Henderson Lake area getting seismic survey

NEW ORLEANS -- Quantum Geophysical Inc. will be conducting a seismic survey beginning Saturday, April 10, on U.S. Army Corps of Engineers property on Henderson Lake in the Atchafalaya Basin.

The survey will be taking place on Henderson Lake and surrounding land, both north and south, of Interstate 10 within St. Martin Parish. Work will include the use of airboats and an occasional seismic blast. Visitors and boaters are asked to use extra caution in this area.

Quantum Geophysical will do the work on behalf of owners of the mineral rights. The Corps of Engineers' purchase of the land did not include mineral rights.

Questions or concerns regarding the work on Henderson Lake and surrounding land should be directed to the Corps of Engineers Project Office at Port Barre, 337- 585-0853.
