACE
Harahan Pump to the River Discharge Tube (SELA Project)	Jefferson	Construction Complete	A section of discharge tubes that potentially could conflict with a LaDOTD roadway contract was installed. The project involved installation of three 680-ft-long 84-inch diameter discharge pipes. Cost is \$8.5 million.	USACE and Jefferson Parish
Harahan Pump to the River North and South Discharge Tubes (SELA Project)	Jefferson	Under Construction, North started: April 2013 South started: June 2013	The North Tube location includes design of three 84-inch diameter discharge pipes extending 1,709 ft from the pumping station to the Old Dickory Oak Tree. The south tubes include design of three 84-inch diameter discharge pipes extending 4,475 ft from the Old Dickory Oak Tree to the Jefferson Highway.	USACE and Jefferson Parish
Industry Canal Improvements (SELA Project)	Jefferson	Contract award: July 2012	Project consists of canal improvements from Bayou Oakwood to Bayou Baratavia and includes removal of three 96-inch reinforced concrete arch pipes and installing 3,050 lf of 42 ft wide "U" frame section. Estimated Cost is \$27 million.	USACE and Jefferson Parish

**Flood Risk Reduction**

<b>Project</b>	<b>Parish</b>	<b>Status</b>	<b>Overview</b>	<b>Agency/Entity</b>
Justice / Oil Company Canals on the West Bank (SELA Project)	Jefferson	Contract Award: June 2011 Construction Complete: 2014	Project consists of a combination of 4,300 ft of earthen trapezoidal channel and 4,000 ft of concrete-lined trapezoidal channels. Estimated Cost is \$14 million.	USACE and Jefferson Parish
Mayronne Canal on the West Bank (SELA Project)	Jefferson	Contract Award: August 2011 Construction Complete: October 2013	Project consists of improvements to Mayronne Canal from Dugues Canal to Westwood Drive. The improvements will be a combination of 1,300 ft of earthen and 1,860 ft of concrete-lined channel. This project will be advertised early 2011. Estimated Cost is \$5 million.	USACE and Jefferson Parish
Mount Kennedy Generator and Mount Kennedy DPS, JSP-02	Jefferson	Construction Complete	Contractor is storm-proofing for pumping station.	USACE
Stability Remediation on the 17th Street Outfall Canal	Jefferson		Stability Remediation on the 17th Street Outfall Canal	USACE
Soniat Canal (Lester to Lynette)	Jefferson	Contract Award: April 2011 Construction Complete: 2014	Construction of modified concrete trapezoidal flume section from the intersection of the Soniate Canal and West Metairie Ave. and the Lynette Drive Bridge	USACE
Soniat Canal (Lynette to W. Napoleon) (SELA Project)	Jefferson	Contract Award: Sept 2009 Construction Complete: Sept 2012	Project consists of a 900 ft section of trapezoidal concrete channel between the Lynette Bridge and West Napoleon Avenue. Estimated Cost is \$10.7 million.	USACE and Jefferson Parish
Soniat Canal (Veterans to Canal No. 3) (SELA Project)	Jefferson	Construction Complete: August 2009	This project included two short areas of the Soniat Canal between West Napoleon & Veterans Blvd. and from Veterans Blvd. north to the confluence of Canal No. 3. Improvements to the canal section involved construction of a concrete "U" frame. This project was completed for a cost of \$25.3 million.	USACE and Jefferson Parish
Soniat Canal (West Metairie to Lester)	Jefferson	Under Construction	SELA project	USACE
Storm Proofing One Pump Station Canal Street, JSP-11	Jefferson	Construction Complete	PS used to discharge water from Carroll Canal to the 17th Street Canal.	USACE
Storm Proofing Three Pump Stations Bayou Segnette, Whitney Barataria & Mount Kennedy, JSP-09	Jefferson	Construction Complete	Pump station stormproofing for emergency conditions	USACE
Storm Proofing Two Pump Stations Cousins & Elmwood JSP-08	Jefferson	Construction Complete	Pump station stormproofing for emergency conditions	USACE
Storm Proofing Two Pump Stations Westminster and Parish Line JSP-10	Jefferson	Construction Complete	Pump station stormproofing for emergency conditions	USACE
Two Mile (Patriot Canal) Phase 2 (SELA Project)	Jefferson	Contract Award: March 2011 Construction Complete: 2014	This project will consist of building a concrete "U" frame section of canal between Barataria Boulevard and Allo Street and constructing three bridges in that section of canal. Estimated Cost is \$20.8 million.	USACE and Jefferson Parish

