## TABLE OF CONTENTS

<b>EXECUTIVE SUMMARY .....</b>	<b>ES-1</b>
ES.1 INTRODUCTION AND AUTHORITY.....	ES-1
ES.2 PURPOSE AND NEED .....	ES-2
ES.3 DESCRIPTION OF PROPOSED PROJECT.....	ES-3
ES.4 POTENTIAL ENVIRONMENTAL IMPACTS.....	ES-5
ES.4.1 Geology and Soils .....	ES-7
ES.4.2 Surface Water and Coastal Processes.....	ES-8
ES.4.3 Surface Water and Sediment Quality .....	ES-10
ES.4.4 Wetland Resources and Waters of the U.S.....	ES-10
ES.4.5 Air Quality .....	ES-11
ES.4.6 Noise .....	ES-12
ES.4.7 Terrestrial Wildlife and Habitat .....	ES-12
ES.4.8 Aquatic Resources .....	ES-13
ES.4.9 Marine Mammals .....	ES-13
ES.4.10 Threatened and Endangered Species.....	ES-14
ES.4.11 Socioeconomics .....	ES-15
ES.4.12 Environmental Justice .....	ES-15
ES.4.13 Commercial Fisheries.....	ES-18
ES.4.14 Recreation and Tourism .....	ES-19
ES.4.15 Public Lands .....	ES-20
ES.4.16 Land Use and Land Cover.....	ES-20
ES.4.17 Aesthetics .....	ES-21
ES.4.18 Public Health and Safety, Including Flood Risk Reduction and Shoreline Protection .....	ES-22
ES.4.19 Navigation.....	ES-23
ES.4.20 Land-Based Transportation .....	ES-23
ES.4.21 Hazardous, Toxic, and Radioactive Waste.....	ES-24
ES.4.22 Cultural Resources .....	ES-24
<b>1.0 INTRODUCTION AND PURPOSE AND NEED.....</b>	<b>1-1</b>
1.1 PROJECT INTRODUCTION AND OVERVIEW .....	1-1
1.1.1 Project Location.....	1-3
1.2 PROJECT BACKGROUND.....	1-5
1.2.1 History of the Barataria Basin.....	1-5
1.2.2 Project History .....	1-5
1.3 PROPOSED PROJECT .....	1-7
1.4 PURPOSE AND NEED .....	1-9
1.5 USACE CIVIL WORKS PROJECTS IN THE PROJECT AREA.....	1-10
1.5.1 Navigation Projects.....	1-10
1.5.2 Mississippi River and Tributaries Project, Mississippi River Levee .....	1-13
1.5.3 Hurricane and Storm Damage Risk Reduction System Projects.....	1-13
1.5.4 New Orleans to Venice Hurricane Protection Project, Plaquemines Parish, Louisiana with Incorporation of Non- Federal Levees.....	1-13

1.5.5	Larose to Golden Meadow Project .....	1-14
1.5.6	Davis Pond Freshwater Diversion Project .....	1-14
1.6	SCOPE OF THE EIS .....	1-14
1.6.1	The OPA and DWH NRDA Decisions .....	1-15
1.7	PUBLIC INVOLVEMENT SUMMARY .....	1-16
1.8	AGENCY ROLES AND RESPONSIBILITIES.....	1-23
<b>2.0</b>	<b>ALTERNATIVES.....</b>	<b>2-1</b>
2.1	INTRODUCTION.....	2-1
2.1.1	Overview of Sediment Diversions.....	2-2
2.2	STEPS TAKEN TO IDENTIFY AND EVALUATE REASONABLE ALTERNATIVES .....	2-3
2.2.1	Define Project Objectives .....	2-7
2.2.2	Develop Screening Criteria.....	2-8
2.2.3	Develop Additional Considerations.....	2-9
2.2.4	Process Used to Identify and Evaluate Alternatives to the Applicant's Preferred Alternative .....	2-9
2.3	STEP 1: EVALUATION OF FUNCTIONAL ALTERNATIVES .....	2-11
2.3.1	Freshwater Diversion into the Barataria Basin .....	2-17
2.3.2	Structural Barriers.....	2-17
2.3.3	Shoreline Protection .....	2-18
2.3.4	Barrier Islands .....	2-18
2.3.5	Large-Scale Marsh Creation.....	2-18
2.3.6	Sediment Diversions with Marsh Creation.....	2-22
2.3.7	Multiple Small-Scale Diversions .....	2-24
2.3.8	Conclusions Based on Review of Functional Alternatives.....	2-25
2.4	STEP 2: EVALUATION OF OPERATIONAL ALTERNATIVES – LOCATION, OPERATIONAL TRIGGER, CAPACITY, AND BASE FLOW.....	2-26
2.4.1	Evaluation of Location Alternatives .....	2-26
2.4.2	Evaluation of Operational Trigger.....	2-33
2.4.3	Evaluation of Sediment Diversion Capacity Scenarios.....	2-38
2.4.4	Evaluation of Additional Design Considerations .....	2-47
2.5	STEP 3: EVALUATION OF SEDIMENT DIVERSION OUTFALL FEATURES .....	2-48
2.5.1	Additional Considerations.....	2-48
2.6	SUMMARY OF ALTERNATIVES CONSIDERED BUT ELIMINATED FROM DETAILED ANALYSIS.....	2-50
2.7	NO ACTION ALTERNATIVE.....	2-51
2.8	ACTION ALTERNATIVES CARRIED FORWARD FOR DETAILED ANALYSIS.....	2-53
2.8.1	Alternative 1: Variable Flow up to 75,000 cfs Maximum Sediment Diversion (Applicant's Preferred Alternative).....	2-53
2.8.2	Alternative 2: Variable Flow up to 75,000 cfs Maximum Sediment Diversion Including Marsh Terrace Outfall Features .....	2-71
2.8.3	Alternative 3: Variable Flow up to 50,000 cfs Maximum Sediment Diversion .....	2-72

2.8.4	Alternative 4: Variable Flow up to 50,000 cfs Maximum Sediment Diversion Including Marsh Terrace Outfall Features .....	2-72
2.8.5	Alternative 5: Variable Flow up to 150,000 cfs Maximum Sediment Diversion .....	2-72
2.8.6	Alternative 6: Variable Flow up to 150,000 cfs Maximum Sediment Diversion Including Marsh Terrace Outfall Features .....	2-73
2.9	SUMMARY OF ENVIRONMENTAL CONSEQUENCES UNDER EACH ALTERNATIVE .....	2-73
<b>3.0</b>	<b>AFFECTED ENVIRONMENT .....</b>	<b>3-1</b>
3.1	INTRODUCTION .....	3-1
3.1.1	Project Area .....	3-1
3.1.2	Physiographic Setting .....	3-3
3.1.3	Climate .....	3-5
3.1.4	Overview and History of the Project Area .....	3-7
3.2	GEOLOGY AND SOILS .....	3-9
3.2.1	Geology, Topography, and Geomorphology .....	3-9
3.2.2	Faults .....	3-13
3.2.3	Mineral Resources .....	3-13
3.2.4	Soils .....	3-16
3.2.5	Prime Farmland .....	3-18
3.3	GROUNDWATER RESOURCES .....	3-19
3.3.1	Aquifers .....	3-19
3.3.2	Groundwater Use .....	3-19
3.3.3	Groundwater Quality .....	3-20
3.4	SURFACE WATER AND COASTAL PROCESSES .....	3-21
3.4.1	Overview .....	3-21
3.4.2	Hydrology and Hydrodynamics .....	3-26
3.4.3	Stormwater Management and Drainage .....	3-36
3.5	SURFACE WATER AND SEDIMENT QUALITY .....	3-36
3.5.1	Water Quality Standards and Designated Uses .....	3-36
3.5.2	Ambient Water Quality, Including Salinity .....	3-38
3.5.3	Sediment Quality .....	3-57
3.6	WETLAND RESOURCES AND WATERS OF THE U.S. ....	3-63
3.6.1	Wetland Types in the Project Area .....	3-64
3.6.2	Wetland Loss .....	3-72
3.6.3	Wetland Invasive Plants .....	3-78
3.7	AIR QUALITY .....	3-80
3.7.1	Regulatory Setting .....	3-80
3.7.2	Existing Conditions .....	3-82
3.8	NOISE .....	3-83
3.8.1	Noise Fundamentals .....	3-83
3.8.2	Regulatory Overview .....	3-85
3.8.3	Existing Conditions .....	3-86
3.9	TERRESTRIAL WILDLIFE AND HABITAT .....	3-88
3.9.1	Historical Context .....	3-88
3.9.2	Vegetation .....	3-88

3.9.3	Terrestrial Wildlife .....	3-92
3.9.4	Terrestrial Invasive Species .....	3-97
3.10	AQUATIC RESOURCES .....	3-100
3.10.1	Historical Context .....	3-101
3.10.2	Aquatic Vegetation .....	3-102
3.10.3	Benthic Resources .....	3-104
3.10.4	Essential Fish Habitat (EFH) .....	3-106
3.10.5	Aquatic Fauna .....	3-113
3.10.6	Aquatic Invasive Species.....	3-143
3.11	MARINE MAMMALS .....	3-145
3.11.1	Marine Mammals in the Northern Gulf of Mexico .....	3-145
3.11.2	Marine Mammals in Barataria Bay and Surrounding Areas .....	3-148
3.11.3	Habitat Preferences and Environmental Requirements.....	3-153
3.11.4	Existing Threats.....	3-162
3.12	THREATENED AND ENDANGERED SPECIES.....	3-164
3.12.1	Federally Listed Threatened and Endangered Species .....	3-164
3.12.2	State-listed and Special Status Species .....	3-174
3.13	SOCIOECONOMICS.....	3-176
3.13.1	Economy, Employment, Businesses, and Industrial Activity .....	3-177
3.13.2	Population.....	3-179
3.13.3	Housing and Property Values .....	3-182
3.13.4	Tax Revenue .....	3-185
3.13.5	Public Services and Utilities .....	3-186
3.13.6	Community Cohesion .....	3-187
3.13.7	Protection of Children .....	3-190
3.14	COMMERCIAL FISHERIES .....	3-191
3.14.1	Overview.....	3-191
3.14.2	Shrimp Fishery .....	3-197
3.14.3	Oyster Fishery .....	3-201
3.14.4	Crab Fishery .....	3-204
3.14.5	Finfish Fishery .....	3-206
3.14.6	Aquaculture .....	3-210
3.14.7	Seafood Industry Regional Economic Contribution .....	3-212
3.15	ENVIRONMENTAL JUSTICE.....	3-215
3.16	RECREATION AND TOURISM.....	3-231
3.16.1	Introduction.....	3-231
3.16.2	Recreational Fishing.....	3-235
3.16.3	Hunting .....	3-242
3.16.4	Wildlife Watching, Including Birding .....	3-247
3.16.5	Recreational Boating Activities .....	3-247
3.16.6	Visitation to Non-governmental Protected Areas.....	3-249
3.17	PUBLIC LANDS .....	3-249
3.17.1	Barataria Basin .....	3-250
3.17.2	Birdfoot Delta.....	3-251
3.18	LAND USE AND LAND COVER.....	3-251
3.18.1	Historical Land Cover .....	3-251
3.18.2	Existing Land Use/Land Cover .....	3-252

