of Engineers**
New Orleans District

Project Fact Sheet

Official Project Name

Iberia Parish Environmental Infrastructure

Location

Iberia Parish, Louisiana

Purpose

The purpose of the project is to assist in planning, design, and construction of water supply and wastewater treatment infrastructure facilities in Iberia Parish, Louisiana.

Background

Authorized under Sec 219, WRDA 92 as amended (Sec 502, WRDA 99; Sec 107, Omnibus Bill of 2000; CAA of 2001). The project is located in Iberia Parish, which is located along the Louisiana coast. Under this authority, funds added by Congress may be used by the Chief of Engineers to assist the local sponsors in the planning, engineering and design or construction of water supply or wastewater projects. Local cost share responsibility under this authorization is not less than 25% in cash. Credit for in-kind services is not allowed (LERRD acquisition costs excepted). Conducting engineering and design for a 1.5-million-gallon-per-day treatment plant for Iberia Parish.

Authority

Authorized under Section 219, WRDA 92

Progress to Date

Developing economic analysis and design documents for a 1.5 MGD wastewater treatment facility for the parish.