**Flood Risk Reduction**

NEED NAME of PERMIT	Jefferson	Permit Issued	Clear, grade, excavate, and deposit fill to construct and maintain a roadway for the purpose of accessing the Rosethorne Pump Station at Bayou Barataria. The 2.4-acre linear site is located on and south of Jean Lafitte Boulevard (LA Highway 303). As compensatory mitigation, the project will restore 3.3 acres BLH.	Jefferson Parish Department of Drainage
Dredge material to elevate existing levees in Lafourche Parish	Lafourche	Unknown	The proposed work is to be located within an area about 10,982 ft long and approximately 100 ft wide. 168,610 cy of material is to be placed to increase existing levee height to 9 ft. No fill will be placed in wetland areas.	USACE
NEED NAME of PERMIT	Orleans	Permit Issued	Clearing, grading, excavating and deposition of fill for installation of a water control structure and improvements to 5,440 ft of the existing South Maxent Levee located near the intersection of Recovery Drive and Chef Menteur Highway.	USFWS
NEED NAME of PERMIT	Orleans	Permit Issued	Modification of existing permit to include additional clearing, grading, excavating, and deposition of fill for installation of water control structure and improvements to existing South Maxent Levee. The proposed project is located near the intersection of Recovery Drive and Chef Menteur Hwy, in New Orleans, LA. Approximate impacts of 0.05 acre of unvegetated water bodies resulting in 0.5 acre of EFH impacts with additional coastal impacts of 12.75 acres.	Bayou Sauvage National Wildlife Refuge, US Fish and Wildlife Service
West Bank Trapp Canal Improvements (SELA project)	Jefferson	Contract Awarded: Sept 2012 Under Construction	Project consists of canal improvements from Bayou Fatima to Bayou Barataria. When the project is complete, it will have 7,500 lf of modified trapezoidal section with a bottom width between 60 and 70 ft and a top width of approximately 155 ft. Estimated Cost is \$15.2 million.	USACE and Jefferson Parish

**Flood Risk Reduction**

<b>Project</b>	<b>Parish</b>	<b>Status</b>	<b>Overview</b>	<b>Agency/Entity</b>
Dwyer Intake Canal (SELA Project)	Orleans	Construction Complete	Construction consisted of placing 6800 linear feet of pile founded concrete culvert and associated drainage along Dwyer Road, from the Dwyer PS to Cameila St to accommodate an additional 875 cfs pumping capacity at Dwyer PS. Construction was completed at a cost of \$62.5 million	USACE
Florida Ave--Phase I (SELA Project)	Orleans	Construction Complete	Project consisted of constructing 1,300 linear feet of pile founded concrete flume and associated drainage, replacing existing Florida Ave canal between the DPS19 suction basin and Mazant Street. Construction was completed at cost of \$53 million	USACE
Florida Ave--Phase II and Phase III (SELA Project)	Orleans	Award Planned: August 2014	Project consists of removing 4,500 linear feet of Florida Ave Canal and constructing a new pile founded concrete flume and associated drainage from Mazant to St Ferdinand; constructing 550 linear feet 1000 linear feet of jet grout founded concrete culvert along Mazant St and Desire Street, respectively. Cost is estimated to be over \$100 million.	USACE and Sewerage and Water Board of New Orleans
Florida Ave--Phase IV (SELA Project)	Orleans	Planned Award: September 2014	Project consists of removing existing 1100 linear feet of Florida Ave Canal btwn St. Ferdinand and PS D and constructing approximately 200 feet of pile founded flume and 900 linear feet of pile founded concrete box culvert; realign and widen 625 linear ft of Peoples Canal; construct jet grout founded concrete culverts on the following side streets: Eads, Deers, and Painters Streets (approx 900 lf each) to drain into Florida canal, and Treasure, Abundance, and Benefit Streets (approx 1,015 lf each) to drain into Peoples Canal. Cost is estimated to be over \$100 million.	USACE and Sewerage and Water Board of New Orleans
Uptown Jefferson Ave Phase I--Claiborne to Dryades (SELA Project)	Orleans	Under Construction	Project consists of constructing 4,300 linear ft of pile founded concrete culvert and associated drainage along Jefferson Avenue between Claiborne and Dryades	USACE and Sewerage and Water Board of New Orleans
Uptown Jefferson Ave Phase II--Dryades to Constance (SELA Project)	Orleans	Under Construction	Project consists of constructing 3,700 linear ft of jet grout founded concrete culvert and associated drainage along Jefferson Avenue between Dryades and Constance and 1,300 linear ft of jet grout founded concrete culvert and associated drainage under Prytania Street from Nashville to Jefferson.	USACE and Sewerage and Water Board of New Orleans
Uptown Napoleon Avenue - Phase III - Carondelet to Constance (SELA Project)	Orleans	Under Construction	Project consists of constructing 3,000 linear feet of jet grout founded concrete culvert and associated drainage along Napoleon Ave between Carondelet and Constance	USACE and Sewerage and Water Board of New Orleans
Uptown Napoleon Ave Phase II--Claiborne to Carondelet (SELA Project)	Orleans	Under Construction	Project consists of constructing 4,100 linear feet of pile founded concrete culvert and associated drainage along Napoleon Ave between Claiborne and Carondelet	USACE and Sewerage and Water Board of New Orleans
Uptown S. Claiborne Phase II--Leonidas to Lowerline (SELA Project)	Orleans	Under Construction	Project consists of constructing 3,400 linear ft of pile founded concrete culvert and associated drainage along South Claiborne Ave from Leonidas to Lowerline	USACE and Sewerage and Water Board of New Orleans
Uptown S. Claiborne Phase I--Monticello to Leonidas (SELA Project)	Orleans	Under Construction	Project consists of constructing 2,600 linear ft of pile founded concrete culvert and associated drainage along S. Claiborne from Monticello to Lowerline	USACE and Sewerage and Water Board of New Orleans