3.18.3	Zoning.....	3-254
3.18.4	Future Land Use.....	3-256
3.19	AESTHETIC AND VISUAL RESOURCES .....	3-257
3.19.1	Existing Environment.....	3-257
3.19.2	Potential Visual Receptors .....	3-258
3.20	PUBLIC HEALTH AND SAFETY, INCLUDING FLOOD AND STORM HAZARD RISK REDUCTION.....	3-258
3.20.1	Overview.....	3-258
3.20.2	Storm Surge and Flooding.....	3-259
3.20.3	Risk Reduction Measures.....	3-263
3.21	NAVIGATION .....	3-267
3.21.1	Mississippi River.....	3-268
3.21.2	Federal Channels in the Barataria Basin.....	3-274
3.22	LAND-BASED TRANSPORTATION .....	3-278
3.22.1	Roads .....	3-278
3.22.2	Rail .....	3-281
3.23	HAZARDOUS, TOXIC, AND RADIOACTIVE WASTE ASSESSMENT.....	3-282
3.23.1	Records Review .....	3-283
3.23.2	Field Survey.....	3-287
3.24	CULTURAL RESOURCES.....	3-288
3.24.1	Prehistoric and Historical Background of the Project Area.....	3-289
3.24.2	Cultural Resources Compliance .....	3-290
3.24.3	Cultural Resources in the Project Areas of Potential Effect .....	3-291
3.24.4	Investigations and Compliance.....	3-292
<b>4.0</b>	<b>ENVIRONMENTAL CONSEQUENCES.....</b>	<b>4-1</b>
4.1	APPROACH TO EVALUATION OF ENVIRONMENTAL CONSEQUENCES .....	4-1
4.1.1	Context .....	4-2
4.1.2	Intensity .....	4-3
4.1.3	Overview of Delft3D Basinwide Model for Impact Analysis .....	4-5
4.2	GEOLOGY AND SOILS .....	4-14
4.2.1	Area of Potential Impacts .....	4-14
4.2.2	Guidelines for Geology and Soils Impact Determinations .....	4-14
4.2.3	Geology, Topography, and Geomorphology .....	4-15
4.2.4	Mineral Resources.....	4-46
4.2.5	Soils and Prime Farmland .....	4-49
4.2.6	Summary of Potential Impacts.....	4-52
4.3	GROUNDWATER RESOURCES.....	4-56
4.3.1	Area of Potential Impacts .....	4-56
4.3.2	Guidelines for Groundwater Resources Impact Determinations .....	4-56
4.3.3	Construction Impacts.....	4-57
4.3.4	Operational Impacts .....	4-59
4.3.5	Summary of Potential Impacts.....	4-61
4.4	SURFACE WATER AND COASTAL PROCESSES.....	4-63
4.4.1	Area of Potential Impacts .....	4-63

4.4.2	Guidelines for Surface Water/Coastal Processes Impact Determinations .....	4-63
4.4.3	Overview of Modeling for Impact Analysis.....	4-64
4.4.4	Hydrology and Hydrodynamics.....	4-65
4.4.5	Stormwater Management and Drainage.....	4-121
4.4.6	Summary of Potential Impacts.....	4-124
4.5	SURFACE WATER AND SEDIMENT QUALITY.....	4-128
4.5.1	Area of Potential Impacts .....	4-128
4.5.2	Guidelines for Water and Sediment Quality Impact Determinations .....	4-129
4.5.3	Overview of Modeling for Impact Analysis.....	4-130
4.5.4	Construction Impacts.....	4-132
4.5.5	Operational Impacts .....	4-135
4.5.6	Summary of Potential Impacts.....	4-207
4.5.7	Section 408 Impacts .....	4-211
4.6	WETLAND RESOURCES AND WATERS OF THE U.S. ....	4-213
4.6.1	Area of Potential Impacts .....	4-213
4.6.2	Overview of Modeling Impact Analysis .....	4-213
4.6.3	Guidelines for Wetland Impact Determinations .....	4-214
4.6.4	Construction Impacts.....	4-215
4.6.5	Operational Impacts .....	4-222
4.6.6	Summary of Potential Impacts.....	4-258
4.7	AIR QUALITY.....	4-262
4.7.1	Area of Potential Impacts .....	4-262
4.7.2	Guidelines for Air Quality Impact Determinations .....	4-263
4.7.3	Construction Impacts.....	4-263
4.7.4	Operational Impacts .....	4-266
4.7.5	Summary of Potential Impacts.....	4-268
4.8	NOISE .....	4-270
4.8.1	Area of Potential Impacts .....	4-270
4.8.2	Guidelines for Noise Impact Determinations .....	4-272
4.8.3	Construction Impacts.....	4-272
4.8.4	Operational Impacts .....	4-278
4.8.5	Summary of Potential Impacts.....	4-280
4.9	TERRESTRIAL WILDLIFE AND HABITAT .....	4-282
4.9.1	Area of Potential Impacts .....	4-282
4.9.2	Guidelines for Terrestrial Wildlife and Habitat Impact Determinations .....	4-282
4.9.3	Construction Impacts.....	4-284
4.9.4	Operational Impacts .....	4-290
4.9.5	Summary of Potential Impacts.....	4-304
4.10	AQUATIC RESOURCES.....	4-307
4.10.1	Area of Potential Impacts .....	4-307
4.10.2	Guidelines for Aquatic Resource Impact Determinations .....	4-307
4.10.3	Construction Impacts.....	4-308
4.10.4	Operational Impacts .....	4-323
4.10.5	Summary of Potential Impacts.....	4-430
4.11	MARINE MAMMALS .....	4-435
4.11.1	Area of Potential Impacts .....	4-435
4.11.2	Guidelines for Marine Mammal Impact Determinations.....	4-436

4.11.3	Overview of Impact Analysis Approach .....	4-436
4.11.4	Construction Impacts .....	4-442
4.11.5	Operational Impacts .....	4-448
4.11.6	Summary of Potential Impacts.....	4-497
4.12	THREATENED AND ENDANGERED SPECIES.....	4-501
4.12.1	Area of Potential Impacts .....	4-501
4.12.2	Federally Listed or Proposed Threatened and Endangered Species .....	4-502
4.12.3	State-listed Threatened and Endangered Species .....	4-531
4.12.4	Summary of Potential Impacts.....	4-537
4.13	SOCIOECONOMICS.....	4-539
4.13.1	Area of Potential Impacts .....	4-540
4.13.2	Guidelines for Socioeconomics Impact Determinations .....	4-542
4.13.3	Key Drivers of Socioeconomic Operational Impacts.....	4-543
4.13.4	Construction Impacts .....	4-546
4.13.5	Operational Impacts .....	4-560
4.13.6	Summary of Potential Impacts.....	4-582
4.14	COMMERCIAL FISHERIES .....	4-587
4.14.1	Area of Potential Impacts .....	4-587
4.14.2	Guidelines for Commercial Fishing Impact Determinations .....	4-587
4.14.3	Construction Impacts.....	4-589
4.14.4	Operational Impacts .....	4-590
4.14.5	Summary of Potential Impacts.....	4-621
4.15	ENVIRONMENTAL JUSTICE.....	4-625
4.15.1	Area of Potential Impact .....	4-626
4.15.2	Guidelines for Environmental Justice Impact Determinations .....	4-627
4.15.3	Construction Impacts.....	4-628
4.15.4	Operational Impacts .....	4-631
4.15.5	Summary of Potential Impacts.....	4-648
4.16	RECREATION AND TOURISM.....	4-654
4.16.1	Area of Potential Impacts .....	4-654
4.16.2	Overview of Methodology and Sources for Analysis .....	4-654
4.16.3	Guidelines for Recreation and Tourism Impact Determinations .....	4-655
4.16.4	Construction Impacts.....	4-656
4.16.5	Operational Impacts .....	4-658
4.16.6	Summary of Potential Impacts.....	4-673
4.17	PUBLIC LANDS .....	4-677
4.17.1	Area of Potential Impacts .....	4-677
4.17.2	Guidelines for Public Lands Impact Determinations .....	4-677
4.17.3	Construction Impacts.....	4-678
4.17.4	Operational Impacts .....	4-679
4.17.5	Summary of Potential Impacts.....	4-684
4.18	LAND USE AND LAND COVER.....	4-686
4.18.1	Area of Potential Impacts .....	4-686
4.18.2	Guidelines for Land Use/Land Cover Impact Determinations .....	4-686
4.18.3	Construction Impacts.....	4-686

4.18.4	Operational Impacts .....	4-691
4.18.5	Summary of Potential Impacts.....	4-694
4.19	AESTHETIC AND VISUAL RESOURCES .....	4-697
4.19.1	Area of Potential Impacts .....	4-697
4.19.2	Guidelines for Aesthetic and Visual Resources Impact Determinations .....	4-697
4.19.3	Construction Impacts.....	4-698
4.19.4	Operational Impacts .....	4-699
4.19.5	Summary of Potential Impacts.....	4-703
4.20	PUBLIC HEALTH AND SAFETY, INCLUDING FLOOD AND STORM HAZARD RISK REDUCTION .....	4-704
4.20.1	Area of Potential Impacts .....	4-704
4.20.2	Guidelines for Public Health and Safety Impact Determinations .....	4-704
4.20.3	Overview of Model for Impact Analysis .....	4-705
4.20.4	Storm Surge and Flooding.....	4-707
4.20.5	Summary of Potential Impacts.....	4-764
4.21	NAVIGATION .....	4-766
4.21.1	Area of Potential Impacts .....	4-766
4.21.2	Overview of Modeling Impact Analysis .....	4-767
4.21.3	Guidelines for Navigation Impact Determinations.....	4-768
4.21.4	Mississippi River.....	4-768
4.21.5	Barataria Basin .....	4-782
4.21.6	Summary of Potential Impacts.....	4-798
4.22	LAND-BASED TRANSPORTATION .....	4-801
4.22.1	Area of Potential Impacts .....	4-801
4.22.2	Guidelines for Land-Based Transportation Impact Determinations .....	4-801
4.22.3	Roads .....	4-802
4.22.4	Rail .....	4-808
4.22.5	Summary of Potential Impacts.....	4-812
4.23	HAZARDOUS, TOXIC, AND RADIOACTIVE WASTE ASSESSMENT.....	4-813
4.23.1	Area of Potential Impacts .....	4-813
4.23.2	Guidelines for HTRW Impact Determinations.....	4-814
4.23.3	Construction Impacts.....	4-815
4.23.4	Operational Impacts .....	4-817
4.23.5	Summary of Potential Impacts.....	4-819
4.24	CULTURAL RESOURCES.....	4-821
4.24.1	Area of Potential Impacts .....	4-821
4.24.2	Construction Impacts.....	4-821
4.24.3	Operations Impacts .....	4-822
4.24.4	Summary of Potential Impacts.....	4-827
4.25	CUMULATIVE IMPACTS .....	4-828
4.25.1	Methodology for Assessing Cumulative Impacts.....	4-829
4.25.2	Geology and Soils .....	4-862
4.25.3	Groundwater.....	4-870
4.25.4	Surface Water and Coastal Processes.....	4-870
4.25.5	Surface Water and Sediment Quality .....	4-883
4.25.6	Wetland Resources and Waters of the U.S.....	4-900
4.25.7	Air Quality .....	4-911

