Neil.T.Gauthier@usace.army.mil
Application #: MVN 2001-00166-CM

PUBLIC NOTICE

Interested parties are hereby notified that a permit application has been received by the New Orleans District of the US Army Corps of Engineers pursuant to: [X] Section 10 of the Rivers and Harbors Act of March 3, 1899 (30 Stat. 1151; 33 USC 403), [X] Section 404 of the Clean Water Act (86 Stat. 816; 33 USC 1344).

PROPOSED DREDGING AND BULKHEAD CONSTRUCTION WITH BACKFILL IN TERREBONNE PARISH

NAME OF APPLICANT: Indian Ridge Plantation, L.L.C., c/o Keneth L. Rembert
Surveyors, Attn: Keneth Rembert, 635 School St., Houma, Louisiana 70360.

LOCATION OF WORK: On Bayou Petit Caillou, approximately 2.5 miles south of
Chauvin, Louisiana, in Terrebonne Parish, within the Terrebonne Basin in hydrologic unit
(HUC 08090302), as shown on the attached drawings.

CHARACTER OF WORK: The applicant has requested Department of the Army
authorization to complete previously permitted work to install approximately 3,266-feet of
vinyl bulkhead and dredge to a depth of 3.0 NGVD approximately 3.2 acres of Bayou Petit
Caillou for material to be placed behind the bulkhead and on upland lots adjacent to the
bayou. Approximately 2,752 cubic yards of material will be dredged and re-deposited over
approximately 9.5 acres of adjacent uplands. Approximately 3.2 acres of jurisdictional
Non-Wetland Water bottoms (NWW) will be temporarily impacted. Approximately 1,138-
feet of the bulkhead construction has been completed and no dredging has been
conducted at the site. It is anticipated that the proposed action would have no impact on
adjacent wetlands.

A Preliminary analysis has determined that the proposed project would temporarily impact
3.2 acres of NWW.

MITIGATION: The applicant states that the proposed activity does not affect wetland resources; therefore, no mitigation is required.

The comment period for the requested Department of Army Permit will close in **20 days** from the date of this public notice. Written comments, including suggestions for modifications or objections to the proposed work, stating reasons thereof, are being solicited from anyone having interest in this permit request, and must be submitted so as to be received before or by the last day of the comment period. Letters and/or comments concerning the subject permit application must reference the Applicant's Name and the Permit Application Number and can be preferably emailed to the Corps of Engineer's project manager listed above or forwarded to the Corps of Engineers at the address above, **ATTENTION: REGULATORY DIVISION, RGC, Neil Gauthier**. Individuals or parties may also request an extension of time in which to comment on the proposed work by mail or preferably by emailing the specified project manager listed above. Any request for an extension of time to comment must be specific and substantively supportive of the requested extension and received by this office prior to the end of the initial comment end of the initial comment period. The Branch Chief will review the request and the requester will be promptly notified of the decision to grant or deny the request. If granted, the time extension will be continuous and inclusive of the initial comment period and will not exceed a total of 30 calendar days. This public notice is also available for review online at <https://go.usa.gov/xennJ>

Corps of Engineers Permit Criteria

The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit which reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership and, in general, the needs and welfare of the people.

The U.S. Army Corps of Engineers is soliciting comments from the public, federal, state, and local agencies and officials, Indian Tribes, and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the U.S. Army Corps of Engineers to determine whether to make, modify, condition, or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the

proposed activity. Further, all factors that may be relevant to the proposal will be considered, including the potential cumulative effects associated with the proposed project.

The New Orleans District is presently unaware of properties listed on the National Register of Historic Places near the proposed work but is pending further review in accordance with the National Historic Preservation Act. The possibility exists that the proposed work may damage or destroy presently unknown archeological, scientific, prehistorical, historical sites, or data. As deemed necessary, copies of this public notice will be sent to the State Archeologist, State Historic Preservation Officer, and federally listed tribes regarding potential impacts to cultural resources.

Our initial finding is that the proposed work would have no effect on any species listed as endangered by the U.S. Department of Commerce, nor affect any habitat designated as critical to the survival and recovery of any endangered species.

