(225) 219-3225
Project Manager
Elizabeth Hill
WQC Application Number
WQC #190611-01

Interested parties are hereby notified that a permit application has been received by the New Orleans District of the U.S. Army Corps of Engineers pursuant to: [] Section 10 of the Rivers and Harbors Act of March 3, 1899 (30 Stat. 1151; 33 USC 403); and/or [X] Section 404 of the Clean Water Act (86 Stat. 816; 33 USC 1344).

Application has also been made to the Louisiana Department of Environmental Quality, Water Permits Division, for a Water Quality Certification (WQC) in accordance with statutory authority contained in LRS30:2047 A(3), and provisions of Section 401 of the Clean Water Act (P.L.95-17).

PROPOSED LAKE HAVEN RESIDENTIAL DEVELOPMENT ON OLD SCENIC HIGHWAY IN EAST BATON ROUGE PARISH

NAME OF APPLICANT: American Homeland, LLC., c/o D&S Environmental Services, Inc., P.O. Box 510, French Settlement, Louisiana 70733.

LOCATION OF WORK: In Zachary, Louisiana (Latitude: 30.634205, Longitude: -91.184788), in East Baton Rouge Parish, within the Bayou Sara-Thompson basin in hydrological unit (HUC 08070201), as shown on the attached drawings.

CHARACTER OF WORK: The applicant has requested a permit from the Department of the Army for the authorization to clear, grade, excavate and deposit fill and/or aggregate material to construct and maintain Lake Haven residential subdivision, a 165 lot single family development with utilities and detention pond/drainage infrastructure. Approximately 3,255 cubic yards of fill will be placed on site to achieve required grade elevations. The proposed project is situated on a 45.87 acre tract that has been determined to be comprised of 44.22 acres of uplands, 1.32 acres of forested wetlands and 0.33 acres of other waters of the U.S. The proposed project will impact 1.32 acres of wetlands and 0.33 acres of other waters of the U.S.

The applicant has stated that the project has been designed to avoid and minimize direct and secondary adverse impacts to the maximum extent practicable. As

compensation for the unavoidable wetland impacts, the applicant proposes to mitigate through the purchase of in-kind wetland credits from a Corps approved mitigation bank located in the watershed.

The comment period for the Department of the Army Permit modification and the Louisiana Department of Environmental Quality WQC will close **20 days** from the date of this joint public notice. Written comments, including suggestions for modifications or objections to the proposed work, stating reasons thereof, are being solicited from anyone having interest in this permit and/or this WQC request and must be mailed so as to be received before or by the last day of the comment period. Letters concerning the Corps of Engineers permit modification application must reference the applicant's name and the Permit Application Number, and be mailed to the Corps of Engineers at the address above, **ATTENTION: REGULATORY BRANCH**. Similar letters concerning the Water Quality Certification must reference the applicant's name and the WQC Application number and be mailed to the Louisiana Department of Environmental Quality at the address above. Individuals or parties may request an extension of time in which to comment on the proposed work by writing or e-mailing the Corps of Engineers Project Manager listed above. Any request must be specific and substantively supportive of the requested extension, and received by this office prior to the end of the initial comment period. The Section Chief will review the request and the requestor will be promptly notified of the decision to grant or deny the request. If granted, the time extension will be continuous to the initial comment period and, inclusive of the initial comment period, will not exceed a total of 30 calendar days.

The application for this proposed project is on file with the Louisiana Department of Environmental Quality and may be examined during weekdays between 8:00 a.m. and 4:30 p.m. Copies may be obtained upon payment of costs of reproduction.

Corps of Engineers Permit Criteria

The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit which reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership and, in general, the needs and welfare of the people.

The U.S. Army Corps of Engineers is soliciting comments from the public, federal, state, and local agencies and officials, Indian Tribes, and other interested

parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the U.S. Army Corps of Engineers to determine whether to make, modify, condition, or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

The New Orleans District is unaware of properties listed on the National Register of Historic Places near the proposed work. The possibility exists that the proposed work may damage or destroy presently unknown archeological, scientific, prehistorical, historical sites, or data. Copies of this notice are being sent to the State Archeologist and the State Historic Preservation Officer.

Our initial finding is that the proposed work would not affect any species, nor affect any habitat designated as critical to the survival and recovery of such species, listed as endangered by the U.S. Department of Interior. Utilizing Standard Local Operating Procedure for Endangered Species in Louisiana (SLOPES), dated October 22, 2014, between the U.S. Army Corps of Engineers, New Orleans and U.S. Fish and Wildlife Service, Ecological Services Office, the Corps has determined that the proposed activity would have no effect on any listed species.