4.25.8	Noise .....	4-913
4.25.9	Terrestrial Wildlife and Habitat .....	4-917
4.25.10	Aquatic Resources .....	4-922
4.25.11	Marine Mammals .....	4-929
4.25.12	Threatened and Endangered Species .....	4-934
4.25.13	Socioeconomics .....	4-943
4.25.14	Commercial Fisheries .....	4-948
4.25.15	Environmental Justice .....	4-952
4.25.16	Recreation and Tourism .....	4-956
4.25.17	Public Lands .....	4-960
4.25.18	Land Use and Land Cover .....	4-965
4.25.19	Aesthetic and Visual Resources .....	4-968
4.25.20	Public Health and Safety, Including Flood and Storm Hazard Risk Reduction .....	4-972
4.25.21	Navigation .....	4-980
4.25.22	Land-Based Transportation .....	4-984
4.25.23	Hazardous, Toxic, and Radioactive Waste .....	4-987
4.25.24	Cultural Resources .....	4-987
4.25.25	Cumulative Impacts Analysis 2022 Addendum .....	4-990
4.26	ADDITIONAL CONSIDERATIONS IN PLANNING .....	4-997
4.26.1	Relationship Between Short-term Use of the Human Environment and Long-term Productivity .....	4-997
4.26.2	Irreversible and Irrecoverable Commitment of Resources .....	4-998
4.26.3	Unavoidable Adverse Impacts .....	4-999
4.26.4	Consideration of Incomplete or Unavailable Information .....	4-1001
4.27	MITIGATION SUMMARY .....	4-1010
4.27.1	Avoidance and Minimization .....	4-1012
4.27.2	Compensatory Mitigation .....	4-1022
4.27.3	Potential Permit Special Conditions .....	4-1023
<b>5.0</b>	<b>CONSULTATION AND COORDINATION .....</b>	<b>5-1</b>
5.1	Compliance with Laws, Regulations, and Executive Orders .....	5-1
5.2	Cooperating Agency Review Process (General) .....	5-3
5.3	Fish and Wildlife Coordination Act Report Recommendations .....	5-6
<b>6.0</b>	<b>LIST OF PREPARERS .....</b>	<b>6-1</b>
<b>7.0</b>	<b>PUBLIC INVOLVEMENT .....</b>	<b>7-1</b>
7.1	PROJECT WEBSITE .....	7-1
7.2	SUMMARY OF SCOPING PROCESS .....	7-1
7.2.1	Notice of Intent .....	7-2
7.2.2	Scoping Meetings .....	7-2
7.2.3	Scoping Comments .....	7-3
7.3	SUMMARY OF DRAFT EIS PUBLIC INVOLVEMENT PROCESS .....	7-4
7.3.1	Opportunity for Public Comments .....	7-4
7.3.2	Distribution of Documents for Public Review .....	7-6
7.3.3	Summary of Public Meetings .....	7-7
7.4	OPPORTUNITY FOR PUBLIC REVIEW OF THE FINAL EIS .....	7-8
7.5	RECORD OF DECISION .....	7-9

## List of Appendices

Appendix A	Permit Application (Section 10/404) and Permissions Request (Section 408)
Appendix B	Public Involvement
Appendix C	Notice of Intent
Appendix D	Alternatives Information
Appendix E	Delft3D Basinwide Modeling
Appendix F	MBSD Design and Operations Information
Appendix G	Wetlands/Waters of the U.S.
Appendix H	Socioeconomics Technical Information
Appendix I	Traffic Study
Appendix J	Hazardous Toxic and Radioactive Waste Assessment
Appendix K	Cultural Resources Information
Appendix L	Water Quality Information
Appendix M	Terrestrial Habitat and Wildlife Report
Appendix N	Aquatic Resources including Essential Fish Habitat
Appendix O	Biological Assessment & Biological Opinion
Appendix P	Flood and Storm Hazards Evaluation
Appendix Q	Navigation/Dredging Analysis
Appendix R	Mitigation & Monitoring and Adaptive Management Plans
Appendix S	Compliance Documentation
Appendix T	USFWS Coordination Act Report (CAR)
Appendix U	Summary of Select Natural and Man-made Diversions in Southeastern Louisiana

## List of Tables

Table 1.6-1	Example Comment Topics Expressed in Public Scoping Comments and EIS Chapters that Address Them .....	1-15
Table 1.7-1.	Summary of Substantial Changes to the Final EIS as a Result of Comments on the Draft EIS, Updated Project Designs, and Continued Project Coordination .....	1-17
Table 1.8-1	Proposed MBSD Project NEPA Contributing Agencies and Relevant Authorities .....	1-24
Table 1.8-2	National Historic Preservation Act, Section 106 Consultation .....	1-26
Table 1.8-3	FAST-41 Agency Roles .....	1-27
Table 2.3-1	Comparison of Functional Alternatives to Screening Criteria .....	2-13
Table 2.4-1	Diversion Sizes Considered in Previous Studies .....	2-40
Table 2.4-2	Sediment Load Summary .....	2-42
Table 2.6-1	Summary of Alternatives Considered but Eliminated .....	2-50
Table 2.8-1	Project Design Elements .....	2-55
Table 2.8-2	Project Construction and Operational Footprint Acreages (60 percent design) .....	2-57
Table 2.9-1	Comparative Summary of Potential MBSD Impacts Under Each Alternative (as Compared to the No Action Alternative unless Otherwise Stated) .....	2-75
Table 3.1-1	Parish Acreages in Project Area.....	3-2
Table 3.2-1	Summary of Oil/Gas Wells in the Project Area by Well Status .....	3-16
Table 3.3-1	Groundwater Withdrawals, in Million Gallons per Day (Mgal/d) .....	3-20
Table 3.4-1	Summarized Water Levels within the Barataria Basin.....	3-29
Table 3.5-1	LDEQ Generated TMDLs for Subsegments within the Barataria Basin .....	3-38
Table 3.5-2	Ambient Water Quality Data Used to Describe Project Area.....	3-39
Table 3.5-3	Specific Conductance versus Salinity at 77°F (25°C).....	3-41
Table 3.5-4	Comparison of Mississippi River and Barataria Basin Temperature and Specific Conductance .....	3-41
Table 3.5-5	Monthly Average Salinity (ppt) at Select Barataria Basin Stations .....	3-45
Table 3.5-6	Average Monthly Nutrient Concentrations in the Mississippi River and Barataria Basin.....	3-48
Table 3.5-7	Parameters for Dredge Sediment Quality Evaluations: USEPA Priority Pollutants, Contaminants of Concern (COC), and Conventional Parameters.....	3-59
Table 3.6-1	Wetland Habitat Types Occurring within the Project Area.....	3-65
Table 3.6-2	Common Plant Species Occurring within the Project Area by Wetland Type .....	3-66
Table 3.6-3	Potential Invasive Wetland Plant Species and Habitat Type in the Barataria Basin.....	3-80
Table 3.7-1	National Ambient Air Quality Standards .....	3-81
Table 3.8-1	Sound Levels and Relative Loudness .....	3-84

Table 3.8-2	FHWA Noise Abatement Criteria Hourly A-weighted Sound Level Decibels .....	3-86
Table 3.8-3	Nearest Noise Sensitive Areas to the Mid-Barataria Sediment Diversion Project Facilities .....	3-87
Table 3.9-1	Terrestrial Habitat Types and Ranks in the Barataria Basin Ecoregions .....	3-89
Table 3.9-2	Select Terrestrial Wildlife Species in the Project Area .....	3-93
Table 3.9-3	Primary Terrestrial Invasive Plant Species Reported for Parishes in the Barataria Basin.....	3-99
Table 3.10-1	Benthic Lower Trophic Level Taxa and Habitat Associations in the Barataria Basin .....	3-105
Table 3.10-2	Essential Fish Habitat in the Barataria Basin and Nearshore Shelf Waters Off Louisiana.....	3-110
Table 3.10-3	Modeled Habitat and Environmental Requirements for Fauna in the Barataria Basin.....	3-117
Table 3.10-4	Potential Aquatic Invasive Animal Species Occurring within the Barataria Basin.....	3-144
Table 3.11-1	Information on Dolphin Stocks Considered in the Proposed Project EIS .....	3-147
Table 3.11-3	BBES Dolphin Prey Species Based on Stomach Contents .....	3-159
Table 3.11-4	Marine Mammal Hearing Groups .....	3-164
Table 3.12-1	Special Status Species Potentially Occurring in the Project Area .....	3-166
Table 3.12-2	State-listed Species and Species of Concern Potentially Occurring in the Mid-Barataria Sediment Diversion.....	3-175
Table 3.13-1	Average Annual Establishment Count, Employment, and Pay by Industry for All Parishes Intersecting the Project Area (2019) .....	3-179
Table 3.13-2	Population of Parishes within or Partially in the Project Area .....	3-180
Table 3.13-3	NFIP Flood Insurance Premiums as of 2022.....	3-184
Table 3.13-4	FEMA Estimates of Increases in Flood Insurance Premiums under Risk Rating 2.0.....	3-185
Table 3.13-5	Sales, Property, and Income Tax Revenues by Parish .....	3-186
Table 3.13-6	Coastal Community Well-being Indicators by Parish, 2012.....	3-190
Table 3.13-7	Percentage of Children in Poverty by Parish (2014 to 2018) .....	3-191
Table 3.14-1	Number of Licensed Commercial Fishers Active in the Barataria and Mississippi River Basins, Average 2014 to 2018 .....	3-193
Table 3.14-2	Project Area Landings by Species Group (lbs), Average 2014 to 2018.....	3-197
Table 3.14-3	Average Annual Shrimp Activity by Area Fished, 2014 to 2018 .....	3-200
Table 3.14-4	Average Annual Oyster Activity by Area Fished, 2014 to 2018.....	3-203
Table 3.14-5	Average Annual Crab Activity by Area Fished, 2014 to 2018.....	3-205
Table 3.14-6	Average Annual Saltwater Finfish Activity by Area Fished, 2014 to 2018.....	3-208
Table 3.14-7	Average Annual Freshwater Finfish Activity by Area Fished, 2014 to 2018 .....	3-210
Table 3.14-8	2012 Aquaculture in the Project Area by Parish.....	3-212