Plaquemines Parish, Louisiana, Urban Flood Control Feasibility Study	Plaquemines	Feasibility Phase	Flooding still occurs in Plaquemines Parish due to rainfall events. Flood control improvements are needed to reduce repetitive damages to structures.	USACE
USACE Regulatory Permit MVN-2007-03424-EPP	Plaquemines	Permit Issued	To improve canal drainage at the West First Street canal. Located west of West First Street between St. Ann and Berger Streets, in Belle Chasse.	Parish of Plaquemines
USACE Regulatory Permit MVN-2009-2953-EPP	Plaquemines	Permit Issued	Excavate Scarsdale borrow pits for clay material to be used toward the construction of a Federal levee system and the deposition of the unsuitable clay material would be backfilled into excavation pits. Located off Scarsdale Road, in Scarsdale, LA. No adverse impacted anticipated.	Levee Materials, LLC
St. Bernard Parish, Louisiana Flood Control Feasibility Study	St. Bernard	Feasibility Phase	Flood control study for St. Bernard Parish	USACE

**Flood Risk Reduction**

<b>Project</b>	<b>Parish</b>	<b>Status</b>	<b>Overview</b>	<b>Agency/Entity</b>
Drainage improvements and pump station in St. Charles Parish	St. Charles	Unknown	Excavate, deposit fill, and install structures in order to reduce and prevent flooding issues along an existing residential street in St. Charles Parish. Work would include the installation of 308 ft of 24-inch pipe, 70 ft of 18-inch culvert, eight 4 by 4 by 4 ft catch basins, and a pump for discharging storm water into an existing basin along Airline Highway.	USACE
St. Charles Parish Urban Flood Control Feasibility Study	St. Charles	Data Collection Phase	Flood damage reduction for St. Charles Parish.	USACE
Mississippi Delta Region Project - Davis Pond Freshwater Diversion Feature	St. Charles	On-going	The project would divert fresh water, with its accompanying nutrients and sediments, from the Mississippi River into the Barataria Basin, reducing saltwater intrusion and establishing favorable salinity conditions in the area, and thus combating land loss. These diversions would also increase commercial and recreational fish and wildlife productivity, and enhance vegetation growth.	USACE
Bonnet Carre Freshwater Diversion -MR & T	St. Charles (would include Mississippi-Louisiana Estuarine Areas)	Project Pending	The project is designed to reduce saltwater intrusion and significantly increase the production of oyster, white shrimp, blue crabs, croakers, and menhaden. About 10,500 acres of marsh and wooded swamps adjacent to Lakes Maurepas and Pontchartrain would be saved over the 50-year project life.	USACE
Morganza to the Gulf	Multiple	Planning	The Morganza to the Gulf project was authorized to provide the 100-year level of hurricane and storm damage risk reduction based on feasibility reports and 2002 and 2003 reports of the Chief of Engineers. Currently, it is estimated that the cost to incorporate post-Hurricane Katrina design criteria into this project will exceed the authorized project cost by more than 20 percent, thereby exceeding the 1986 Water Resources Development Act (WRDA) Section 902 limit and triggering the need for reauthorization by Congress. A Post Authorization Change Report is currently being developed to seek reauthorization.	USACE
NOV Federal Levees	Plaquemines	Design	The NOV project would increase the elevation of all Federal flood risk reduction structures to meet the authorized design grade and stabilize those sections of levees where subsoil deficiencies or internal levee deficiencies undermine their strength. On the east bank, the project extends 16 miles along the back levee from the towns of Phoenix to Bohemia, Louisiana. On the west bank, the project extends 34 miles and consists of work on the back levee, as well as on the Mississippi River levee, from the St. Jude Church to the town of Venice, Louisiana.	USACE
New Orleans to Venice, Hurricane Risk Reduction Project: Incorporation of Non-Federal Levees from Oakville to St. Jude	Plaquemines		This planned project includes replacing or modifying 32 miles of non-Federal levees on the west bank of the Mississippi River. When completed, the project will augment the NOV Federal levee project	USACE