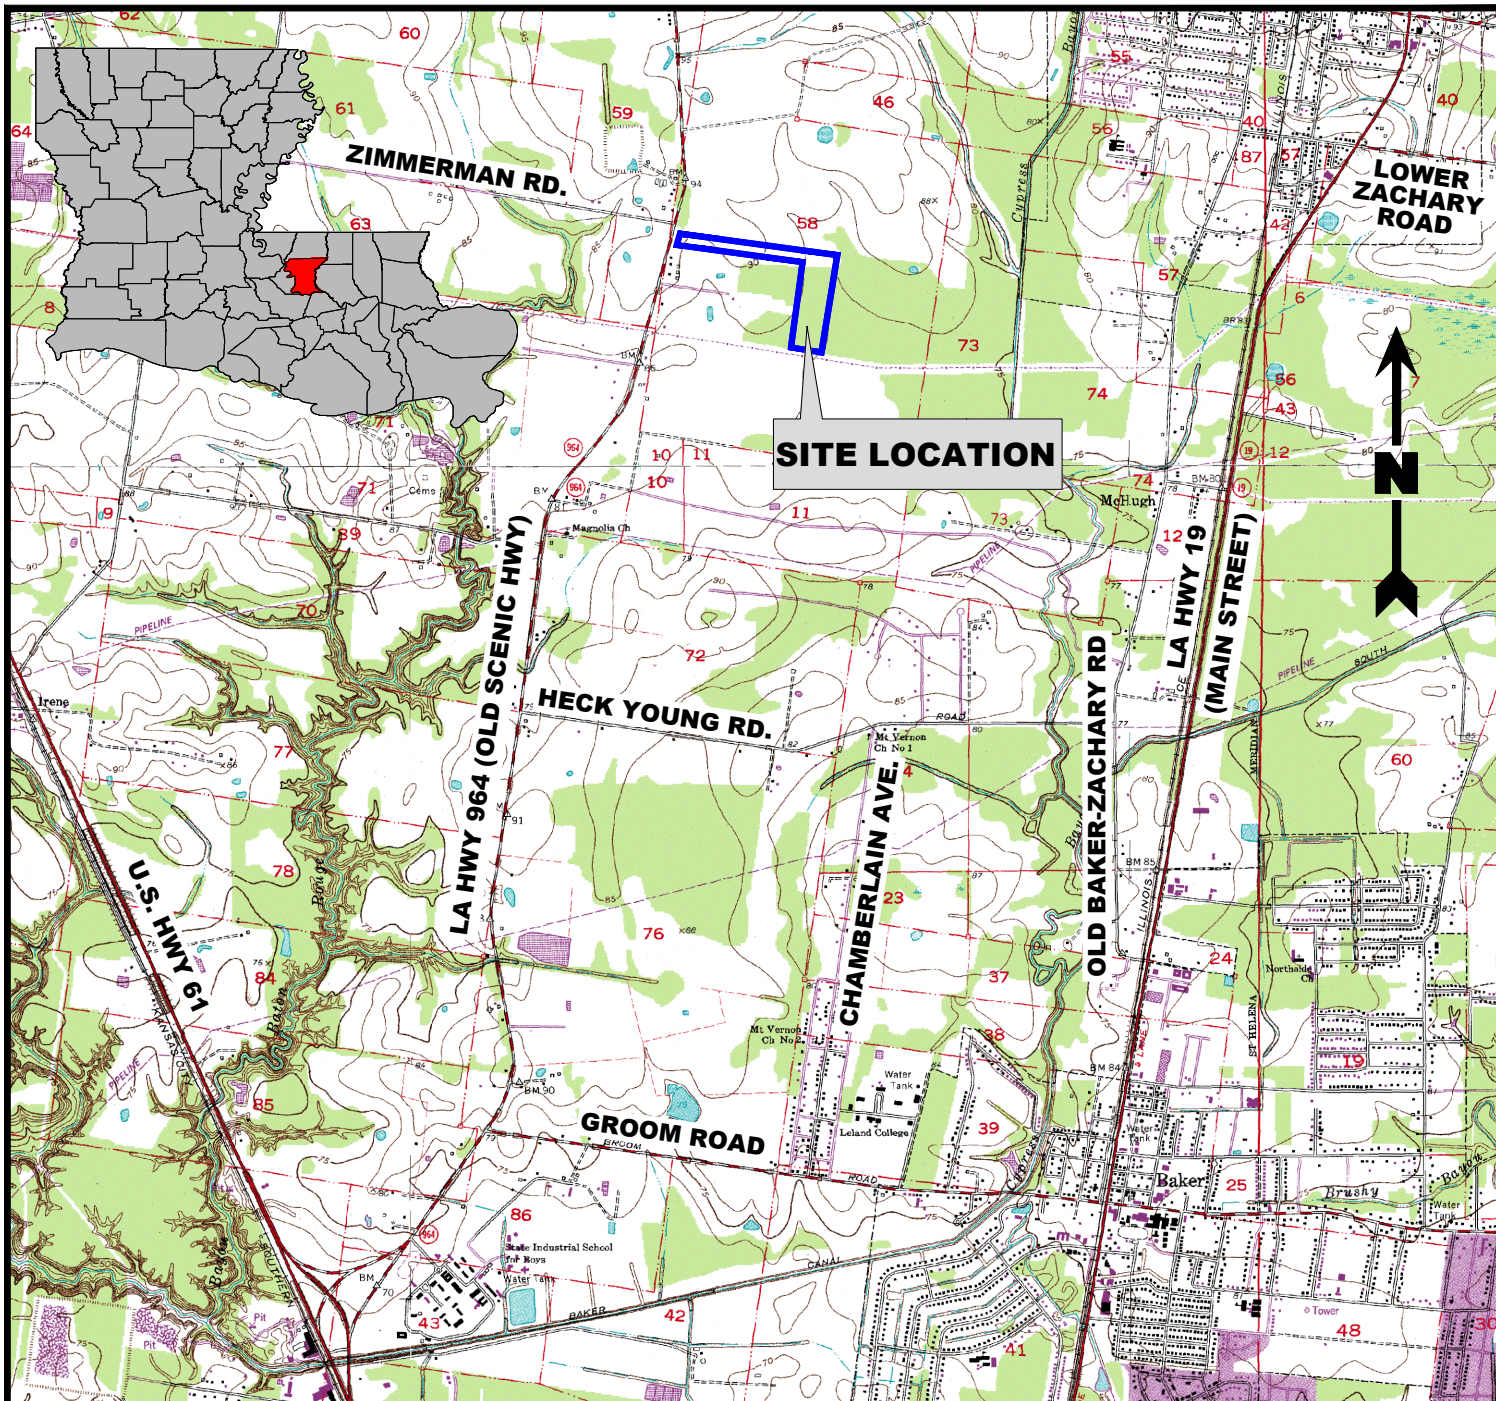

This notice initiates the Essential Fish Habitat (EFH) consultation requirements of the Magnuson-Stevens Fishery Conservation and Management Act. The applicant's proposal would result in the destruction or alteration of up to 0 acres of EFH utilized by various life stages of red drum and penaeid shrimp. Our initial determination is that the proposed action would not have a substantial adverse impact on EFH or federally managed fisheries in the Gulf of Mexico. Our final determination relative to project impacts and the need for mitigation measures is subject to review by and coordination with the National Marine Fisheries Service.

If the proposed work involves deposits of dredged or fill material into navigable waters, the evaluation of the probable impacts will include the application of guidelines established by the Administrator of the Environmental Protection Agency. Also, a certification that the proposed activity will not violate applicable water quality standards will be required from the Department of Environmental Quality, Water Permits Division under permit number WQC #190611-01.

Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for public hearings shall state, with particularity, the reasons for holding a public hearing. You are requested to communicate the information contained in this notice to any other parties whom you deem likely to have interest in the matter.

John M Herman
Chief, Central Evaluation Section

Section C-C'

Horizontal Scale: 1" = 5'

Vertical Scale: 1" = 5'

Notes

1. The layout was provided by Quality Engineering & Surveying, LLC.
2. Jurisdictional Wetlands and Other Waters Of The US obtained from U.S. Army CORPS of Engineers Preliminary Jurisdictional Determination Account Number MVN-2017-01533-SG.
3. According to F.E.M.A. F.I.R.M. Community Panel No. 22033C0040 E & 22033C0045 F dated June 8, 2018, this property falls in Zone X (Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.) & Flood Zone AE (Special flood hazard areas (SFHAs) subject to inundation by the 1% annual chance flood; Base Flood Elevations Determined). Base Flood Elevation = 84'.
4. Non-wetland natural ground elevations range from 80'-0" to 95'-0" N.G.V.D. Elevation data was obtained from topographic data provided by Quality Engineering & Surveying, LLC.
5. Natural Ground elevations in existing jurisdictional wetlands are approximately 6" lower than adjacent non-wetland ground elevations.