Table 3.14-9	Economic Impacts of the Louisiana Seafood Industry, 2019 (Without Imports) (Millions of 2017 Dollars).....	3-213
Table 3.14-10	Commercial Fishing Engagement and Reliance Indices by Coastal Community, 2017 .....	3-214
Table 3.15-1	Minority Populations for Census Block Groups within or Intersecting the Project Area (average, 2014 to 2018) .....	3-217
Table 3.15-2	Economic Indicators for Census Block Groups Intersecting the Project Area (average, 2014 to 2018).....	3-218
Table 3.15-3	Percent of Population 65 Years and Over for Census Block Groups Intersecting the Project Area (2014 to 2018).....	3-219
Table 3.15-4	Coastal Communities in the Project Area with Potential Minority and Low-Income Fishing and Hunting Participation.....	3-221
Table 3.15-5	Community Social Vulnerability Indices by Coastal Community, 2016 .....	3-222
Table 3.15-6	Communities with Minority and/or Low-Income Populations Considered and Selected for Environmental Justice Impact Analysis.....	3-224
Table 3.16-1	Recreation Areas in the Project Area.....	3-233
Table 3.16-2	Recreational Fishing and Boating Access Facilities in the Project Area.....	3-234
Table 3.16-3	MRIP-estimated Recreational Fishing Trips by Parish, 2010 to 2016 .....	3-239
Table 3.16-4	Recreational Fishing Engagement and Reliance Indices by Coastal Community, 2014.....	3-240
Table 3.16-5	Estimated Annual Boating Trips by Site in the Barataria Basin.....	3-241
Table 3.16-6	Estimated Fishing Trips by Year in the Barataria Basin, 2014 to 2018.....	3-242
Table 3.16-7	Average Annual Number of Hunting Licenses by Type, 2010 to 2017 .....	3-244
Table 3.16-8	Estimated Annual Shoreline Trips by Area in the Barataria Basin .....	3-246
Table 3.16-9	Motorboat Registrations by Parish, 1988 to 2011 .....	3-248
Table 3.18-1	Project Area Land Use Types.....	3-253
Table 3.21-1	Mississippi River Channel Vessel Transits, New Orleans to Head of Passes .....	3-271
Table 3.21-2	Mississippi River Cargo Tons (000) by River Segment and Major Commodity Groups by Foreign and Domestic Sources, 2016 .....	3-272
Table 3.21-3	Lower Mississippi River Deep-Draft Port Commodity Tons (000) by Domestic and Foreign Cargo, 2016 .....	3-273
Table 3.21-4	Barataria Basin Vessel Transits .....	3-276
Table 3.21-5	Barataria Basin Commercial Waterborne Cargo (in tons) .....	3-277
Table 3.22-1	LA 23 AADT in the Project Area (2015).....	3-280
Table 3.23-1	Potential REC Sites Identified in Federal, State, and Tribal Databases .....	3-283
Table 4.1-1	Summary of Mississippi River Historical Representative Hydrographs for each Modeled Decade of Operations.....	4-7
Table 4.1-2	Summary of Mississippi River Additional Hydrographs .....	4-8

Table 4.1-3	Mean Number of Days Diversion is Projected to be Operational by Decade.....	4-10
Table 4.1-4	Sea-level Rise Rates used in Delft3D Basinwide Model .....	4-12
Table 4.2-1	Approximate Area of Excavation/Dredging during Construction .....	4-17
Table 4.2-2	General Description of Project Alternatives .....	4-19
Table 4.2-3	Model-projected Total Land Area under the No Action Alternative .....	4-21
Table 4.2-4	Delft3D Basinwide Model-projected Cumulative Net Changes in Retained Sediment Volume and Land Area under Action Alternatives Relative to No Action Alternative (NAA) .....	4-24
Table 4.2-5	Model-projected Total Land Area Under No Action Alternative (NAA) and Net Changes in Land Area (ac) Relative to NAA under All Alternatives .....	4-39
Table 4.2-6	Summary of Potential Impacts on Geology and Soils from Each Alternative .....	4-53
Table 4.3-1	Summary of Potential Impacts on Groundwater from Each Alternative .....	4-61
Table 4.4-1	Stations for Comparison of Project Impacts .....	4-65
Table 4.4-2	Progression of Changes in Bed Elevation for No Action Alternative at Six Locations in the Barataria Basin for the Modeled Period 2020 to 2070 .....	4-70
Table 4.4-3	Changes in Bed Elevation for Project Alternatives at Six Locations in the Barataria Basin and Birdfoot Delta for the Modeled Period 2020 to 2070 Relative to No Action Alternative .....	4-73
Table 4.4-4	Maximum Monthly Average Water Level Differences for Project Alternatives at Seven Locations in the Barataria Basin for the Modeled Period 2020 to 2070 relative to No Action Alternative (Representative Hydrograph).....	4-84
Table 4.4-5	Tidal Changes for No Action 2040 and 2070 Conditions Compared to No Action 2020 Conditions May 1994 Hydrograph – High, Consistent Spring Flow (Diversion Operating above Base Flow) ....	4-98
Table 4.4-6	Tidal Impacts for Alternatives Compared to the No Action Alternative Modeled Years 2020, 2040, and 2070, May 1994 Hydrograph (High, Consistent Spring Flow; Diversion Operating Above Base Flow).....	4-104
Table 4.4-7	Summary of Potential Impacts on Surface Water and Coastal Processes from Each Alternative .....	4-125
Table 4.5-1	Stations for Comparison of Project Impacts .....	4-131
Table 4.5-2	Minimum and Maximum Average Monthly Salinities, All Project Alternatives (2020-2070) (ppt) .....	4-141
Table 4.5-3	DO Ranges at Six Barataria Basin Stations: Comparison between No Action Alternative and Applicant’s Preferred Alternative (2020 to 2070).....	4-187
Table 4.5-4	Summary of Potential Impacts on Water and Sediment Quality from Each Alternative.....	4-207
Table 4.5-5	Projected Davis Pond Freshwater Diversion Opening .....	4-213
Table 4.5-6	Davis Pond Freshwater Diversion Number of Open Days 2015 to 2019 .....	4-213

Table 4.6-1	Wetlands and Waters of the U.S. within the Project Construction Footprint.....	4-217
Table 4.6-2	Model-projected Total Wetland Area, by Basin, under the No Action Alternative .....	4-224
Table 4.6-3	Results of Vegetation Modeling and Projected Acreage of Wetland Acreage, by Decade and Wetland Type, for the Project Alternatives .....	4-241
Table 4.6-4	Percentage of Wetland Gains and Losses when Compared with the No Action Alternative Acres (Percent).....	4-244
Table 4.6-5	Results of the Wetland Value Assessment in Net Acres and AAHUs for Project Construction Impacts .....	4-256
Table 4.6-6	Results of the Wetland Value Assessment in Net AAHUs for the Project Alternatives as Compared with the No Action Alternative, by Decade .....	4-257
Table 4.6-7	Results of the Wetland Value Assessment for Fresh/Intermediate Habitats in Net AAHUs for the Project Alternatives as Compared with the No Action Alternative, by Decade .....	4-258
Table 4.6-8	Results of the Wetland Value Assessment for Brackish/Saline Habitats in Net AAHUs for the Project Alternatives as Compared with the No Action Alternative, by Decade .....	4-258
Table 4.6-9	Summary of Potential Impacts on Wetlands from Each Alternative ...	4-259
Table 4.7-1	Summary of Potential Emissions from Concrete Manufacturing Plant (Tons per Day) .....	4-265
Table 4.7-2	Summary of Potential Emissions from Back-up Generator (Tons per Year) .....	4-267
Table 4.7-3	Summary of Potential Impacts on Air Quality from Each Alternative .....	4-269
Table 4.8-1	A-weighted (dBA) Sound Levels of Typical Construction Equipment and Modeled Attenuation at Various Distances .....	4-274
Table 4.8-2	Noise Levels Associated with Outdoor Construction and Estimated Impacts on NSAs .....	4-275
Table 4.8-3	Estimated Sound Levels from Underwater Noise Sources.....	4-277
Table 4.8-4	Summary of Potential Impacts on Resources Exposed to Noise from Each Alternative .....	4-280
Table 4.9-1	Summary of HIS Results for Modeled Species Under the No Action Alternative .....	4-293
Table 4.9-2	HSI Scores for No Action Alternatives for Select Species and Polygons and Comparison of Operational Alternatives to the No Action Alternative .....	4-298
Table 4.9-3	Summary of Potential Impacts on Terrestrial Wildlife and Habitat from Each Alternative.....	4-304
Table 4.10-1	Acoustic Thresholds for Fish .....	4-318
Table 4.10-2	Estimated Zone of Influence from Underwater Sounds for Fish .....	4-319
Table 4.10-3	Change in Winter Salinity Regime Over Time .....	4-328
Table 4.10-4	Dominant Taxa and Trends Before, During, and After the 1997 Opening of the Bonnet Carré Spillway .....	4-333