NOV Hurricane Risk Reduction Project: Changes to the NFL Project, Oakville to St. Jude	Plaquemines		This planned project includes replacing or modifying 32 miles of non-Federal levees on the west bank of the Mississippi River. When completed, the project will augment the NOV Federal levee project. Modification to reduce the lower level of risk reduction to 25-year/4 percent in several levee reaches in NFL Section 2-5.	USACE

Project	Parish	Status	Overview	Agency/Entity
New Right of Way and Incorporation of Non-Federal Levees from Oakville to St. Jude and New Orleans to Venice Federal Hurricane Protection Levee	Plaquemines			USACE
Larose to Golden Meadow, Louisiana	Lafourche	Planning and Design	The project consists of a ring levee approximately 40 miles in length protecting the east and west banks of Bayou Lafourche. The project also provides for navigable floodgates on Bayou Lafourche. The non-Federal sponsor would pay for pump stations in lieu of gravity drainage structures and the Leon Theriot floodgate is being converted into a lock.	USACE

USACE Regulatory Permit MVN-1997-1114-EE	Jefferson	Permit Issued	Hydraulically dredge and stockpile river sand into a previously authorized batture borrow pit. Dredging will be performed in an area measuring 800 ft wide by 4,050 ft long extending lengthwise and parallel to the low water reference plane, the outer edge extending about 1,100 ft channelward. Located in the Mississippi River, at a point centering about 112 miles above Head of Passes, at Live Oak Manor.	J.P. & Sons, Inc.

*Transportation and Navigation*

Project	Parish	Status	Overview	Agency/Entity/Program
USACE Regulatory Permit MVN-2003-0976-EKK	Jefferson	Permit Issued	Installation and maintenance of four pilings to complete improvements to a ship mooring facility. Located on the left descending bank of the Mississippi River, at a point about 114.5 miles above Head of Passes, at Kenner, LA. The proposed project would impact 0.07 acre of Waters of the U.S.	Gulf Coast Marine, Inc.
USACE Regulatory Permit MVN-2007-000577-EE	Jefferson	Permit Issued	Hydraulically dredge and stockpile river sand into a previously authorized batture borrow pit. Dredge material will be pumped into a 60-acre disposal area, drained and dried for transport by truck. Dredging will be performed in an area measuring about 700 ft wide by 2,000 ft long. In the Mississippi River, at a point about 111.3 miles above Head of Passes, at Waggaman. Minimal adverse impacts on fish and wildlife resources.	VSP Materials
USACE Regulatory Permit MVN-2007-04139_EPP	Jefferson	Permit Issued	Expansion of barge fleet facility from eight to ten tie-up barges. Located in the Mississippi River, off of Louisiana Highway 611-1 (River Road), in the town of Jefferson-.	LA Dock Company, c/o Richard Wright & Associates
USACE Regulatory Permit MVN-2007-3978-EMM	Jefferson	Permit Issued	Install and maintain walkways, mooring dolphins, breasting dolphins, and dock extension. In the Mississippi River, right descending bank, at a point about 99 miles above Head of Passes, in Marrero.	Diversified Group Inc.
USACE Regulatory Permit MVN-2008-0160-EOO	Jefferson	Permit Issued	Clear and deposit fill for two staging and construction lay down areas for the substructure widening of the Huey P. Long Bridge. Located at River Road and the Huey P. Long Bridge on the Mississippi River batture, river mile marker 106, at Elmwood, LA. As compensatory mitigation, the permittee has agreed to the restoration of 1.6 acres of agricultural lands to BLH wetlands at the Tunica Swamp - Silos Mitigation Area, in West Feliciana Parish.	Massman Construction
USACE Regulatory Permit MVN-2008-3462-EOO	Jefferson	Permit Issued	Dredge approximately 9.2 acres of non-vegetated waterbottoms for barge access to re-construct the Caminada Bay Bridge and beneficially use the material to plug an existing breach on Elmer's Island. Located on Caminada Bay Bridge on LA Hwy 1. Excavation the project would impact 9.2 acres of non-vegetated waterbottoms with a fill area of 22.3 acres of non-vegetated waterbottom and 1.67 acres of non-wet areas. 9.2 acres of EFH would be impacted.	La DOTD
USACE Regulatory Permit MVN-2009-00701-EKK	Jefferson	Permit Issued	Maintain barge fleeting activities associated with two-barge fleet areas. Two fleeting areas on the Harvey Canal/Hero Cutoff. Fleet No. 1 is located off Bayou Road in Belle Chase, LA, and Fleet No. 2 is located on the west side of Hero's Cut Island in Harvey, LA. Approximately 30 total acres would be affected by this project.	MARMAC, LLC