Based on the Information Planning and Consultation (IPaC) tool for Endangered Species in Louisiana, as signed on January 27, 2020, between the U.S. Army Corps of Engineers, New Orleans District (CEMVN) and the U.S. Fish and Wildlife Service, CEMVN has determined that the proposed project is located within waters known to be occupied by the threatened West Indian Manatee (*Trichechus manatus*) and the threatened Eastern Black Rail (*Laterallus jamaicensis ssp. jamaicensis*). Determination has been made that the project is not likely to adversely affect either species.

This notice initiates the Essential Fish Habitat (EFH) consultation requirements of the Magnuson-Stevens Fishery Conservation and Management Act. The applicant's proposal would result in the destruction or alteration of up to 0 acres of EFH utilized by various life stages of red drum and penaeid shrimp. Our initial determination is that the proposed action would not have a substantial adverse impact on EFH or federally managed fisheries in the Gulf of Mexico. Our final determination relative to project impacts and the need for mitigation measures is subject to review by and coordination with the National Marine Fisheries Service.

If the proposed work involves deposits of dredged or fill material into navigable waters, the evaluation of the probable impacts will include the application of guidelines established by the Administrator of the Environmental Protection Agency. Also, a certification that the proposed activity will not violate applicable water quality standards will be required from the Department of Environmental Quality before a permit is issued.

Any person may request, (preferably by email to the project manager, or in writing), within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for public hearings shall state, with particularity, the reasons for holding a public hearing.

The applicant has certified that the proposed activity described in the application complies with and will be conducted in a manner that is consistent with the Louisiana Coastal Resources Program (Louisiana Coastal Zone Application P20170883). The Department of the Army permit will not be issued unless the applicant received approval or a waiver of the Coastal Use Permit by the Department of Natural Resources.

You are invited to communicate the information contained in this notice to any other parties whom you deem likely to have interest in the matter.

John M. Herman
Chief, Central Evaluation Branch
Regulatory Division

REVISED: SEPTEMBER 1, 2017
REVISED: APRIL 4, 2018
REVISED: MAY 2, 2018
REVISED: OCTOBER 5, 2023

APPLICATION BY:
INDIAN RIDGE PLANTATION, L.L.C.
P. O. BOX 550
HOUMA, LA 70361

NOTES:

APPROX. 1,138± TOTAL FEET OF EXISTING BULKHEAD (PCV SHEETING) HAS BEEN PLACED ALONG BAYOU PETIT CAILLOU AS PREVIOUSLY PERMITTED. THE PROJECT IS NOT COMPLETED. APPROX. 2,128± TOTAL FEET OF PROPOSED BULKHEAD (PCV SHEETING) STILL NEEDS TO BE PLACED ALONG THE ERODING BANK LINE OF BAYOU PETIT CAILLOU TO PREVENT FURTHER EROSION & FOR DOCKING FACILITY TO COMPLETE THE PREVIOUSLY PERMITTED PROJECT.

THE WORK TO PLACE THE PROPOSED BULKHEAD & DREDGING WILL BE DONE FROM A BARGE MOUNTED BUCKET DREDGE IN BAYOU PETIT CAILLOU. THE BARGE DRAFT WILL BE 3' AND THE TUGBOAT DRAFT WILL BE 5'.

APPROX. 2,752 CU. YDS. OF BAYOU BOTTOM TO BE DREDGED FROM BAYOU PETIT CAILLOU TO ENABLE DOCKSIDE MOORING. APPROX. 723 CU. YDS. OF DREDGED MATERIAL TO BE USED AS FILL IN LOWER AREAS AS NEEDED. THE REMAINDER (2,029 CU. YDS.) WILL BE SPREAD ON EXISTING LOTS. THIS SPOIL SPREAD WILL EQUAL APPROX. 2" TO 4" ACROSS THE EXISTING LOTS. IT WILL BE SPREAD USING A BULLDOZER/GRADER. THE SPOIL TO BE DREDGED FROM THE BAYOU WILL BE DEPOSITED ON THE LOTS AFTER SURROUNDING THE SITE WITH FILTER FABRIC SO AS TO PREVENT THE SILT RUN-OFF FROM DRAINING ONTO THE NEIGHBORING PROPERTY, STREET OR BAYOU. ONCE THE SPOIL IS DRIED OUT, IT WILL BE SPREAD ACROSS THE LOTS AND SODDED. ONCE THE SOD TAKES ROOT, THE FABRIC WILL BE REMOVED, ALLOWING SURFACE WATER TO DRAIN INTO THE ROADSIDE DITCH WHICH WILL THEN DRAIN INTO THE BAYOU.