Table 4.10-5	Projected Salinity Ranges by Decade at Representative Stations with Applicant's Preferred Alternative .....	4-356
Table 4.10-6	Summary of Key Species Impacts.....	4-386
Table 4.10-7	HSI Scores for No Action Alternatives for Select Species and Polygons and Comparison of Operational Alternatives to the No Action Alternative .....	4-426
Table 4.10-8	Summary of Potential Impacts on Aquatic Resources from Each Alternative .....	4-430
Table 4.11-1	Acoustic Thresholds for Mid-frequency Cetaceans (including dolphins).....	4-445
Table 4.11-2	Estimated Zone of Influence from Underwater Sounds for Mid-frequency Cetaceans (including dolphins) .....	4-446
Table 4.11-3	Stations Used for Comparison of Proposed Project Impacts on BBES Dolphins.....	4-451
Table 4.11-4	Projected Durations of the Median Longest Streak of Low-Salinity Exposure (less than 5 ppt) in a Given Year for a Simulated BBES Dolphin Population under the No Action Alternative and the Applicant's Preferred Alternative (Average River Flow Hydrograph) .....	4-487
Table 4.11-5	Projected Mean Annual Survival Rates Due to Low-salinity Exposure for a Simulated BBES Dolphin Population under the No Action Alternative and the Applicant's Preferred Alternative in the First Decade of the Proposed Project .....	4-487
Table 4.11-6	Differences between the Projected Duration of Low-Salinity Exposure (less than 5 ppt) for a Simulated BBES Dolphin Population under the No Action Alternative (NAA) and Each Action Alternative .....	4-493
Table 4.11-7	Differences between the Projected Mean Survival Rate due to Low-salinity Exposure of a Simulated BBES Dolphin Population under the No Action Alternative (NAA) and Each Action Alternative .....	4-494
Table 4.11-8	Summary of Potential Impacts on Marine Mammals from Each Alternative .....	4-498
Table 4.12-1	Endangered Species Act Determinations, as identified in the Project Biological Assessment .....	4-504
Table 4.12-2	Acoustic Thresholds for Sea Turtles.....	4-512
Table 4.12-5	Summary of Potential Impacts on Threatened and Endangered Species from Each Alternative .....	4-537
Table 4.13-1	Economic Benefits of Engineering and Design – Applicant's Preferred Alternative (2018\$).....	4-548
Table 4.13-2	Economic Benefits from Construction – Applicant's Preferred Alternative (2018\$).....	4-549
Table 4.13-3	Economic Benefits from Construction – 50,000 cfs Alternative (2018\$).....	4-556
Table 4.13-4	Economic Benefits from Construction – 150,000 cfs Alternative (2018\$).....	4-557
Table 4.13-5	Assessed Values of Residential Properties Located near the Proposed Project Site outside Flood Protection.....	4-570

Table 4.13-6	Summary of Potential Impacts on Socioeconomics from Each Alternative .....	4-582
Table 4.14-1	Expected Trends in Project Area Fish Abundance Under the No Action Alternative .....	4-591
Table 4.14-2	Expected Trends in the Project Area Fisheries Under the Applicant's Preferred Alternative .....	4-607
Table 4.14-3	Summary of Potential Impacts on Commercial Fisheries from Each Alternative .....	4-622
Table 4.15-1	Summary of Communities where the Applicant's Preferred Alternative Could Impact Low-income and Minority Populations ...	4-637
Table 4.15-2	Projected Maximum Surge Elevation Differences at the NOV-NFL Levee between the No Action Alternative and Applicant's Preferred Alternative for 1 Percent AEP (100-Year) Storms in 2040 and 2070 .....	4-642
Table 4.15-3	Summary of Potential Impacts on Environmental Justice from Each Alternative .....	4-648
Table 4.16-1	Modeled Percent of Days of Restricted Access Due to Tidal Flooding .....	4-659
Table 4.16-2	Percentage of Angler Trips in the Barataria Basin Reporting Fish Species as Caught or Targeted, 2014 to 2018 .....	4-660
Table 4.16-3	Comparison of Delft3D Basinwide-Modeled Wetland Acreages between the No Action Alternative and the Action Alternatives in Privately Managed Recreation Areas .....	4-662
Table 4.16-4	Expected Trends in the Barataria Basin Fish Abundance Under the Applicant's Preferred Alternative Compared to the No Action Alternative .....	4-666
Table 4.16-5	Summary of Potential Impacts on Recreation and Tourism from Each Alternative .....	4-673
Table 4.17-1	Comparison of Delft3D Basinwide-Modeled Wetland Acreages between the No Action Alternative (NAA) and the Action Alternatives in Public Lands .....	4-680
Table 4.17-2	Summary of Potential Impacts on Public Lands from Each Alternative .....	4-684
Table 4.18-1	Land Use Types Impacted by Project Construction Footprint .....	4-688
Table 4.18-2	Summary of Potential Impacts on Land Use and Land Cover from Each Alternative .....	4-695
Table 4.19-1	Summary of Potential Impacts on Aesthetic and Visual Resources from Each Alternative .....	4-703
Table 4.20-1	Projected Days of Water Surface Elevation Exceeding Inundation Threshold Elevation under the No Action Alternative (2011 hydrograph [high, late spring flood flow]) .....	4-715
Table 4.20-2	Number of Annual Days of Tidal Flooding Under the Applicant's Preferred Alternative Relative to the No Action Alternative .....	4-717
Table 4.20-3	Projected Minimum and Maximum Storm Surge Elevation Increases for Year 2040 and 2070 Relative to Year 2020 for All Simulated 1 Percent AEP Storms under the No Action Alternative (feet) .....	4-728

Table 4.20-4	Projected Minimum and Maximum Wave Height Increases for Year 2040 and 2070 relative to Year 2020 for All Simulated 1 Percent AEP Storms under the No Action Alternative(feet) .....	4-728
Table 4.20-5	Maximum Storm Surge Elevation and Projected Minimum and Maximum Storm Surge Elevation Increases from 2020 Elevation for Representative 1 Percent AEP Storm under the No Action Alternative.....	4-730
Table 4.20-6	Maximum Wave Height and Projected Minimum and Maximum Wave Height Increases from 2020 Elevation for Representative 1 Percent AEP Storm under the No Action Alternative .....	4-730
Table 4.20-7	Projected Storm Surge Under Applicant’s Preferred Alternative Relative to the No Action Alternative for 1 Percent AEP (100-Year) Storms in Years 2040 and 2070.....	4-737
Table 4.20-8	Summary of Differences between the Applicant’s Preferred Alternative and the No Action Alternative Maximum Wave Height for 1 Percent AEP Storms.....	4-737
Table 4.20-9	Projected Maximum Surge Elevation Differences at the NOV-NFL Levee between the No Action Alternative and Applicant’s Preferred Alternative for 1 Percent AEP and 4 Percent AEP Storms in 2040 and 2070 (feet).....	4-740
Table 4.20-10	Projected Maximum Wave Elevation Differences at the NOV-NFL Levee between the No Action Alternative and Applicant’s Preferred Alternative for 1 Percent AEP and 4 Percent AEP Storms in 2040 and 2070 (feet).....	4-741
Table 4.20-11	Projected Maximum Surge Elevation Differences at the NOV-NFL Levee between the No Action Alternative and 50,000 cfs for 1 Percent AEP and 4 Percent AEP Storms in 2040 and 2070 (feet).....	4-750
Table 4.20-12	Projected Maximum Wave Elevation Differences at the NOV-NFL Levee between the No Action Alternative and 50,000 cfs Alternatives for 1 Percent AEP and 4 Percent AEP Storms in 2040 and 2070 (feet).....	4-751
Table 4.20-13	Projected Maximum Surge Elevation Differences at the NOV-NFL Levee between the No Action Alternative and 150,000 cfs for 1 Percent AEP and 4 Percent AEP Storms in 2040 and 2070 (feet).....	4-753
Table 4.20-14	Projected Maximum Wave Elevation Differences at the NOV-NFL Levee between the No Action Alternative and 150,000 cfs Alternatives for 1 Percent AEP and 4 Percent AEP Storms in 2040 and 2070 (feet).....	4-754
Table 4.20-15	Summary of Potential Impacts on Public Health and Safety, Including Flood and Storm Hazard Risk Reduction from Each Alternative .....	4-764
Table 4.21-1	Mississippi River Passes Total Cargo Tons (000) by Major Commodity Group by Foreign and Domestic Sources, 2000 – 2016 .....	4-770
Table 4.21-2	Mississippi River Passes Total Cargo Tons (000) Forecasted Using Adjusted AACGR 2000-2016 for Petroleum (0.5) and Food and Farm (0.3) Groups, 2017 – 2036 .....	4-772

Table 4.21-3	GIWW Total Cargo Tons by Major Commodity Group by Foreign and Domestic Sources, 2000 – 2016 .....	4-784
Table 4.21-4	GIWW Cargo Tons Forecasted Using AACGR 2000-2016 by Major Commodity Group, 2017 – 2036 .....	4-785
Table 4.21-5	Barataria Bay Waterway Total Cargo Tons by Major Commodity Group, 2000 – 2016 .....	4-786
Table 4.21-6	Barataria Bay Waterway Cargo Tons Forecasted Using AACGR 2000-2016 by Major Commodity Group, 2017 – 2036 .....	4-788
Table 4.21-7	Bayou Lafourche Total Cargo Tons by Major Commodity Group, 2000 – 2016 .....	4-789
Table 4.21-8	Bayou Lafourche Cargo Tons Forecasted Using AACGR 2000-2016 by Major Commodity Group, 2017 – 2036 .....	4-791
Table 4.21-9	Summary of Potential Impacts on Commercial Navigation (including Maintenance Dredging) from Each Alternative .....	4-798
Table 4.22-1	Summary of Potential Impacts on Land-Based Transportation from Each Alternative .....	4-812
Table 4.23-1	Summary of Potential Impacts Associated with HTRW from Each Alternative .....	4-819
Table 4.24-1	CEMVN NRHP-Eligibility Determinations .....	4-823
Table 4.24-2	Summary of Potential Impacts on Cultural Resources from Each Alternative .....	4-827
Table 4.25.1-1	Reasonably Foreseeable Future Projects Considered in the Cumulative Impacts Analysis .....	4-837
Table 4.25.2-1	Reasonably Foreseeable Projects with Cumulative Impacts on Geology and Soils concurrent with MBSD Project Construction and Operations.....	4-863
Table 4.25.2-2	Cumulative Net Changes in Retained Sediment Volume and Land Area: Foreseeable Projects with and without MBSD Project (150K+ Terraces Alternative) .....	4-866
Table 4.25.4-1	Reasonably Foreseeable Projects with Cumulative Impacts on Hydrology and Hydrodynamics during MBSD Project Operations.....	4-872
Table 4.25.4-2	Tidal Values for Reasonably Foreseeable Projects Relative to No Action Alternative 2020, 2040, and 2070 Conditions (feet [meters]) May 1994 Hydrograph – High, Consistent Spring Flow ..	4-878
Table 4.25.5-1	Reasonably Foreseeable Projects with Cumulative Impacts on Water Quality during MBSD Project Construction and Operations.....	4-884
Table 4.25.5-2	Stations for Comparison of Cumulative Impacts .....	4-888
Table 4.25.5-3	Cumulative Minimum and Maximum Average Monthly Salinities for the Reasonably Foreseeable Projects compared to MBSD Project Alternatives (2020 to 2070) (ppt) .....	4-891
Table 4.25.5-4	Cumulative Minimum and Maximum Average Monthly DO for the Reasonably Foreseeable Projects with and without the Proposed MBSD Project Action Alternatives (2020 to 2070) (mg/L).....	4-896