Project	Parish	Status	Overview	Agency/Entity/Program
USACE Regulatory Permit MVN-2008-01217-EPP	Plaquemines	Permit Issued	Dredge for slip expansion and maintenance and install and maintain a bulkhead and backfill in a total of 3.2 acres of project area on Tiger Pass, Venice, LA. Excavation of 1.22 acres non-vegetated waterbottom, 0.14 acre non-wet areas with fill area of 0.62 acre non-vegetated waterbottom, and 1.36 acres of non-wet areas. Approximately 1.84 acres of EFH potentially impacted.	Venice Port Complex
USACE Regulatory Permit MVN-2008-01579-EPP	Plaquemines	Permit Issued	Excavation for the replacement and reconfiguration of existing bulkheads as well as placement of rip rap around an existing marine facility. Located on Tiger Pass, at 129 IDF Road, Venice, LA. The proposed project would result in the destruction or alteration of 0.40 acre of EFH.	Venice Port Complex
USACE Regulatory Permit MVN-2009-02142-EKK	Plaquemines	Permit Issued	Hydraulically dredge from the Mississippi River and stockpile into an existing disposal area thereby impacting 76 acres. In the Mississippi River, at a point about 50 miles above Head of Passes, at Woodland, LA, excavations would occur for 46 acres of non-vegetated waterbottoms with a fill area of 29.4 acres of non-wet areas. Approximately 79.6 acres of EFH to be impacted.	Citrus Lands of Louisiana Inc.
USACE Regulatory Permit MVN-2009-2551-EPP	Plaquemines	Permit Issued	Install and maintain six barge dolphins in order to moor two 195 ft by 35 ft barges side by side, located on the bank of Grand Pass approximately 2,600 ft south of Tiger Pass, Venice, LA. The proposed project would result in the destruction or alteration of 0.006 acre of EFH.	Denet Towing Service, Inc.
USACE Regulatory Permit MVN-2010-1109-EQ	Plaquemines	Permit Issued	No construction; use of preexisting facility to permanently moor two barges. Located off Hwy 39, approximately 5 miles upriver from Belle Chasse/Scarsdale Ferry landing on the left descending bank about 80.5 miles above Head of Passes. No impacts are anticipated.	Terry's Resource Management
Woodland Hwy. (LA 406), Ph. 2	Plaquemines	Complete	Widening 838-03-0024	La DOTD
USACE Regulatory Permit MVN-1999-01339-EKK	Plaquemines	Permit Issued	Hydraulically dredge sand from the Mississippi River and stockpile it into an existing disposal area, affecting 30 total acres, on the bank of the Mississippi River, at a point 60 miles above Head of Passes, Ironton, LA. A total of 13.8 acres of sand would be excavated and deposit of the same amount into a fill area, and 16 acres of EFH impact could occur.	CLL Limited Partnership, Ltd.