Table 4.25.6-1	Reasonably Foreseeable Projects with Potential Cumulative Impacts on Wetlands during MBSD Project Construction and Operations.....	4-901
Table 4.25.6-2	Results of Vegetation Modeling and Projected Acreage of Wetland Acreage, by Decade and Wetland Type, for the Project Alternatives .....	4-907
Table 4.25.6-3	Wetland Gains and Losses when Compared with the No Action Alternative Acres (Percent) .....	4-908
Table 4.25.17-1	Reasonably Foreseeable Projects with Cumulative Impacts on Public Lands during Operation of the MBSD Project .....	4-962
Table 4.25.18-1	Other Actions within the Geographic and Temporal Scope for Cumulative Impacts on Land Use and Land Cover.....	4-967
Table 4.25.19-1	Other Actions with the Potential to Cumulatively Impact Aesthetic and Visual Resources .....	4-970
Table 4.25.22-1	Reasonably Foreseeable Projects with Cumulative Impacts on Land-based Transportation during Construction of the Proposed MBSD Project .....	4-985
Table 4.25.24-1	Reasonably Foreseeable Projects within the Geographic and Temporal Scope for Cumulative Impacts on Cultural Resources during Operations.....	4-988
Table 4.25.25-1	Reasonably Foreseeable Future Projects Considered in the 2022 Cumulative Impacts Analysis Addendum.....	4-991
Table 4.27-1	Best Management Practices.....	4-1013
Table 4.27-2	Avoidance and Minimization Measures .....	4-1017
Table 4.27-3	Summary of Wetland Impact and Benefits .....	4-1023
Table 5.1-1	Compliance with Environmental Laws, Regulations, and Executive Orders .....	5-1
Table 6-1	List of Preparers .....	6-1
Table 7-1	Primary Topics Identified in Scoping Comments .....	7-4
Table 7-2	Summary of Public Engagement and Number of People Reached to Discuss Sediment Diversions in the Barataria Basin, including the proposed MBSD Project, from 2016 to 2020 .....	7-11
Table 7-3	Summary of Public Engagement and Number of People Reached to Discuss Sediment Diversions in the Barataria Basin, including the proposed MBSD Project, from January 2021 through July 2022.....	7-13

## List of Figures

Figure ES-1.	Project Area (Barataria Basin and Western Portion of the Lower Mississippi River Delta Basin).....	ES-3
Figure ES-2.	Selected Communities, Populations, and Major Levee Systems within the Project Area.....	ES-17
Figure 1.1-1.	Project Area (Barataria Basin and Western Portion of the Lower Mississippi River Delta Basin).....	1-3
Figure 1.1-2.	Project Site Map.....	1-4
Figure 1.3-1.	Proposed MBSD Structure Intake System and Conveyance Channel.....	1-8
Figure 1.5-1.	Major Waterbodies in the Project Area.....	1-11
Figure 2.3-1.	Marsh Creation Cells.....	2-20
Figure 2.4-1.	Locations Considered Through the Iterative Planning Process:.....	2-31
Figure 2.4-2.	Comparison in Diversion Flow Regimes with On/Off Triggers of 300,000 cfs, 450,000 cfs, and 600,000 cfs.....	2-36
Figure 2.4-3.	Monthly Number of Days (Average Value over 50-year Data) when the Mississippi River Discharge is Above a Specific Threshold.....	2-37
Figure 2.4-4.	Differences in Discharge between Three Diversion Capacities Included in the Reasonable Range of Alternatives in this EIS.....	2-45
Figure 2.8-1.	Project Design Features and Construction Footprint.....	2-56
Figure 2.8-2.	Proposed Project Design Features as Viewed from the Mississippi River.....	2-58
Figure 2.8-3.	Upstream View of the Proposed Conveyance Channel, Guide Levees, Stability Berms, and Siphon.....	2-60
Figure 2.8-4.	Proposed Project Outfall Transition Feature in the Barataria Basin.....	2-61
Figure 2.8-5.	Proposed Project Siphon and Drainage Structure.....	2-64
Figure 2.8-6.	Proposed Project Drainage Structure and Location of Impounded Area (Polder).....	2-64
Figure 2.8-7.	Illustration of Variable Flow for 75,000 (75k) cfs Diversions (bottom plot) Driven by 2011 Mississippi River Discharge (top plot) with a 450,000 cfs Operational Trigger in the Mississippi River.....	2-67
Figure 2.8-8.	Illustration of Base Flow (5,000 cfs) and Variable Capacity Flow for 75,000 (75k) cfs, 50,000 (50k) cfs, and 150,000 (150k) cfs Diversions in Relation to the Mississippi River Discharge with a 450,000 cfs Operational Trigger in the Mississippi River.....	2-68
Figure 2.8-9.	Proposed Temporary Cofferdam and Trestle/Dock as Viewed from the Mississippi River.....	2-70
Figure 3.1-1.	Map of Project Area Boundaries and Watersheds within the Project Area.....	3-2
Figure 3.1-2.	Major Waterbodies in the Project Area, with Key Towns and Landmarks.....	3-5
Figure 3.2-1.	Land Area Change in Project Area (1932 to 2016).....	3-11
Figure 3.2-2.	Map of Oil/Gas Fields, Wells, and Pipelines within the Vicinity of the Location Proposed for the Project Diversion Structure.....	3-15

Figure 3.2-3.	Map of Primary Soil Units in Project Area. ....	3-17
Figure 3.2-4.	Prime Farmland in the Project Area. ....	3-18
Figure 3.4-1.	Coastal Barrier Resources System Units in the Project Area.....	3-24
Figure 3.4-2.	Barataria Basin Model Grid Bed Elevations from the Delft Model Version 3. Figure is adapted from Sadid et al. 2018. Elevations are in referenced to NAVD88. ....	3-27
Figure 3.4-3.	Water Level and Wind Speed at the Grand Isle, LA Station.....	3-28
Figure 3.4-4.	Observed Water Levels at NOAA Stations at Southwest Pass (8760922) and Grand Isle (8761724).....	3-30
Figure 3.4-5.	Mississippi River Flow at the Tarbert Landing Gage. ....	3-32
Figure 3.4-6.	Tarbert Landing Annual Total (Blue), Fine (Red) and Coarse (Green) Sediment Concentrations from 1959 to 2005. ....	3-34
Figure 3.4-7.	Seasonal Flow Duration Curves at Tarbert Landing from 1963 to 2005 Showing the Range in Mississippi River Discharge by Season. ....	3-35
Figure 3.4-8.	Boxplots Showing Monthly Variation in Concentrations of Coarse- grained Sediments at Tarbert Landing from 1963 to 2005.....	3-35
Figure 3.5-1.	Mississippi River Water Quality Subsegments in the Project Area. ....	3-37
Figure 3.5-2.	USGS, LDEQ, and CRMS Ambient Water Quality Stations Used for this Section. ....	3-40
Figure 3.5-3.	Monthly Specific Conductance Average (2006 to 2018) at Select Barataria Basin CRMS Sites. ....	3-43
Figure 3.5-4.	Correlation between Monthly Average Specific Conductance and Salinity (2006 to 2018) at Select CRMS Sites.....	3-44
Figure 3.5-5.	Generalized Seasonal Salinity Averages (2006 to 2018) at Select Barataria Basin CRMS Sites. ....	3-45
Figure 3.5-6.	Frequency of Mid-summer Hypoxia (oxygen $\leq$ 2 mg/l) over the 70 to 90 Station Grid on the Louisiana and Texas Shelf during the Summer from 1985 to 2014. ....	3-51
Figure 3.5-7.	Monthly DO Average Concentrations in the Mississippi River at Belle Chasse (1977 to 2017) and at Select Barataria Basin Sites (2006 to 2018).....	3-52
Figure 3.5-8.	Monthly Atrazine Concentrations in the Mississippi River at Belle Chasse (2007 to 2017).....	3-56
Figure 3.5-9.	Sediment Quality Index Ratings for Barataria-Terrebonne Estuarine Complex.....	3-62
Figure 3.6-1.	Wetland Types in the Project Area. ....	3-65
Figure 3.6-2.	Marsh Type Change in the Project Area, 1968 through 2013. ....	3-73
Figure 3.10-1.	Observed Shoreline Oiling in and around the Project Area. ....	3-102
Figure 3.10-2.	Possible Adverse Impacts of Nutrient Loading. ....	3-116
Figure 3.10-3.	Simplified Conceptual Diagram of the Food Web for the Barataria Basin. ....	3-120
Figure 3.10-4.	Mean and Median CPUE of Small Juvenile Brown Shrimp (top), and Large Juveniles and Subadults (bottom) in the LDWF Samples for the Barataria Basin. ....	3-123

Figure 3.10-5.	Mean and Median CPUE of Small Juvenile White Shrimp (top), and Large Juveniles and Subadults (bottom) in LDWF Samples from the Barataria Basin. ....	3-125
Figure 3.10-6.	Estimated Adult Abundance from the LDWF Stock Assessment Model and Observed Landings of Louisiana Blue Crab. ....	3-127
Figure 3.10-7.	Mean and Median CPUE of Small Juvenile Blue Crab in the LDWF 50-foot Seine Samples (top), and CPUE of Large Juveniles and Subadults in the LDWF 16-foot Trawl Samples (bottom) for the Barataria Basin. ....	3-128
Figure 3.10-8.	Mean and Median CPUE of Juvenile Bay Anchovy in the LDWF 50-foot Seine Samples (top), and of Juvenile and Adult Bay Anchovy in the 16-foot Trawls (bottom) for the Barataria Basin. ....	3-129
Figure 3.10-9.	Mean and Median CPUE of Juvenile Gulf Menhaden (top), and Adult Menhaden (bottom) for the Barataria Basin. ....	3-131
Figure 3.10-10.	Mean and Median CPUE of Adult Red Drum in the LDWF Gillnet Samples (top) and in the Trammel Nets (bottom) for the Barataria Basin. ....	3-133
Figure 3.10-11.	Mean and Median CPUE of Adult Spotted Seatrout in the LDWF Gillnet Samples for the Barataria Basin. ....	3-135
Figure 3.10-12.	Seasonal Size Frequency Distributions for Atlantic Croaker in the Barataria Basin. ....	3-136
Figure 3.10-13.	Monthly Mean CPUE of Large Juvenile and Adult Largemouth Bass in the LDWF Electrofishing Samples (1990 through early 2014). ....	3-139
Figure 3.10-14.	Map of Public Oyster Areas for Louisiana. ....	3-140
Figure 3.11-1.	Geographic Extent of the Northern Gulf of Mexico Stocks Considered in the Proposed Project EIS. ....	3-146
Figure 3.11-2.	Distribution of Common Bottlenose Dolphins during Photo-identification Surveys in the Barataria Basin in March and April 2019. ....	3-150
Figure 3.11-3.	Range of Western Coastal and Northern Coastal Stocks. ....	3-152
Figure 3.11-4.	Sightings of Atlantic Spotted Dolphins in the Gulf of Mexico. ....	3-153
Figure 3.11-5.	Capture Locations for Barataria Bay Satellite-linked Tagging Efforts. ....	3-156
Figure 3.12-1.	Critical Habitat for Federally Listed Species in the Project Area. ....	3-167
Figure 3.13-1.	Map of Census Block Group Boundaries within or Intersecting the Project Area. ....	3-177
Figure 3.13-2.	Population Density within the Project Area. ....	3-181
Figure 3.13-3.	Total Assessed Value of Homes in Plaquemines and Jefferson Parishes over Time in 2019 dollars. ....	3-183
Figure 3.13-4.	Location of Public Service Facilities and Flood Protection Surrounding the Project Footprint. ....	3-188
Figure 3.14-1.	Trip Ticket Sub-basins and Public Oyster Seed Grounds in and near the Project Area. ....	3-192
Figure 3.14-2.	Total Number of Licensed Fishers Active in the Barataria Basin, 2000 to 2018. ....	3-193

Figure 3.14-3.	Total Number of Licensed Fishers Active in the Mississippi River Basin, 2000 to 2018. ....	3-194
Figure 3.14-4.	Total Landings (millions of pounds) by Species Group from the Project Area (landings by area fished). ....	3-195
Figure 3.14-5.	Total Value of Landings by Species Group from the Project Area (landings by area fished). ....	3-196
Figure 3.14-6.	Average Louisiana Shrimp Landings by Gear Type and Vessel Length, 2000 to 2013. ....	3-198
Figure 3.14-7.	Total Shrimp Landings from the Project Area (landings by area fished). ....	3-201
Figure 3.14-8.	Total Oyster Landings from the Project Area (landings by area fished). ....	3-204
Figure 3.14-9.	Total Crab Landings from the Project Area (landings by area fished). ....	3-206
Figure 3.14-10.	Total Saltwater Finfish Landings from Project Area (landings by area fished). ....	3-209
Figure 3.15-1.	Selected Communities, Populations, and Major Levee Systems within the Project Area. ....	3-228
Figure 3.15-2.	Selected Communities for Environmental Justice Impact Analysis, with Data on Minority Populations by Census Block Groups within or intersecting the Project Area. ....	3-229
Figure 3.15-3.	Selected Communities for Environmental Justice Impact Analysis, with Data on Low-income Populations by Census Block Groups within or intersecting the Project Area. ....	3-230
Figure 3.15-4.	Proportion of Minority Populations by U.S. Census Block near the Proposed Project. ....	3-231
Figure 3.16-1.	Map of Recreation Resources in the Project Area. ....	3-232
Figure 3.16-2.	Annual Saltwater and Basic Fishing License Sales for Residents and Non-residents in the Project Area, Average 2010 to 2017. ....	3-237
Figure 3.16-3.	Percent of License Sales in the Project Area Parishes as Percent of All Sales in State. ....	3-238
Figure 3.16-4.	Average Annual MRIP-estimated Recreational Fishing Trips in Project Area Parishes, 2010 to 2016. ....	3-239
Figure 3.16-5.	Average Annual Number of License Sales by Parish, 2010 to 2017. ....	3-245
Figure 3.16-6.	Average Annual Charter Fishing License Sales by Parish, 2010 to 2017. ....	3-249
Figure 3.18-1.	Land Cover and Land Use Types in the Project Area, 2019. ....	3-254
Figure 3.18-2.	Zoning Districts in the Project Area. ....	3-255
Figure 3.20-1.	Map of the Project area Depicting Integrated FEMA DFIRM and Digital Q3 Flood Data. ....	3-260
Figure 3.20-2.	Communities and Subdivisions within the Barataria Basin and Outside Federal Levee Systems that could be Subject to Increased Water Levels during Operation of the Proposed Project. ....	3-261

Figure 3.20-3.	The Communities and Subdivisions Subject to Increased Water Levels during Operation of the Proposed Project are Largely Designated as Coastal High Hazard Areas.....	3-261
Figure 3.20-4.	Major Risk Reduction Systems within the Project Area.....	3-265
Figure 3.21-1.	Reach of Active Dredging in the Lower Mississippi River from Venice to the Gulf of Mexico. ....	3-269
Figure 3.22-1.	Major Roads and Railroads in the Project Area. ....	3-278
Figure 4.1-1.	Mississippi River Hydrograph for Five Historical Representative Flow Regime Years for Each Decade used in the Delft3D Basinwide Model. ....	4-7
Figure 4.1-2.	Mississippi River Hydrographs for Four Additional Flow Regime Years for Each Decade used in the Delft3D Basinwide Model. ....	4-9
Figure 4.1-3.	Sea-level Rise Curve Comparison: Delft3D Basinwide Model, with USACE, and NOAA.....	4-11
Figure 4.2-1.	Approximate Extent of Delft3D Basinwide Model Domain for the Barataria Basin and Mississippi River Birdfoot Delta. ....	4-22
Figure 4.2-2.	Model-projected Land Loss and Gain in the Project Area Relative to the No Action Alternative in 2030 and 2040 under the Applicant's Preferred Alternative.....	4-26
Figure 4.2-3.	Model-projected Land Loss and Gain in the Project Area Relative to the No Action Alternative in 2050 and 2060 under the Applicant's Preferred Alternative.....	4-27
Figure 4.2-4.	Model-projected Land Loss and Gain in the Project Area Relative to the No Action Alternative in 2070 under the Applicant's Preferred Alternative. ....	4-28
Figure 4.2-5.	Model-projected Land Loss and Gain in the Immediate Vicinity (within 0.5-mile) of the Outfall Area Relative to the No Action Alternative in 2030, 2040, 2050, 2060, and 2070 under the Applicant's Preferred Alternative.....	4-29
Figure 4.2-6.	Model-projected Land Area in the Project Area in the Barataria Basin under the Applicant's Preferred Alternative, and Fraction of the Remaining Area due to the Proposed Project. ....	4-30
Figure 4.2-7.	Model-projected Change in Land Area in the Project Area in the Barataria Basin (left) and Mississippi River Birdfoot Delta (right) under the No Action Alternative and the Applicant's Preferred Alternative. ....	4-30
Figure 4.2-8.	Google Earth Imagery Depicting Progression of Landform Development in the Wax Lake Outlet Delta between 1972 (left) and 2017 (right).....	4-35
Figure 4.2-9.	Google Earth Imagery Depicting Progression of Landform Development in the Vicinity of Caernarvon Diversion, in the Big Mar Receiving Basin between 1998 (left) and 2017 (right). ....	4-35
Figure 4.2-10.	Google Earth Imagery Depicting Progression of Landform Development in the Vicinity of the West Bay Diversion between 2004 (left) and 2019 (right).....	4-36
Figure 4.2-11.	Potential Locations of Unidentified Faults in the Barataria Basin. ....	4-37

Figure 4.2-12.	Model-projected Land Loss and Gain in the Project Area Relative to the No Action Alternative in 2070 under the 50,000 cfs Option.....	4-40
Figure 4.2-13.	Model-projected Land Loss and Gain in the Project Area Relative to the No Action Alternative in 2070 under the 150,000 cfs Option.....	4-41
Figure 4.2-14.	Model-projected Land Loss and Gain in the Immediate Vicinity (within 0.5-mile) of the Outfall Area Relative to the No Action Alternative in 2070 under the Applicant's Preferred Alternative and Other Action Alternatives. ....	4-43
Figure 4.2-15.	Model-projected Difference in Bed Elevation With vs. Without-Terrace Field in the Project Area in 2060 under the 150,000 cfs Maximum Flow Volume Alternatives. ....	4-44
Figure 4.4-1.	Station Locations in the Barataria Basin and Birdfoot Delta .....	4-65
Figure 4.4-2.	No Action Alternative Bed Elevation Change from 2020 to 2070. ....	4-69
Figure 4.4-3.	Projected Bed Elevations Changes in 2040 and 2070 for the Applicant's Preferred Alternative Compared to the No Action Alternative. ....	4-72
Figure 4.4-4.	Model-projected Changes to Bed Elevation in Meters in the Project Area Relative to the No Action Alternative in 2030, 2040, 2050, 2060, and 2070 under the Applicant's Preferred Alternative. ....	4-74
Figure 4.4-5.	Model-projected Changes to Bed Elevation in Meters in the Birdfoot Delta Relative to the No Action Alternative in 2030, 2040, 2050, 2060, and 2070 under the Applicant's Preferred Alternative. ....	4-76
Figure 4.4-6.	Model-projected Bed Elevation Changes in 2070 for the 50,000 cfs Alternative Compared to the No Action Alternative. ....	4-77
Figure 4.4-7.	Model-projected Bed Elevation Changes in 2070 for the 150,000 cfs Alternative Compared to the No Action Alternative. ....	4-78
Figure 4.4-8.	Model-projected Changes in Bed Elevation in Meters in the Project Area Relative to the No Action Alternative in 2070 under the Applicant's Preferred Alternative and Other Action Alternatives. ....	4-79
Figure 4.4-9.	Marsh Terrace Features Proposed for the Three Terrace Alternatives (shown in yellow).....	4-80
Figure 4.4-10.	Water Level Trends for Selected Stations for the No Action Alternative. ....	4-81
Figure 4.4-11.	Map of Water Level Increase for the Applicant's Preferred Alternative for the 3 <sup>rd</sup> Week of May under 2040 Conditions (Top Panel) and 2070 Conditions (Bottom Panel) using historical representative hydrograph (1985 for 2040, and 2008 for 2070). ....	4-83
Figure 4.4-12.	Model-projected Water Level Impacts in the Immediate Outfall Area Relative to the No Action Alternative for the 3 <sup>rd</sup> Week of May in 2030, 2040, 2050, 2060, and 2070 under the Applicant's Preferred Alternative .....	4-86

Figure 4.4-13.	Model-projected Water Surface and Bed Elevations for the No Action Alternative and Applicant’s Preferred Alternative at the Station Nearest the Diversion (CRMS 0276). .....	4-87
Figure 4.4-14.	Water Levels for All Alternatives at the Northern/Mid-Basin Station (CRMS 3985). .....	4-88
Figure 4.4-15.	Water Levels for All Alternatives near Lafitte (USACE 82875). .....	4-88
Figure 4.4-16.	Water Levels for All Alternatives at the Station Nearest the Diversion (CRMS 0276). .....	4-89
Figure 4.4-17.	Water Levels for All Alternatives at the Central Station (CRMS 0224). .....	4-89
Figure 4.4-18.	Water Levels for All Alternatives at the Western Station (Little L. Cutoff). .....	4-90
Figure 4.4-19.	Water Levels at the Southwestern Station near Grand Isle (B. Pass at GI). .....	4-90
Figure 4.4-20.	Water Levels for All Alternatives at the Birdfoot Delta Station (CRMS 0163). .....	4-91
Figure 4.4-21.	Water Level Differences for the 3 <sup>rd</sup> Week of May, 2008 Historical Representative Hydrograph, 2070 Conditions, for All Action Alternatives compared to the No Action Alternative. ....	4-93
Figure 4.4-22.	Water Level Differences for the 3 <sup>rd</sup> Week of May, Historical Representative Hydrograph, 2040 (1985 hydrograph) (Top Panel) and 2070 (2008 hydrograph) (Bottom Panel) Conditions, for 50,000 cfs Alternative Compared to the No Action Alternative. ....	4-94
Figure 4.4-23.	Water Level Differences for the 3 <sup>rd</sup> Week of May, Historical Representative Hydrograph, 2040 (1985 hydrograph) (Top Panel) and 2070 (2008 hydrograph) (Bottom Panel) Conditions, for 150,000 cfs Alternative Compared to the No Action Alternative. ....	4-95
Figure 4.4-24.	No Action Alternative Water Level and Tide Signals at the Northern/Mid-Basin Station (CRMS 3985) for 2020 and 2070 Modeled Years. ....	4-97
Figure 4.4-25.	No Action Alternative Water Level and Tide Signals at the Station Nearest the Diversion (CRMS 0276) for 2020 and 2070 Modeled Years. ....	4-97
Figure 4.4-26.	No Action Alternative Water Level and Tide Signals at the Southwestern Station near Grand Isle (B. Pass at GI) for 2020 and 2070 Modeled Years. ....	4-98
Figure 4.4-27.	Water Level and Tide Signals at the Northern/Mid-Basin Station (CRMS 3985). .....	4-100
Figure 4.4-28.	Water Level and Tide Signals at the Station Nearest the Diversion (CRMS 0276). .....	4-101
Figure 4.4-29.	Water Level and Tide Signals at the Southwestern Station near Grand Isle (B. Pass at GI). .....	4-103
Figure 4.4-30.	Locations for Modeled Velocity Output. ....	4-107
Figure 4.4-31.	2020 (1970) Hydrograph, Velocity Output for Applicant’s Preferred Alternative (V3PR4) and No Action Alternative (V3PR1) at Lafitte Oil and Gas Field (Near the Diversion). ....	4-108

Figure 4.4-32.	2020 (1970) Hydrograph, May, Velocity Output for Applicant's Preferred Alternative (V3PR4) and No Action Alternative (V3PR1) at Lafitte Oil and Gas Field (Near the Diversion).....	4-109
Figure 4.4-33.	2020 (1970) Hydrograph, October, Velocity Output for Applicant's Preferred Alternative (V3PR4) and No Action Alternative (V3PR1) at Lafitte Oil and Gas Field (Near the Diversion).....	4-110
Figure 4.4-34.	2070 (2008) Hydrograph, Velocity Output for Applicant's Preferred Alternative (V3PR4) and No Action Alternative (V3PR1) at Lafitte Oil and Gas Field (Near the Diversion). ....	4-112
Figure 4.4-35.	2020 (1970) Hydrograph, Velocity Output for Applicant's Preferred Alternative (V3PR4) and No Action Alternative (V3PR1) at Grand Bayou. ....	4-113
Figure 4.4-36.	2070 (2008) Hydrograph, Velocity Output for Applicant's Preferred Alternative (V3PR4) and No Action Alternative (V3PR1) at Grand Bayou. ....	4-114
Figure 4.4-37.	Zone of Influence (changes in cross-stream velocity) on Mississippi River Flow from Diversion Operations at the Surface (top panel) and near Bed (bottom panel). ....	4-115
Figure 4.4-38.	Model-projected Sand and Fine Sediment Transport Mass for the Three Diversion Sizes (from Water Institute 2019). ....	4-119
Figure 4.4-39.	Shear Stress Plots at High-Flow (left) and at 5,000 cfs Base Flow (right). ....	4-120
Figure 4.4-40.	Local Watershed Division from the Construction of the Diversion Structure.....	4-122
Figure 4.5-1.	Six Station Locations in the Barataria Basin and Birdfoot Delta. ....	4-131
Figure 4.5-2.	Modeled Monthly Average Salinity for the No Action Alternative at the Station Nearest the Diversion (CRMS 0276), Central Station (CRMS 0224), Southwestern Station at Barataria Pass near Grand Isle (B. Pass at GI), Western Station (Little L. Cutoff), Northern/Mid-Basin Station (CRMS 3985), and Birdfoot Delta Station (CRMS 0163) under the Historical Representative Hydrograph. ....	4-136
Figure 4.5-3.	Maps of No Action Alternative (Left Panels) and Applicant's Preferred Alternative (Right Panels) Salinity Averages (ppt) Modeled under the Historical Representative Hydrograph in Winter (January), Decades 2020 to 2029, 2040 to 2049, and 2060 to 2069. ....	4-138
Figure 4.5-4.	Maps of No Action Alternative (Left Panels) and Applicant's Preferred Alternative (Right Panels) Salinity Averages (ppt) Modeled under the Historical Representative Hydrograph in Spring (April), Decades 2020 to 2029, 2040 to 2049, and 2060 to 2069. ....	4-139
Figure 4.5-5.	Average Modeled Salinity at Northern/Mid-Basin Station (CRMS 3985) and the Station Nearest the Diversion (CRMS 0276) for All Alternatives under the Historical Representative Hydrograph. ....	4-143
Figure 4.5-6.	Average Modeled Salinity at Central Station (CRMS 0224) and Western Station (Little L. Cutoff) for All Alternatives under the Historical Representative Hydrograph. ....	4-144

Figure 4.5-7.	Average Modeled Salinity at Southwestern Station, at Barataria Pass near Grande Isle (B. Pass at GI) and Birdfoot Delta Station (CRMS 0163) for All Alternatives under the Historical Representative Hydrograph. ....	4-145
Figure 4.5-8.	Comparison of Hydrographs: Average Modeled Monthly Average Salinity at the Northern/Mid-Basin Station (CRMS 3985) and the Station Nearest the Diversion (CRMS 0276) for Applicant's Preferred Alternative under Representative Historical, 1994, 2006, 2010, and 2011 Mississippi River Hydrographs. ....	4-148
Figure 4.5-9.	Comparison of Hydrographs: Average Modeled Monthly Average Salinity at the Central Station (CRMS 0224) and the Western Station (Little L. Cutoff) for Applicant's Preferred Alternative under Representative Historical, 1994, 2006, 2010, and 2011 Mississippi River Hydrographs. ....	4-149
Figure 4.5-10.	Comparison of Hydrographs: Average Modeled Monthly Average Salinity at the Southwestern Station, at Barataria Pass near Grande Isle (B. Pass at GI) and the Birdfoot Delta Station (CRMS 0163) for Applicant's Preferred Alternative under Representative Historical, 1994, 2006, 2010, and 2011 Mississippi River Hydrographs. ....	4-150
Figure 4.5-11.	Average Modeled Temperature for at Two Stations in Northern Barataria Basin: the Northern/Mid-Basin Station (CRMS 3985) and the Station Nearest the Diversion (CRMS 0276) for All Alternatives under the Historical Representative Hydrograph. ....	4-155
Figure 4.5-12.	Average Modeled Temperature at Two Stations in Central and Western Barataria Basin: the Central Station (CRMS 0224) and the Western Station (Little L. Cutoff) for All Alternatives under the Historical Representative Hydrograph. ....	4-156
Figure 4.5-13.	Average Modeled Temperature at the Southwestern Station, at Barataria Pass near Grande Isle (B. Pass at GI) and the Birdfoot Delta Station (CRMS 0163) for All Alternatives under the Historical Representative Hydrograph. ....	4-157
Figure 4.5-14.	Average Modeled TN at the Northern/Mid-Basin Station (CRMS 3985) and the Station Nearest the Diversion (CRMS 0276) for All Alternatives under the Historical Representative Hydrograph. ....	4-161
Figure 4.5-15.	Average Modeled TN at the Central Station (CRMS 0224) and the Western Station (Little L. Cutoff) for All Alternatives under the Historical Representative Hydrograph. ....	4-162
Figure 4.5-16.	Average Modeled TN at the Southwestern Station, at Barataria Pass near Grande Isle (B. Pass at GI) and the Birdfoot Delta Station (CRMS 0163) for All Alternatives under the Historical Representative Hydrograph. ....	4-163
Figure 4.5-17.	Average Modeled NO <sub>3</sub> fraction of TN at the Northern/Mid-Basin Station (CRMS 3985) and the Station Nearest the Diversion (CRMS 0276) for No Action Alternative and Applicant's Preferred Alternative under the Historical Representative Hydrograph. ....	4-164

Figure 4.5-18.	Average Modeled NO <sub>3</sub> fraction of TN at Two Stations in Central and Western Barataria Basin: the Central Station (CRMS 0224) and the Western Station (Little L. Cutoff) for No Action Alternative and Applicant's Preferred Alternative under the Historical Representative Hydrograph. ....	4-165
Figure 4.5-19.	Average Modeled NO <sub>3</sub> fraction of TN at the Southwestern Station, at Barataria Pass near Grande Isle (B. Pass at GI) and the Birdfoot Delta Station (CRMS 0163) for No Action Alternative and Applicant's Preferred Alternative under the Historical Representative Hydrograph. ....	4-166
Figure 4.5-20.	Average Modeled TP at Two Stations in Northern Barataria Basin: the Northern/Mid-Basin Station (CRMS 3985) and the Station Nearest the Diversion (CRMS 0276) for All Alternatives under the Historical Representative Hydrograph. ....	4-171
Figure 4.5-21.	Average Modeled TP at Two Stations in Central and Western Barataria Basin: the Central Station (CRMS 0224) and the Western Station (Little L. Cutoff) for All Alternatives under the Historical Representative Hydrograph. ....	4-172
